OVERVIEW

In its April 2017 World Economic (WEO), Outlook the International Monetary Fund (IMF) revised its global growth forecast for 2017 upwards to 3.5 percent, from 3.4 percent in January 2017. This outturn is supported by an improved outlook for advanced economies with growth forecast at 2.0 percent, while prospects for emerging market and developing economies (EMDEs) remain unchanged at 4.5 percent. The United States (US) is expected to drive growth for advanced economies, underpinned by better performance foreseen in the second half of 2017. Recovery in the Euro zone is projected to be moderate while the outlook for the EMDEs remains uneven, driven largely by China's transitioning economy. Risks to global growth remain on the downside on account of the widening global imbalances and ongoing structural rigidities.

Domestically, the Fijian economy is now expected to expand by 3.8 percent in 2017, higher than the earlier projection of 3.6 percent. This growth remains broad based. largely driven bv the manufacturing; financial & insurance activities: construction: wholesale & retail trade and the transport & storage sectors. In aggregate demand. terms of consumption remains strong while investment activity continued to show positive results as indicated by partial indicators.

Liquidity and credit conditions suggest that overall monetary conditions remain supportive of domestic economic activity. Commercial banks' interest rate spread narrowed in March to 2.63 percent from 2.85 percent in December due to a higher increase in time deposit rates which more than offset the pick-up in outstanding lending rates. Overall bank liquidity improved to \$470.8 million in March from \$412.3 million in December 2016 while demand for commercial banks' credit picked up in the year to March.

In the March quarter, total exports of major commodities fell on an annual basis by 16.9 percent, based on the Overseas Exchange Large Transactions (OELT) report. Conversely in the same quarter, major import payments rose by 24.4 percent.

Inflation increased to 5.6 percent in March from 3.9 percent in December last year. This outcome was on account of higher prices in the alcoholic beverages, tobacco & narcotics; furnishings. household. equipment & routine household maintenance: clothing footwear: & transport and food & non-alcoholic beverages categories. The temporary effects of the price hikes post Tropical Cyclone (TC) Winston are expected to taper off around April and the inflation rate to decline gradually to around 3.0 percent by year-end.

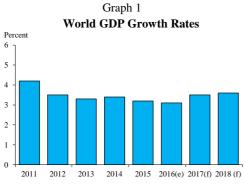

Foreign reserves (Reserve Bank of Fiji (RBF) Holdings) stood at \$1,978.0 million at March end, sufficient to cover 5.3 months of retained imports (MORI) compared to \$1,921.2 million at December end, equivalent to cover 5.4 MORI.

Given the positive developments in global and domestic conditions during the first quarter of 2017, the RBF kept the Overnight Policy Rate (OPR) unchanged at 0.5 percent.

THE INTERNATIONAL ECONOMY

International Economic Conditions

According to the IMF's April 2017 WEO, global growth is expected to pick-up from 3.1 percent in 2016 to 3.5 percent in 2017, driven by an improved outlook for advanced economies. For 2018, the global economy is envisaged to expand by 3.6 percent (Graph 1).

Source: IMF WEO-April 2017

The US economy is expected to perform better in the second half of 2017, aided by an expansionary fiscal policy, cyclical recovery in inventory accumulation and solid consumption growth. Similarly, the stronger-than-anticipated performance by the United Kingdom (UK) post Brexitvote led to an upward revision in its yearend growth forecast, contrary to the expected negative effects initially. Recovery in the Euro zone is projected to be moderate, while other advanced economies including Japan and Canada remain strong. The outlook for EMDEs remains unchanged at 4.5 percent owing to China's transitioning economy, lower commodity revenues for exporter countries and high debt levels.

Despite the improved outlook, stronger

remains a challenge amidst recoverv impediments binding structural and downside risks. Structural problems surrounding productivity and income inequality have skewed policy options to inward focussed, risking global be economic integration and order. an arrangement that has benefited EMDEs. In addition, a faster-than-expected pace of interest rate hike in the US could signal a reversal of market sentiments. This could possibly lead to a rapid tightening in financial conditions and further appreciation of the US dollar with adverse repercussions for emerging market economies including China. More broadly, weak demand, low inflation, fragile balance sheets and deepening geopolitical tensions in the Middle East and North Africa are expected to drag the global economic prospects.

The **US** economy slowed to 2.1 percent in the December 2016 quarter from a growth of 3.5 percent in the September quarter. This was attributed to downturns in exports, federal government spending and non-residential fixed investment that were partly offset by upturns in private inventory investment, consumer spending and residential fixed investment.

Latest business data suggests that conditions softened as manufacturing and services activities expanded, albeit at a slower pace. Consumer confidence however, improved markedly in March and stood at its highest level since December 2000, driven by favourable business and labour market conditions and greater optimism regarding the short-term outlook for business, jobs and personal income. Cumulative to February, the US trade deficit widened due to an increase in imports which more than offset the growth in exports.

conditions Labour market remained favourable in February with the unemployment rate at 4.7 percent, similar to the last quarter. Conversely, inflation increased to 2.7 percent in February, attributed to higher energy prices and transportation accelerated costs for services.

In line with the strengthening labour market and pick-up in economic activity, the Federal Reserve raised the target range for the federal funds rate to 0.75-1.00 percent in March from 0.50-0.75 percent in December.

The US economy is estimated to grow by 2.3 percent in 2017 and 2.5 percent in 2018. Inflation is forecast at 2.7 percent in 2017, before easing to 2.4 percent in 2018.

The **Euro zone** economy grew by 0.4 percent in the December 2016 quarter, unchanged from the September quarter, driven by positive changes in household consumption, gross fixed capital formation, changes in inventories and government spending.

Recent data suggests optimistic economic and business conditions supported by robust manufacturing and service activities. Consumer confidence improved slightly however, remained on the lower side amidst uncertainties surrounding the Euro zone political environment.

Labour market conditions improved in February with the unemployment rate at 9.5 percent, the lowest since May 2009. Externally, the trade balance shifted to a deficit in January, the first since January 2014 and the biggest since January 2013, as the increase in imports (17.0%) more than offset the growth in exports (13.0%).

Inflation rose to 1.5 percent in March from 1.1 percent in December driven by higher fuel and food prices. The European Central Bank (ECB) however, is targeting a sustained convergence of inflation rates towards levels below but close to 2.0 medium-term. percent in the Improvements in labour market conditions and an accommodative monetary policy are expected to support the region this economic vear. while and political outcomes from the Brexit-vote continue to In light of this, the ECB pose risks. maintained monetary accommodation, keeping its benchmark refinancing rate at zero percent in March.

The Euro zone economy is estimated to expand by 1.7 percent and 1.6 percent in 2017 and 2018, respectively. Inflation is projected at 1.7 percent for 2017 and 1.5 percent for 2018.

The **Japanese** economy grew by 0.3 percent in the last quarter of 2016, unchanged from the September quarter. This expansion was driven by higher exports, government spending and private non-residential investment, while household consumption remained relatively flat.

Latest economic data suggests positive outcomes. Business confidence improved backed by a pick-up in manufacturing activity and industrial production, albeit at a slower pace, while the services industry gained momentum. Consumer confidence remained upbeat on account of improved perceptions for overall livelihood, income growth and employment. Labour market conditions improved as the unemployment rate fell to 2.8 percent in February from 3.1 percent in December. Japan's trade surplus noted a marked increase, on an annual basis in February, with growth in exports (11.3%) more than offsetting the marginal pick-up in imports (1.2%). Annual inflation stood at 0.3 percent in February, unchanged from December.

Given the economy's moderate pace of recovery, the Bank of Japan (BoJ) left its policy interest rate unchanged at -0.10 percent. The BoJ is expected to continue with its "Quantitative and Qualitative Monetary Easing with a Negative Interest Rate" program to support economic growth and achieve a price stability target of 2.0 percent.

The Japanese economy is expected to expand by 1.2 percent in 2017 and 0.6 percent in 2018. Inflation is anticipated to be around 1.0 percent at the end of 2017 and drop to 0.6 percent in 2018.

The **Australian** economy expanded by 1.1 percent in the last quarter of 2016, compared to a 0.5 percent contraction in the September quarter. This turnaround in economic performance was mainly driven by a pick-up in household consumption expenditure, public capital formation and net trade.

Recent available economic indicators suggest positive-yet-slower growth. The manufacturing index rose in the March quarter backed by an increase in new orders and sales. Production and export orders however, eased. Consumer confidence improved over this period on expectations for better economic conditions. The trade surplus however, narrowed slightly in February when compared to December as exports fell more than imports.

Labour market indicators waned slightly as the unemployment rate rose to 5.9 percent in February from 5.8 percent in December, led by job losses and an increase in the number of unemployed persons. Annual inflation rose to 1.5 percent in December from 1.3 percent in September owing to a faster increase in prices of food and housing.

Following the end of the mining investment boom in 2016, the Australian economy is expected to grow moderately in 2017. In view of this, the Reserve Bank of Australia held its monetary policy stance unchanged in March and kept the cash rate at 1.50 percent in an attempt to achieve sustainable growth and an inflation target of 2.0-3.0 percent over time.

The Australian economy is forecast to grow by 3.1 percent in 2017 and 3.0 percent in 2018. Inflation is projected at 2.0 percent for 2017 and is expected to rise to 2.4 percent in 2018.

The **New Zealand** economy decelerated in the December 2016 quarter to 0.4 percent compared to a 0.8 percent growth in the September quarter, mainly driven by downturns in the mining, manufacturing and agriculture sectors.

Latest data revealed softening business confidence as firms expect the construction boom to end soon. Similarly, consumer confidence moderated on account of lower optimism about future household finances. Labour market conditions waned with the jobless rate increasing to 5.2 percent in December from 4.9 percent in September.

On the external front, the trade deficit widened on an annual basis in February driven by higher imports (4.0%), mainly of crude oil and a decline in exports (5.5%). Annual inflation increased to 1.3 percent in December compared to 0.4 percent in September mainly due to higher prices for housing and household utilities.

Given the on-going surplus capacity in the global economy, widespread uncertainties potentially undermining the international outlook and weaker-than-expected growth in the New Zealand economy, the Reserve Bank of New Zealand kept its official cash rate unchanged at 1.75 percent in March.

The New Zealand economy is forecast to grow by 3.2 percent in 2017 and 2.7 percent in 2018. Inflation is projected at 1.5 percent for 2017 and is expected to rise to 2.0 percent in 2018.

The **Chinese** economy expanded on an annual basis by 6.9 percent in the March quarter compared to a 6.8 percent growth in the December quarter. This was driven by increased government infrastructure spending and a recovery in fixed asset investment.

Recent economic indicators suggest further improvements in the economy. Manufacturing activity expanded in March albeit at a slower pace, amid a softer growth in new export orders. Consumption activity however, remained upbeat as retail sales rose by 10.9 percent in the same period. On external trade, the Chinese economy recorded a surplus following a surge in both exports and imports.

Inflation decelerated to 0.9 percent in March from 2.1 percent in December, as food prices continued to decline.

The People's Bank of China raised its interest rates for 7-day, 14-day and 28-day reverse repurchase agreements (repo rate) to 2.45 percent, 2.60 percent and 2.75 percent, respectively in March due to strengthening market expectations for higher funding costs in response to rising property prices and the Federal Reserve's interest rate increase.

The Chinese economy is expected to expand by 6.6 percent in 2017 and 6.2 percent in 2018. Inflation is estimated to be around 2.5 percent in 2017, easing to 2.3 percent in 2018.

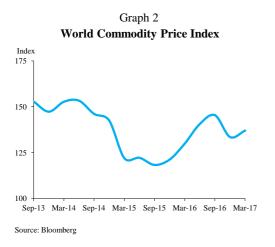

The **Indian** economy slowed to an estimated 7.0 percent in December from a growth of 7.4 percent in September led by downturns in the financial & insurance; real estate and professional services sectors.

However, latest data revealed improved business confidence as the manufacturing and services sectors picked up, backed by higher output and new export orders. The economy is expected to gain further traction following the announcement of the 2017-2018 fiscal budget in February, which promotes inclusive growth and aims to strengthen infrastructure, improve fiscal management and support the financial sector.

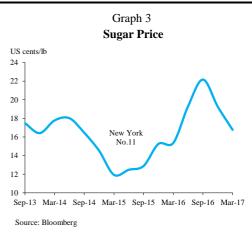

The trade deficit narrowed in February due to an increase in exports and a fall in imports. Annual inflation increased to 3.8 percent in March from 3.4 percent in December driven by higher prices for food and beverages. While assessing the effects of demonetisation on inflation and growth, the Reserve Bank of India changed its monetary policy stance to neutral and kept the repo rate unchanged at 6.25 percent in March.

The Indian economy is estimated to grow by 7.2 percent and 7.7 percent in 2017 and 2018, respectively. Inflation is estimated to be around 4.7 percent in 2017 and 5.1 percent in 2018.

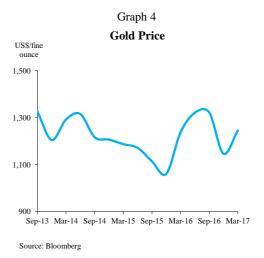

The **World Commodity Price Index**¹ increased by 2.6 percent in the March quarter underpinned by a pick-up in lumber prices (Graph 2).

The world market price for **sugar** (New York No. 11) noted a sharp decline to US16.76 cents per pound in March from US19.51 cents per pound in December amid expectations that a boost in production by the world's largest sugar producer Brazil, will improve current world supply levels (Graph 3).

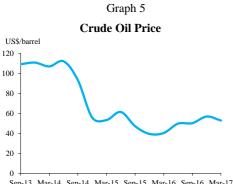

Gold prices picked up in March and stood at US\$1,244.85 per fine ounce from US\$1,145.90 in December, as uncertainty over the US President's tax and investment plans and the elections in Europe fuelled demand for the bullion as a safe haven (Graph 4).

The price for **Brent Crude Oil** decreased in March to US\$52.83 per barrel from US\$56.82 in December on the back of rising US shale oil output and high crude oil stock (Graph 5).

¹ The World Commodity Price Index is sourced from Bloomberg and is an equal-weighted geometric average of selected commodity prices.

In the coming months, movement in oil prices would depend on the compliance of the Organisation of the Petroleum Exporting Countries with the production cut agreement and the pace of shale oil drilling in the US.

THE DOMESTIC ECONOMY

Domestic Economic Conditions

Despite the adverse effects of TC Winston and the floods in 2016, the Fijian economy is estimated to have grown by 2.0 percent (unchanged from the earlier forecast The agriculture; in October 2016). manufacturing; forestry & logging; fishing & aquaculture and the water sectors are expected to have declined. Nonetheless, these declines were offset by increased activity in other sectors including the transport & storage; wholesale & retail trade; public administration & defence; financial & insurance activities: construction and the accommodation & food services sectors (Graph 6).

For 2017, the economy is projected to record a broad based growth of 3.8 percent, slightly higher than the earlier forecast of 3.6 percent, resulting in eight consecutive years of positive growth. With the exception of fishing & aquaculture, forestry & logging and the mining & quarrying, most sectors are expected to improve their performance this year. The manufacturing, financial & insurance activities and the construction sectors are expected to be the major drivers of growth this year.

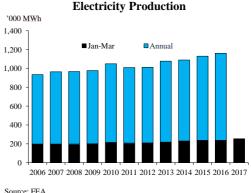

The RBF's December 2016 Business Expectations and Retail Sales surveys confirms this growth forecast as businesses expect improved economic conditions, higher investments and retail sales over the next twelve months.

For 2018 and 2019, the Fijian economy is envisaged to grow by 3.0 percent and 2.9 percent, respectively. Growth is expected to be broad based in both years.

Production

Sectoral performances were mixed in the first quarter of 2017. Positive growth was noted for the electricity and tourism sectors while weaker outcomes prevailed in the timber and mining industries.

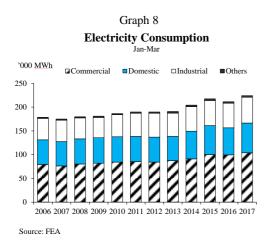

Cumulative to March 2017, total **electricity** generated grew by 7.0 percent to 253,439 megawatt hours (MWh), higher than the 0.1 percent growth in the same period in 2016 (Graph 7).

Graph 7 Electricity Production

In terms of Fiji Electricity Authority's (FEA) energy generation mix, 72.3 percent of the electricity produced was from renewable sources, higher than the 64.7 percent recorded in the same period last year.

In line with the higher electricity production in the first quarter of 2017, electricity consumption grew by 6.0 percent led by demand from domestic (9.8%), industrial (5.0%), commercial (4.5%) and other² (4.5%) users (Graph 8).

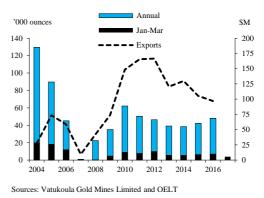

The **timber** industry remained weak in the first quarter of 2017. The total log intake and woodchip production by the Tropik Wood Industries Limited declined by 81.4 percent (to 7,947 tonnes) and 94.9 percent (to 1,823 metric tonnes), respectively in the March quarter. This setback was due to the lower production by the Wairiki mill and the current subdued demand in the Japanese and Chinese markets. In the same period, the lack of demand by licensed mahogany buyers, wet weather conditions, access issues in the Tailevu area and halting the harvest to avoid stock-piling have led to significant declines in

mahogany production by 96.4 percent to 352 cubic meters.

Similarly, gold production declined on an annual basis by 45.8 percent to 5,596 ounces in the March quarter, contrary to the 13.7 percent (by 5,759 ounces) growth recorded in December 2016 (Graph 9). This decline attributed was to unfavourable weather conditions and breakdowns at the processing plant which resulted in the closure of the plant for maintenance works.

Consequently, gold export earnings declined on an annual basis by 15.9 percent to \$18.8 million, cumulative to March based on the OELT report, despite an increase in gold prices over the same period.

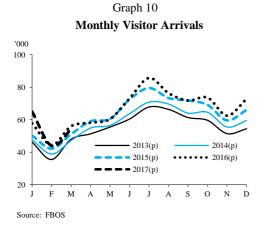

In the March quarter, **visitor arrivals** grew on an annual basis by 3.3 percent to 163,226 tourists, lower than the 10.2 percent growth in the same period in 2016 (Graph 10).³ Tourists from the US contributed the most towards this growth with an increase of 22.2 percent (to 17,139), followed by New Zealand (8.8%

² This includes street lights and institutions such as schools.

³ The Macroeconomic Committee estimates visitor arrivals to increase by an additional 5.0 percent (to 832,206 visitors) in 2017.

to 23,732) and Pacific Islands (8.2% to 14,028).

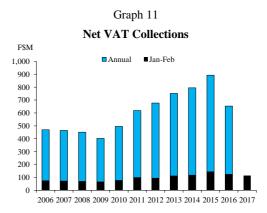

Additionally increases in visitor arrivals from the Rest of Asia (16.3% to 4,166), South Korea (15.3% to 2,114), India (15.1% to 1,188), Japan (8.0% to 1,767), Hong Kong (5.4% to 118), Canada (3.5% to 2,968), Continental Europe (1.4% to 7,898) and China (1.3% to 13,460) were also noted. Contrastingly, declines in visitor arrivals was noted on an annual basis from Australia (-3.4% to 69,220) and UK (-0.9% to 4,227).

Consumer spending as suggested by partial indicators remained firm in the March quarter. New vehicle registrations increased on an annual basis by 25.0 percent, while second hand vehicle registrations declined by 7.8 percent in the same period.⁴ In addition, commercial banks' new lending for consumption purposes grew by 9.2 percent (to \$210.0m) cumulative to March. The growth was mainly due to increased new

lending to the wholesale, retail, hotels & restaurants (24.1%) sector which offset a contraction for the private individuals (-27.2%) sector. In contrast, net Value Added Tax (VAT) collections, a key source of Government revenue, declined on an annual basis by 8.1 percent (to \$115.2m) as domestic VAT receipts contracted by 33.0 percent in the year to February (Graph 11). This decline was generally base related due to the higher VAT rate reflected in the January 2016 collections.

Consumption activity continues to be supported by improved labour market conditions, stable household earnings and inward remittances. Pay as You Earn collections, a partial indicator of household income, rose on an annual basis by 11.3 percent (to \$30.7m) in the year to February 2017, while inward remittances increased by 5.7 percent (to \$77.8m) in the same period.

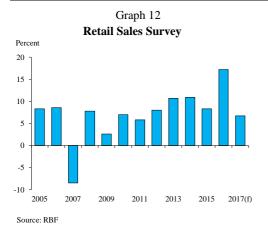

Source: Fiji Revenue & Customs Authority

Retail Sales Survey (RSS)

Retail sales grew by an all-time high of 17.2 percent in 2016 as per the RBF's December 2016 RSS, much higher than the 8.3 percent growth recorded in 2015 and reflected the impact of natural disasters in 2016 (Graph 12).

⁴ The movement in vehicle registrations are underpinned by the policy changes on the duty rates as announced in the 2016-2017 National Budget. Effective from 1 January 2017, second hand hybrid vehicles attract specific duties in the range of \$2,000-\$6,500 depending on the engine size while all new hybrid vehicles continue to attract zero duty.

The categories underpinning this growth included building materials & hardware; household goods & appliances; motor cars & other transport equipment; food, drinks & tobacco; entertainment; others/mixed; restaurants; clothing & textiles and pharmaceuticals & chemicals.

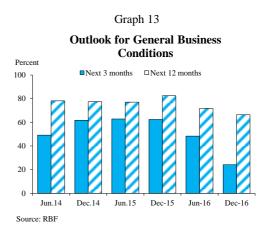

In 2017, retail sales are expected to grow further by 6.7 percent, driven by higher purchases of intermediate, consumption and investment goods.

Business Expectations Survey (BES)

According to the RBF's December 2016 BES, the overall business outlook is expected to remain generally optimistic despite weaker sentiments in both the short and medium terms. Measured by the net⁵ percentage of respondents, sentiments on business conditions over the next 3 months declined to 24.1 percent from 48.4 percent in June 2016 (Graph 13).

Similarly, business sentiments for the medium-term are expected to be slightly

lower at net 66.3 percent when compared to the June 2016 survey results.

Business expectations are generally in line with the current state and outlook for the economy as it continues to recover from the negative impact of TC Winston, the Tropical Depression (TD) 04F and the flooding in late 2016 and early 2017.

In line with this, investment, production plans and domestic sales are also expected to soften but remain positive over the next 3 and 12 months. Despite this, full-time recruitment intentions have strengthened largely backed by the services sector.

In terms of input costs such as wages and price of raw materials, expectations signal a higher cost of doing business over the medium-term. Notwithstanding these expectations for higher costs, inflationary pressures are expected to remain in the low to medium range with most firms anticipating inflation to be between 1.0-3.0 percent. With respect to interest rates, firms envisage a pick-up in lending and deposit rates in the next 12 months.

Investment

Investment levels remained positive in the first quarter of 2017, indicated by

 $^{^{5}}$ Net is the difference between percentage of respondents expecting an "increase" and the percentage expecting a "decrease". The net provides the general direction of change in sentiments.

continued construction activity. Cumulative to March, domestic cement sales, a direct input into construction works, grew on an annual basis by 37.3 percent. In addition, total value of work put-in-place rose by 10.1 percent (to \$513.9m) in 2016.

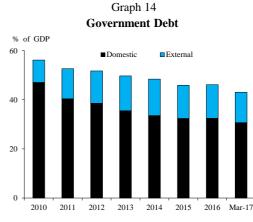

However, in the year to March, commercial banks' new investment lending noted a turnaround of 65.7 percent (to \$155.4m), underpinned by increased credit to the real estate (104.9%) and building & construction (37.1%) sectors.

Import payments for investment related goods based on the OELT report grew by 8.2 percent to \$197.3 million cumulative to March.

The current investment trend is in line with the positive business sentiments as per the December 2016 BES for investments in plant & machinery and buildings in the medium-term.

Public Finance

In the first quarter of 2017, total Government debt stood at \$4,521.0 million, equivalent to 43.1 percent of GDP^6 . In terms of the composition of domestic deht Government debt. accounted for \$3,216.6 million (30.7% of GDP) while external debt totalled \$1.304.3 million (12.4% of GDP). Compared to December 2016, the stock of total Government debt declined by 0.6 percent led by lower external borrowing (Graph 14). Total Government debt for the 2017/2018 fiscal year is anticipated to be around 51.3 percent of GDP.

Labour Market

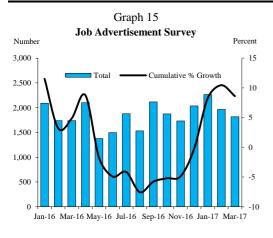

Favourable conditions in the labour market continue into 2017. In the year to March, the RBF's Job Advertisement Survey⁷ revealed an increase in the number of vacant job positions advertised by 7.2 percent to 6,045 vacancies, compared to the 2.1 percent growth in the December quarter (Graph 14). Higher recruitment intentions were noted in the community, social & personal services; trade, restaurants & hotels; transport, storage & communication; mining & quarrying and electricity & water sectors.

The completion of new projects⁸ and seasonal employment are expected to raise further demand for additional jobs in the year consistent with the overall favourable economic prospects.

⁷ This is based on both Fiji Times and Fiji Sun advertised positions.

⁸ In April, the opening of the Marriot Resort in Momi Bay, Tappoo City Complex in Lautoka and the opening of the New World Supermarket at the new FNPF Plaza is expected to create additional employment.

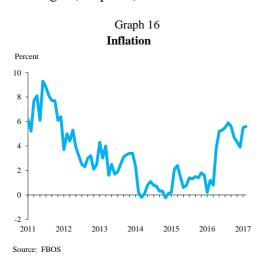

⁶ GDP refers to Gross Domestic Product.

Sources: The Fiji Times and Fiji Sun

Inflation

In March, inflation rose to 5.6 percent from 3.9 percent in December 2016. The increase was mainly driven by higher prices for alcoholic beverages, tobacco & narcotics: furnishings, household. equipment & routine household maintenance: clothing & footwear: transport and food & non-alcoholic beverages (Graph 16).

Imported inflation rose to 1.1 percent, mainly due to the higher prices in the communication; alcoholic beverages, tobacco & narcotics; clothing & footwear and food & non-alcoholic beverages categories. However, overall inflation continues to be driven by domestic factors, which contributed 5.3 percentage points towards headline inflation.

Inflationary pressures in 2017 remain largely underpinned by supply shortages of market items in particular yaqona for which prices have remained significantly high. Given these factors, the year-end inflation forecast has been revised upwards to 3.0 percent from an earlier forecast of 2.5 percent. Key downside risks to this outlook are a sharp increase in commodity prices and further adverse weather conditions.

External Sector

The merchandise trade deficit⁹ (excluding aircraft) grew on an annual basis by 11.1 percent to \$2,902.6 million in 2016, compared to a 1.4 percent growth in 2015.

Total exports (excluding aircraft) fell by 5.5 percent in the same period, compared to a decline of 10.6 percent in 2015, mainly due to decreases in timber (-31.5%), sugar (-20.3%), molasses (-69.9%) and garments (-7.1%), which more than offset the growth in the export of gold, mineral water, yaqona, footwear, coconut oil and fruits and vegetables.

Total imports (excluding aircraft) rose by 3.8 percent in 2016 following a decline of 4.2 percent in 2015 driven by higher imports of investment goods (19.7%) and consumption goods (5.8%), which more than offset the decline in imports of intermediate goods (-22.9%) attributed to lower mineral fuel imports.

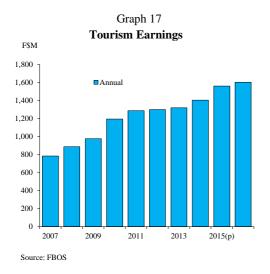

In the March quarter, OELT data showed

⁹ Provisional trade data released by the Fiji Bureau of Statistics (FBOS).

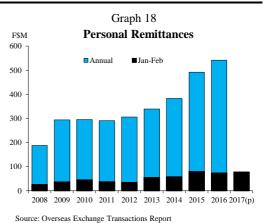

that total exports of sugar, fish, mineral water, gold and timber fell on an annual basis by 16.9 percent compared to a 31.0 percent growth in the December quarter.

In the same period, OELT payments for imports of mineral fuel, machinery & electrical equipment, transport and food rose by 24.4 percent compared to an increase of 27.9 percent in the December 2016 quarter.

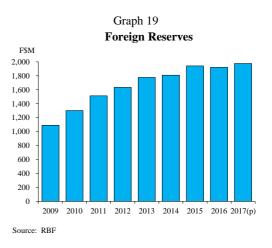

Tourism receipts rose by 2.7 percent to \$1,602.9 million in 2016, compared to a higher growth of 11.1 percent in 2015 (Graph 17). Major contributors to this earnings are Australia, US, New Zealand and the Pacific Islands.

In the first two months of 2017, inward remittances rose by 5.7 percent to \$77.8 million, compared to a 7.2 percent decline in the same period last year. This was attributed to growth in personal receipts, gifts, maintenance & donations and immigrant transfers (Graph 18).

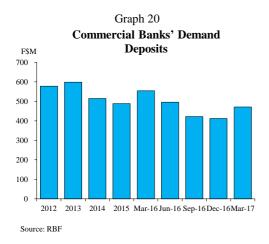

Foreign reserves (RBF Holdings) were at \$1,978.0 million at the end of March, sufficient to cover 5.3 MORI of goods and non-factor services (Graph 19).

Domestic Financial Conditions

In the March quarter, the RBF continued with an accommodative monetary policy stance, keeping the OPR unchanged at 0.5 percent. Generally low interest rates, adequate bank liquidity and favourable business sentiments continued to support economic activity (Graph 20). Total liquidity in the banking system, measured by commercial banks' demand deposits, grew over the March quarter by 14.2 percent (\$58.4m) to \$470.8 million, attributed to an increase in foreign reserves (\$55.1m) and statutory reserve deposits (\$42.6m) which offset the decline in currency in circulation (\$52.7m).

In mid-January however, liquidity was below \$400.0 million, resulting in a few interbank market transactions worth \$65.0 million.

Money Markets

Treasury bills were oversubscribed by \$27.0 million in the March quarter. A total of \$35.0 million was accepted with maturities between 14-245 days and yields ranging from 0.50-3.30 percent.

The Bond Market

In the March quarter, the sale of Fiji Government bonds was oversubscribed by \$30.2 million. A total of \$58.0 million was accepted for maturities between 10-15 years and yields of 6.56-7.07 percent.

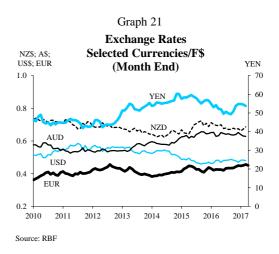

Additionally, the issues of promissory

notes were also oversubscribed by \$10.0 million, with a total of \$10.0 million accepted for maturities of 301-350 days with yields ranging from 4.20-4.30 percent.

Similarly, statutory body bonds were also oversubscribed. A total of \$6.0 million was accepted with a maturity of 3 years and a yield of 4.60 percent.

Foreign Exchange Markets

Over the March quarter, the Fijian dollar appreciated against the US dollar (2.4%), New Zealand dollar (1.6%) and the Euro (0.6%) but weakened against the Australian dollar (-3.6%) and the Japanese Yen (-1.7%) (Graph 21).

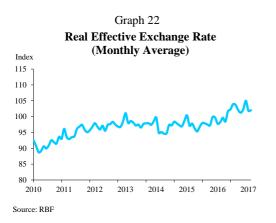

The Nominal Effective Exchange Rate $(NEER)^{10}$ index rose slightly by 0.1 percent in the March quarter, reflecting a marginal appreciation of the Fijian dollar

¹⁰ The NEER is the sum of the indices of each trading partner country's currency against the Fijian dollar, adjusted by their respective weights in the basket. This index measures the overall movement of the Fijian dollar against the basket of currencies. An increase in this index indicates a slight appreciation of the Fijian dollar against the basket of currencies and vice versa.

against its major trading partner currencies.

In contrast, the Real Effective Exchange Rate $(REER)^{11}$ index depreciated by 0.3 percent during the March quarter owing to the decline in relative prices (Graph 22).

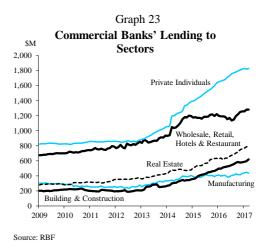

Financial Intermediaries

The annual growth in broad money (M3)¹² slowed further to 2.8 percent (\$208.3m) in March from 4.7 percent (\$341.7m) in December, underpinned by the decline in net foreign assets of 9.2 percent (-\$172.3m) in the same period, compared to an increase of 3.0 percent (\$53.9m) in December 2016.

In contrast, the annual growth in net domestic assets was higher in March (6.6%) compared to December (5.2%). Growth in net domestic assets continued to be driven by net domestic credit, which

grew by 9.1 percent (\$594.8m) in March from 7.4 percent (\$485.0m) in December. Private sector credit rose by 14.0 percent (\$855.4m) to total \$6,946.8 million in March. On the liability side, the growth in M3 was underpinned by a rise in narrow money (2.3%) and other deposits (4.3%). The expansion in narrow money was attributed to the growth in transferable deposits (2.7%).

In March, **commercial banks' outstanding loans** rose on an annual basis by 9.7 percent (\$535.7m) to total \$6,086.2 million, slightly higher than the growth of 9.2 percent (\$506.6m) in December 2016 (Graph 23). This outturn was attributed to an increase in lending to the real estate (26.5%); building & construction (21.0%); manufacturing (7.7%); wholesale, retail, hotels & restaurants (7.4%); non-bank financial institutions (4.5%) and mining & quarrying (4.4%) sectors.

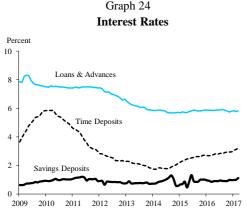

Similarly, **new lending by commercial banks** also rose on an annual basis by 11.4 percent in March from a growth of 6.2 percent in December. This growth was largely driven by central, local government & statutory bodies (642.6%); real estate (104.9%); mining & quarrying (96.1%); building &

¹¹ The REER index is the sum of each component of the NEER index, adjusted by the relative price differential between Fiji and each of Fiji's major trading partners. The index measures the competitiveness of the Fijian dollar against the basket of currencies. A decline in REER index indicates an improvement in Fiji's international competitiveness.

 $^{^{12}}$ M3 = M1 (Currency in Circulation + Transferable Deposits) + Other Deposits + Securities other than Shares.

construction (37.1%); wholesale, retail, hotels & restaurants (24.1%) and agriculture (12.8%) sectors.

The commercial banks' interest rates spread narrowed in March to 2.63 percent from 2.85 percent in December as higher increase in time deposit rates more than offset the marginal pick-up outstanding lending rates. In the in March quarter, the weighted average outstanding lending rates increased to 5.82 percent while the new lending rate fell to 5.50 percent. In contrast, both the existing time deposit and new time deposit rates increased in the same period. The existing time deposit rate rose to 3.19 percent from 2.95 percent and the new time deposit rate rose to 3.46 percent from 2.80 percent in December 2016 (Graph 24).

Banking Industry Quarterly Condition Report – December 2016

Overview – Commercial Banks

The overall performance of the commercial banks was assessed as satisfactory based on satisfactory capital, earnings, asset quality, and a marginal liquidity position.

Balance Sheet

Commercial banks' total assets grew by 2.7 percent (or \$228.8m) over the quarter to \$8.8 billion, while the annual growth was recorded at 3.2 percent (or \$274.1m). Increases in loans & advances (\$213.0), deposits with banks & at call (\$65.7m), cash (\$30.9m) and statutory reserve deposits (\$16.6m) contributed to the quarterly growth, however these were partially offset by the decreases of \$9.3 million and \$57.1 million in banks' exchange settlement account balances and investments, respectively (Graph 24).

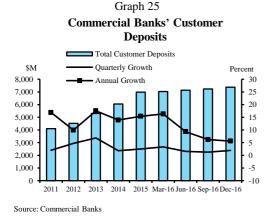

As at 31 December 2016, commercial banks' gross assets represented 44.9 percent of the financial system gross assets of \$19.6 billion.

Balance Sheet Funding

Commercial banks' total deposits stood at \$7.4 billion, increasing by 1.9 percent (or \$138.5m) over the quarter, and 5.6 percent (or \$391.4m) over the year (Graph 25).

All deposit categories increased during the quarter, with term deposits recording the largest growth of \$95.9 million to \$2.5 billion, attributed to placements of deposits by non bank financial institutions, private sector business entities and private individuals. Similarly, demand deposits grew by \$39.8 million to \$4.5 billion, underpinned by inflows from non bank financial institutions, public enterprises and private individuals.

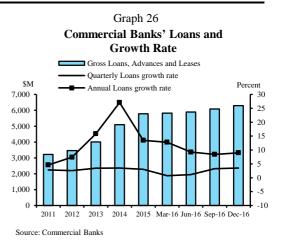

Non bank financial institutions and private individuals also contributed to the increase of \$2.8 million in savings deposits to \$303.2 million.

In terms of composition, demand deposits continued to dominate at 61.3 percent, followed by time and savings deposits at 34.5 percent and 4.1 percent, respectively.

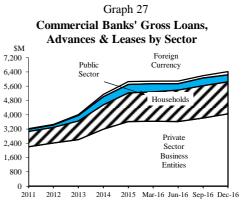

Financial Intermediation

Commercial bank's lending continued to grow during the review quarter by 3.5 percent (or \$213.0m) to \$6.3 billion (Graph 26). A greater increase of 9.0 percent was recorded from the 31 December 2015 level.

Loans & advances represented 71.8 percent of the banks' total assets of \$8.8 billion as at 31 December 2016.

Lending to the private sector continued to grow during the quarter (Graph 27). Private sector business entities' gross loans grew by \$236.7 million to \$4.0 billion, mainly in the real estate, and wholesale, retail, hotels & restaurant sectors.

Source: Commercial Banks

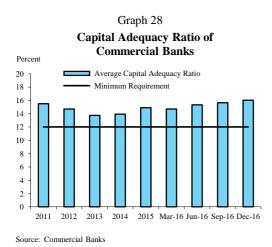

Similarly, loans to private individuals grew by \$39.3 million to \$1.8 billion. Housing loans increased by \$38.4 million to \$1.3 billion, with first home ownership and investment home loans increasing by \$24.3 million and \$14.1 million. personal respectively. Loans for transportation also increased by \$8.0 million to \$139.1 million, while personal loans for other purposes decreased by \$7.0 million to \$417.5 million.

A total of \$661.8 million of new loans & comprising 29.040 leases. of disbursements were recorded for the review quarter, compared 33.005 to disbursements amounting to \$719.6 million reported in the previous quarter. Majority of the new loans were to existing customers at 79.3 percent, with 19.8 percent extended to new customers.

The large¹³ credit exposures of the commercial banks aggregated to \$1.3 billion as at 31 December 2016. These represented 20.1 percent of commercial banks' gross loans, and 138.3 percent of banks' local capital of \$913.6 million.

Capital Adequacy

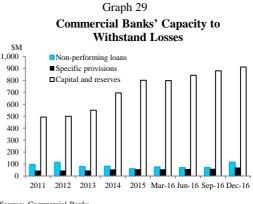

Commercial banks' capital adequacy ratio continued to be assessed as satisfactory, and stood at 16.0 percent as at 31 December 2016 (Graph 28). All the commercial banks complied with the minimum capital adequacy requirements during the review quarter.

¹³ Large credit exposures consist of individual bank's top 15 loans (by gross value).

Total capital increased over the quarter by 3.8 percent to \$912.7 million, emanating from profits earned and retained by the commercial banks. Total risk weighted assets on the other hand, increased by 2.2 percent to \$5.7 billion.

Commercial banks' non performing loans less specific provisions¹⁴ to capital ratio increased to 5.2 percent (30 September 2016: 1.5 percent), following a greater increase in classified exposures when compared to the increases in capital and provision levels (Graph 29).

Source: Commercial Banks

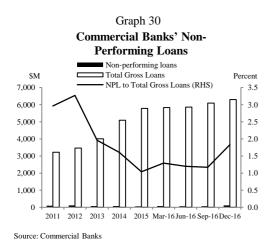

Asset Quality

Commercial banks' asset quality continued to be assessed as satisfactory. Classified exposures to gross loans ratio was recorded at 1.8 percent (30 September 2016: 1.2%), while specific provisions to classified exposures and general reserves for credit losses (GRCL) to net loans ratios stood at 58.6 percent and 1.0 percent, respectively (Graph 30).

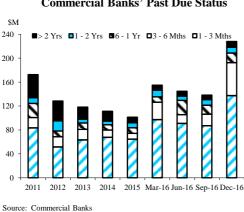

Classified exposures increased, for the second consecutive quarter, by 62.1 percent (or \$44.2m) to \$115.4 million. This emanated from all categories with

¹⁴ Includes individually assessed provisions (IAP) and collectively assessed provisions (CAP).

substandard exposures recording the largest growth of \$40.2 million, followed by loss and doubtful loans growing by \$3.5 million and \$0.5 million, respectively.

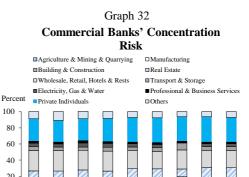

Commercial banks' total past due loans increased by \$89.6 million to \$227.9 million as at 31 December 2016 (Graph 31). During the quarter, exposures in the "one to three months" time band increased by \$50.3 million, attributed to the growth in substandard loans. This was followed by the increase of \$36.0 million in the "three to six months" time bands, reflective of ageing non performing loans.

Graph 31 Commercial Banks' Past Due Status

Specific provisions increased by \$9.7 million to \$67.6 million, in line with the increase in classified exposures, while GRCL decreased by \$1.3 million to \$64.5 million.

In terms of concentration, loans to private sector business entities represented 64.3 percent of the commercial banks' gross loans of \$6.3 billion, while households made up 28.5 percent as at 31 December 2016. The consolidated agriculture and renewable energy loan ratios stood at 3.6 percent and 3.1 percent of deposits and similar liabilities (Graph 32).

2012 2013 2014

0

Earnings and Interest Spread

The commercial banks' overall earnings performance continued to be assessed as satisfactory, as net profit before tax of \$51.2 million was reported for the review quarter. This however, decreased from \$57.2 million earned during the previous quarter, amidst a greater increase in provisions for bad debts, when compared to the increase in operating income (Table 1).

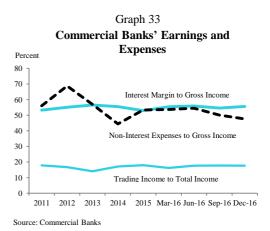

Operating income grew over the quarter to \$121.6 million, attributed to the increase of \$2.0 million in net interest income. This was however offset by the decrease of \$0.6 million in non interest income, somewhat reflective of the decrease in fee income underpinned by the lower number and volume of new loan disbursements. Operating expenses also decreased by \$2.3 million to \$57.9 million, attributed to the decrease in depreciation & amortisation.

Bad debt & provisions increased by \$9.8 million to \$12.5 million underpinned by the increase in write offs of \$1.0 million, coupled with the \$8.4 million increase in loan loss provisions that emanated from the growth in non performing loans.

As at 31 December 2016, interest margin to gross income and trading income to and 17.6 percent, respectively (Graph 33). Similarly, commercial banks' efficiency ratio, improved to 47.6 percent (30 September 2016: 50.1%).

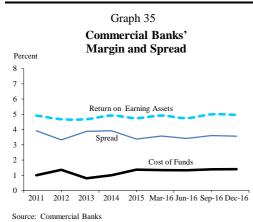

Commercial banks' annualised return of assets (ROA) and return on equity (ROE) decreased over the quarter to 2.4 percent 17.8 percent, respectively and (30)September 2016: ROA 2.7% & ROE 20.5%) (Graph 34).

The combined interest spread for commercial banks stood at 3.6 percent (Graph 35).

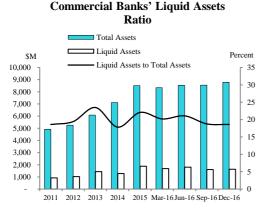

total income ratios stood at 55.6 percent

Liquidity

Commercial banks' liquidity continued to be assessed as marginal. As at 31 December 2016, liquid assets¹⁵ increased by 1.9 percent (or \$30.1m) to \$1.6 billion (Graph 36), attributed to the increases in deposits with banks & at call, and cash on hand.

Graph 36

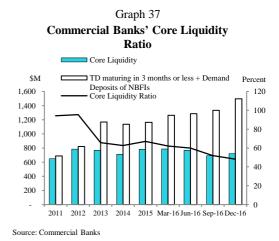

Source: Commercial Banks

The banking industry's liquidity level continued to be assessed as adequate to meet obligations as they fall due, in view of the liquid assets to total assets and total deposits of 18.6 percent and 22.2 percent, respectively; and the individual institution's liquidity management and contingency funding plans in place.

The commercial banks' $core^{16}$ liquidity ratio declined over the quarter to 48.2 percent from 51.9 percent, attributed to an increase in short term liabilities (Graph 37).

Commercial banks' large¹⁷ depositors reported a holding of \$1.9 billion as at 31 December 2016, and represented 26.6 percent of total deposits.

Overview – Credit Institutions

The overall performance of credit institutions continued to be assessed as marginal in the December 2016 quarter based on marginal liquidity and poor asset

¹⁵ Liquid assets include cash on hand, demand balances at RBF, demand and term balances due from corresponding foreign banks and holding of Government and Quasi Government debt securities.

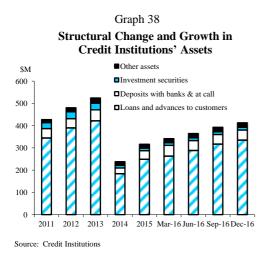

¹⁶ Core liquidity includes cash on hand, demand balances at RBF and demand balances due from corresponding foreign banks. Core liquidity ratio is the ratio of core liquidity to term deposits maturing in three months or less plus demand deposits of non- bank financial institutions.

¹⁷ Large deposits consist of individual bank's top 15 deposits (by value).

quality despite their strong capital position and satisfactory earnings level.

Balance Sheet

Credit institutions' total assets grew by 5.2 percent (or \$20.4m) over the quarter to \$413.2 million. The increase in assets was more pronounced in loans & advances and deposits with banks (Graph 38). Annual growth was recorded at 30.7 percent (or \$97.0m).

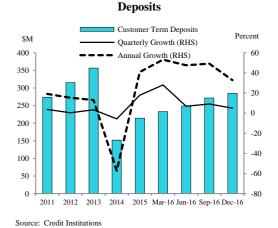

The share of credit institutions' total gross assets relative to the financial system was 2.0 percent as at 31 December 2016.

Balance Sheet Funding

Total deposits of the credit institutions increased by 4.9 percent (or \$13.4m) over the quarter to \$284.8 million, attributed to placements by public enterprises (\$11.0m), non bank financial institutions (\$4.7m) and private individuals (\$3.5m), which were offset by private sector business entities' withdrawals of \$5.8 million (Graph 39).

Graph 39

March 2017

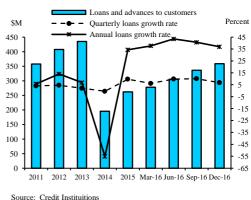

Credit Institutions' Customer Term

Financial Intermediation

Credit institutions' gross loans & advances increased by 6.8 percent (or \$22.7m) over the quarter to \$358.8 million (Graph 40). As at 31 December 2016, these represented 86.8 percent of the industry's total resources of \$413.2 million.

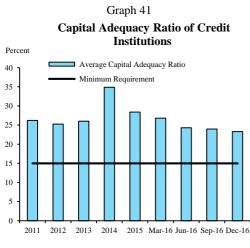

Lending to private individuals increased over the quarter by \$6.4 million to \$99.3

million, underpinned by the growth in the "others" sector (\$5.4m) and personal transportation (\$0.9m) purposes.

Large credit exposures stood at \$32.1 million as at 31 December 2016. These exposures represented 9.0 percent of credit institutions' gross loans and 38.8 percent of local capital.

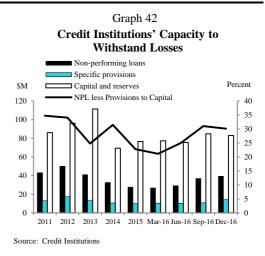

Capital Adequacy

Credit institutions' capital adequacy ratio continued to be assessed as strong, and stood at 23.0 percent as at 31 December 2016 (30 September 2016: 24.0%). All credit institutions maintained their capital adequacy ratios above the prudential minimum of 15.0 percent (Graph 41).

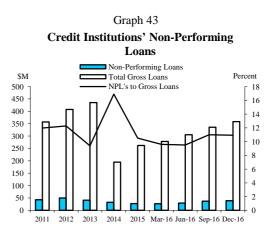

Source: Credit Institutions

Credit institutions' non performing loans less provisions to capital ratio decreased to 30.1 percent from 35.5 percent recorded in the previous quarter (Graph 42).

Asset Quality

Credit institutions' asset quality was assessed as poor, as classified exposures to gross loans ratio stood at 10.9 percent (Graph 43). Non performing loans however, decreased over the quarter by 0.6 percent to \$39.2 million, mainly in the substandard category.

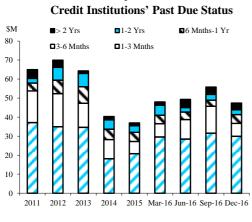

Source: Credit Institutions

Specific provisions coverage of classified exposures was at 36.3 percent, while

GRCL represented 1.2 percent of net loans.

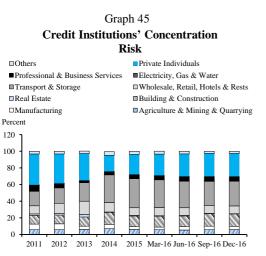

Past due levels decreased by \$13.3 million over the quarter to \$47.4 million. All categories recorded decreases except the "six months to one year" time band (Graph 44).

Graph 44

Source: Credit Institutions

The transport & storage sector made up the majority of the credit institutions' gross loans at 29.7 percent, followed by private individuals (27.7%), building & construction (14.7%) and wholesale, retail, hotels & restaurant (9.4%) (Graph 45).

Source: Credit Institutions

Earnings and Interest Spread

The earnings performance of credit institutions was assessed as satisfactory, with a reported net profit before tax of \$3.2 million, however a decrease from \$5.7 million recorded in the September 2016 quarter, due to an increase in bad debts & provisions (31 December 2015: \$5.0m) (Table 2).

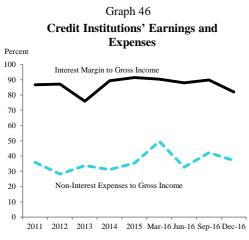

Net interest income of the industry marginally increased over the quarter by \$0.7 million to \$10.7 million, as a result of a greater increase in interest income compared to the increase in interest expenses. Non interest income, on the other hand, decreased by \$0.2 million to \$0.9 million.

Operating expenses decreased by \$0.4 million to \$4.3 million, and with the increase of \$0.5 million in operating income, resulted in the improvement in the efficiency ratio to 37.1 percent (30 September 2016: 42.2%).

and liquidity undertaking by their head offices.

Insurance Industry Quarterly Condition Report – December 2016

Overview

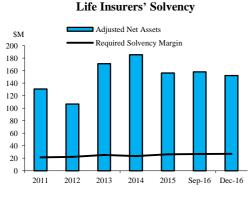

The overall performance of the insurance sector continued to be assessed as satisfactory for the 31 December 2016 quarter, based on the sector's strong solvency position, and satisfactory liquidity, earnings and reinsurance levels.

Life Insurers

Capital

The combined solvency surplus position of life insurers decreased by 4.7 percent (or \$6.2m) over the quarter to \$125.2 million. This was underpinned by a greater increase in admissible liabilities in comparison to increases in admissible assets. The solvency surplus was 4.7 times above the mandated levels and continued to be assessed as strong (Graph 50).

Graph 50

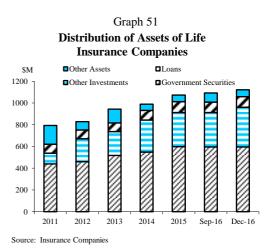

Source: Insurance Companies

Assets

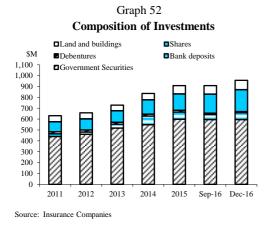

Total assets of the life insurance sector grew by 2.7 percent (or \$30.4m) over the quarter and stood at \$1,141.1 million (31 December 2015: \$1,090.7m) underpinned by an increase in investments. Cash on hand declined by \$20.8 million over the quarter as these were used for further investments.

Total investments of the life insurance sector stood at \$961.1 million increasing by 5.3 percent (or \$48.7m) as at 31 December 2016 largely due to asset value appreciation²⁰ and increase in bank deposits (Graph 51).

The composition of investments of the life insurance sector remained largely unchanged with Government securities comprising 62.0 percent, followed by shares at 21.0 percent, land & buildings at 8.8 percent and bank deposits at 6.6 percent (Graph 52).

²⁰ Increase in shares in related persons and land & buildings.

Liabilities

Total liabilities of the life insurance sector increased over the 31 December 2016 quarter by 3.6 percent (or \$37.2m) to \$1,065.7 million attributed to the balance of the revenue account.

The balance of the revenue account which constitute 95.9 percent of total liabilities grew by 3.0 percent (or \$29.8m) to \$1,022.2 million, reflective of the transfer of after tax revenue surplus and expansion in policyholder liabilities.

The increase in total liabilities was supplemented by an increase of \$7.0 million in provisions for dividends, which was somewhat offset by the decrease of \$1.6 million in provisions for taxation.

Earnings

The life insurance sector recorded an after tax profit of \$14.4 million (December 2015: \$12.0m), a turnaround from an after tax loss of \$0.4 million recorded in the September 2016 quarter.

Total income stood at \$78.4 million increasing by 124.6 percent (or \$43.5m) over the quarter (31 December 2015:

\$64.9m), attributed to asset value appreciation by \$42.8 million. This was partially offset by a decline of \$1.2 million in dividend income.

Total outgoings also increased over the quarter by 84.6 percent (or \$30.0m) to \$65.6 million led by the increases of \$15.6 million and \$11.9 million in policy liabilities and net policy payments, respectively. Net policy payments continued to dominate total outgoings at 52.4 percent followed by policyholder liabilities at 30.2 percent.

Liquidity

The life insurance sector's liquidity position declined slightly over the quarter by 0.5 percent (or \$3.5m) to \$694.8 million.

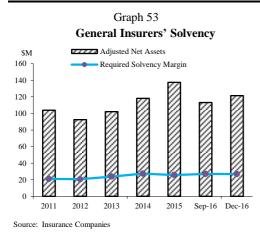

The liquidity ratio which measures the ability of life insurers to meet both outstanding claims and all policyholder liabilities fell to 67.3 percent from 69.7 percent in the prior quarter. The coverage of liquid assets to policy liabilities was still assessed as satisfactory.

General Insurers

Capital

All general insurers complied with the statutory solvency requirement reporting a solvency surplus of \$94.6 million which was 3.5 times higher than the required solvency margin of \$26.8 million. The capital position was assessed as strong (Graph 53).

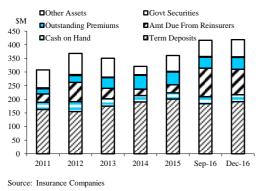

The growth has been attributed to an increase of \$8.3 million in net adjusted assets to \$121.3 million, resulting from an increase in total admissible assets.

Assets

General insurers' total assets increased slightly over the quarter by 0.6 percent (or \$2.6m) to \$419.0 million (31 December 2015: \$354.2m). This was underpinned by the increases in bank deposits, deferred reinsurance expenses and outstanding premiums by \$8.2 million, \$4.4 million and \$3.4 million, respectively (Graph 54).

The growth in total assets was offset by a decline of \$11.3 million in amounts due from reinsurers on outstanding claims.

Bank deposits continued to account for the

largest component of general insurers' assets at 45.8 percent followed by amounts due from reinsurers on outstanding claims at 22.3 percent, outstanding premiums and cash on hand at 10.5 percent and 5.9 percent, respectively.

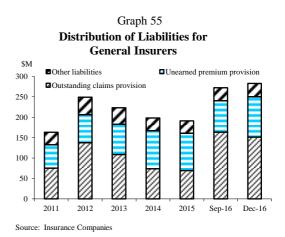

The general insurance sector's total assets represented 2.1 percent of the gross assets of the financial system²¹ as at 31 December 2016.

Reinsurance

Reinsurance premiums ceded during the quarter increased by \$2.0 million to \$13.0 million under both treaty and facultative reinsurance arrangements (31 December 2015: \$6.5m).

Liabilities

Total liabilities increased over the quarter by 1.1 percent (or \$3.2 million) to \$285.9 million (31 December 2015: \$190.9m), underpinned by increases in other provisions by \$1.7 million, underwriting provisions by \$0.9 million and other liabilities by \$0.6 million (Graph 55).

²¹ The size of Fiji's financial system stood at \$20.0 billion as at 31 December 2016.

Other provisions increased as a result of increases in provision for doubtful debts by \$1.9 million to \$3.9 million.

Underwriting provisions increased over the quarter to \$245.0 million as a result of increases in unearned premium provisions by \$11.7 million to \$88.4 million and claims administration expense provision by \$1.2 million to \$4.6 million.

The increase in underwriting provisions however, was partially subdued by the reduction in outstanding claims provision by \$12.0 million to \$151.5 million, with a notable reduction in reported claims provision of \$14.8 million as outstanding claims were settled.

Outstanding claims provisions accounted for majority of the general insurers' actuarial liabilities at 53.0 percent followed by unearned premium provisions at 30.9 percent.

Earnings

The general insurance sector reported an after tax loss of \$0.4 million for the quarter under review, a much improved performance compared to a loss of \$4.3 million in the previous quarter.

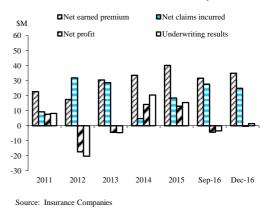

Underwriting results increased to \$1.4 million compared to a loss of \$3.5 million reported in the previous quarter, largely attributed to an increase in net earned premiums coupled with a reduction in net claims incurred.

Net earned premiums for the 31 December 2016 quarter stood at \$34.9 million noting an increase of 10.3 percent (or \$3.2m) over the quarter. This was attributed to a greater increase in gross premium income compared to increase in reinsurance outwards.

Net claims incurred on the other hand reduced by 10.3 percent (\$2.9m) to \$24.9 million (Graph 56).

Despite the above movement, the general insurers reported a loss for the review quarter resulting from a combination of increased underwriting expenses and nonunderwriting expenses and decline in nonunderwriting income.

The sector's net loss ratio²² improved over the quarter and stood at 71.3 percent compared to 87.7 percent in the prior quarter while the underwriting expense ratio²³ deteriorated slightly over the quarter to 24.8 percent from 23.5 percent, due to the increase in underwriting expenses.

Overall, the combined ratio²⁴ for the general insurance sector improved to 96.1 percent from 111.1 percent, reflective of the recoveries noted in key indicators. While the earnings position has improved

²² Net Loss Ratio - net claims incurred as a percentage of net earned premiums.

²³ Underwriting ratio - underwriting expenses as a percentage of net earned premiums.²⁴ Combined ratio - net loss ratio plus underwriting

expense ratio.

over the quarter, general insurers was still assessed as marginal.

Liquidity

The liquidity²⁵ position of the general insurance sector improved by 3.3 percent (or \$6.9m) to \$218.9 million as bank deposit holdings increased with lower claims incurred in the quarter under review.

Insurance Brokers

Earnings

The after tax profit reported by the insurance broking sector for the 31 December 2016 quarter stood at \$1.6 million lower than the \$2.1 million recorded in the previous quarter (31 December 2015: \$1.6m), attributed to the greater increase in revenue in comparison to the increase in expenses over the 31 December 2016 quarter.

Total revenue for the 31 December 2016 quarter increased by 17.2 percent (or \$0.9m) to \$6.3 million (31 December 2015: \$5.9m), underpinned by the earned increase in brokerage as Total revenue comprised commission. earned 93.6 percent brokerage as commission.

Total expenses grew by 47.5 percent (or \$1.4m) to \$4.3 million attributed to the increase in 'other expenses' by \$1.4 million to \$2.6 million.

Insurance Broking Account

Total monies withdrawn outweighed the increase in total monies received leading to a decline in the balance of the insurance broking account by \$0.7 million to \$9.6 million in the December 2016 quarter.

Total monies received stood at \$50.0 million increasing by 7.8 percent (or \$3.6m) as greater premiums were received from both local and offshore insurers compared to the previous quarter. Premiums received from local insurers constitute majority of monies received at 75.4 percent.

Total monies withdrawn also increased by 18.1 percent (or \$7.8m) to \$50.7 million due to an increase in payments to both local and offshore insurers. Payments made to local insurers accounted for majority of total monies withdrawn at 60.7 percent.

Offshore Placements

341 offshore applications worth \$8.8 million in premiums were approved in the last quarter of 2016, compared to 419 applications worth \$10.3 million approved in the prior quarter (Table 3).

There was a decline in offshore placements for all classes of insurance except for the material damage and political violence classes. Material damage continued to account for the largest share of premiums remitted at 76.8 percent.

²⁵ Liquid assets include cash on hand, Government securities and bank deposits.

CapitalMarketsQuarterlyPerformanceReport – December 2016

The capital markets industry reported improved results for the quarter under review.

The Stock Market

The stock market's key performance indicators of market capitalisation, number of shares traded, volume and value of shares traded, and the South Pacific Stock Exchange (SPSE) Total Return Index recorded increases over the quarter, while the buy and sell ratio indicated a growth in public demand for listed securities.

The market capitalisation²⁶ of listed securities increased further in the

December 2016 quarter by 3.4 percent to \$1,318.8 million. On an annual basis, market capitalisation grew by 22.8 percent from \$1,074.1 million (Graph 57).

The upward trend in market capitalisation was largely due to market heavyweight, Amalgamated Telecom Holdings Limited (ATH) trading at \$1.27 per share as at 31 December 2016, a 7.6 percent increase from its closing share price of \$1.18 as at 30 September 2016.

Increases were also noted in the share prices of six other listed securities, further contributing to the growth in market capitalisation.

Three of the 11 securities which recorded share price gains also declared/paid dividends/interest during the quarter, considered to have contributed to the increase in the corresponding securities' share prices, as investors sought to benefit from the tax-free return.

The top five listed securities in terms of market capitalisation accounted for 82.5 percent of the stock market. The securities' individual market share and movement over the quarter were as follows: -

- ATH (40.7%; +160 basis points (bp);
- Vision Investments Limited (VIL)

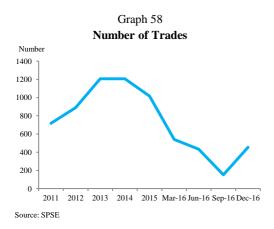

²⁶ Market capitalisation is calculated as the number of issued and paid up ordinary shares multiplied by the current share price.

(16.1%; -30 bp);

- Paradise Beverages (Fiji) Limited (PBF) (9.6%; -20 bp);
- FMF Foods Limited (FMF) (9.1%; -20 bp); and
- R B Patel Group Limited (RBG) (7.2%; -10 bp).

The SPSE Total Return Index (STRI)²⁷ increased over the quarter by 3.4 percent to 3,172.8, attributed to the increase in share prices of 11 listed securities relative to the price decrease of one listed security, and dividend declaration/payments that were made during the quarter under review.

Stock market activity in terms of the number of trades executed increased by 303 to 455 trades,²⁸ underpinned by Fijian Holding Limited's (FHL) market-based dividend reinvestment scheme that occurs during the June and December quarters following the declaration of dividend in the preceding quarters (Graph 58).

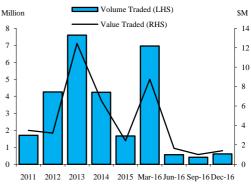

²⁷ The STRI is an aggregate market capitalisation index which reflects the aggregate market value of all its components relative to their aggregate value on the base day. The index is constructed on a base of 1,000 set at 4 January 2000.

FHL shares continued to be the most actively traded out of the 13 securities listed, representing 73.2 percent of the number of trades, followed by ATH and BSP Convertible Notes Limited (BCN) at 7.3 percent and 5.7 percent, respectively.

Similar to the trend in the number of trades, the volume of shares traded increased over the quarter from 0.4 million to 0.6 million, while the value of shares traded rose from \$1.0 million to \$1.4 million (Graph 59).

On an annual basis, trading activity increased by 118 trades, while the volume and value of shares traded increased by 0.1 million and \$0.6 million, respectively.

Source: SPSE

In terms of the bid-offer spread, FHL had the narrowest bid-offer margin of \$0.04 while PBF remained with the widest bidoffer margin of \$4.92, increasing from \$1.35 in the previous quarter.

The SPSE buy and sell ratio²⁹ as at 31 December 2016 was 1:0.6, indicating that

²⁸ Figures in graph are annual figures except for March, June, September and December 2016 which are for the quarter only.

²⁹ Ratio of unexecuted buy and sell orders for shares in the stock market indicating demand and supply for shares.

there are more buyers than sellers in the market.

The Unit Trust Market

The key performance indicators of the unit trust market of funds under management, investment portfolio, liquid assets, investment income, net profit and the number of unit holders, registered improvements over the quarter.

The number of unit holders increased over the quarter by 1,011 investors to 27,427, with individual investors accounting for 97.4 percent of new investors. In line with the growth in unit holders, the number of units held increased by 3.0 million to 207.8 million.

Individuals continued to dominate the unit trust market in terms of unit holders at 68.4 percent (30 September 2016: 67.0%), while charitable organisations and clubs continued to dominate the market in terms of number of units held at 46.1 percent (30 September 2016: 45.8%).

Balance Sheet

Funds under management (Net Asset Value) grew by 2.6 percent to \$226.5 million, relative to an increase of 0.2 percent in the preceding quarter, largely attributed to a 2.4 percent growth in unitholders' funds, as the unit trust funds continued to generate sales whilst redemptions remained low.

On an annual basis, funds under management increased by 10.7 percent from \$204.7 million.

Assets

Total assets recorded a 3.3 percent increase over the quarter to \$233.1

million, underpinned by increases in the investment portfolio (\$5.1m), cash on hand (\$1.3m) and accrued income (\$0.9m).

Investments

The combined investment portfolio of the two unit trusts expanded by 2.3 percent over the quarter to \$221.4 million, due to increases in the following investment categories: -

- cash and cash equivalents by \$2.5 million, indicative of increased holdings in term deposits by unit trusts;
- listed securities by \$2.2 million, attributed to acquisition of additional Communications (Fiji) Limited (CFM), FMF and VIL shares by one of the unit trusts, coupled with the appreciation in the price of ten of the 15 local listed securities held by the unit trusts; and
- money market securities by \$0.6 million underpinned by the increase in the value of Fiji Development Loan (FDL) bonds and Fiji Infrastructure Bonds (FIB).

However, a decline of \$0.2 million was noted in the value of unlisted securities, attributed to the revaluation of two listed securities.

On an annual basis, the unit trust industry's investment portfolio grew by 12.5 percent from \$196.8 million.

By composition, unlisted securities dominated the investment portfolio at 30.0 percent, followed by listed securities (27.5%), deposits held at financial institutions (17.8%), bonds (15.8%), loans and receivables (8.0%), and property (0.9%).

Liabilities

Total liabilities increased by 36.7 percent (or \$1.8m) to \$6.6 million, underpinned by an increase in distributions payable to unit holders while management fee payable and sundry creditors also increased.

Liquid Assets

Liquid assets stood at \$48.1 million as at 31 December 2016, registering an increase of 8.7 percent (\$3.8m) over the quarter and driven by increased holdings in term deposits. The value of repurchases for the quarter decreased from \$4.8 million to \$3.7 million. Accordingly, the liquid assets to unit repurchases ratio increased from 9.3 times to 13.2 times.

Earnings

The industry recorded a net profit of \$3.5 million compared to \$2.3 million in the September 2016 quarter, the result of a \$1.7 million growth in investment income, outweighing a \$0.5 million increase in investment expenses (Table 4).

| | Table 4 |

Source: Unit Trust Quarterly Returns

The increase in investment income resulted from the higher dividend and interest income recorded, while the uptick in investment expenses was attributed to the increase in management fees, in line with the increase in investment portfolio.

The Bond Market

An increase was noted in the value of outstanding long term bonds over the quarter, while there was no trading of bonds on the SPSE.

Total value of outstanding bonds increased by 0.3 percent to \$3,386.7 million (Graph 60), due to an additional bond issue of \$62.3 million (30 September 2016: \$31.0m) during the quarter which outweighed redemptions of \$52.2 million (30 September 2016: \$11.7m).

Sovernment bonds contin

Government bonds continued to move the fixed income market by a further issue of \$41.3 million in FIB bonds (\$39.1m) and Viti Bonds (\$2.3m). The FDL and FIB bonds recorded redemptions of \$21.6 million and \$2.1 million, respectively.

Other bond market movers were Fiji Development Bank (FDB) which issued an additional \$21.0 million of bonds and registered redemptions of \$27.5 million bonds.

Government bonds comprised 92.7

percent of the total outstanding bonds followed by statutory bonds: FDB at 4.1 percent, Housing Authority (HA) at 1.3 percent, FEA at 1.1 percent, and Fiji Sugar Corporation (FSC) at 0.8 percent.

MONETARY POLICY STANCE REMAINS UNCHANGED

Statement by the Governor of the Reserve Bank of Fiji, 26 January, 2017

The Reserve Bank of Fiji Board, at its monthly meeting on 26 January 2017, agreed to keep monetary policy unchanged by maintaining the Overnight Policy Rate at 0.5 percent, necessary to encourage investment and further strengthen growth in the economy.

The Governor and Chairman of the Board. Mr Barry Whiteside announced the board decision stating that, "the economy remains on а recovery path as reconstruction works continue following TC Winston and given the damage caused by the tropical depression in December on the kev sectors agriculture, for manufacturing, mining, construction and utilities. However, despite the setbacks from the natural disasters, consumption and investment activity have remained buoyant, signalled by positive trends in partial indicators. Supportive fiscal measures, accommodative monetary policy settings, together with inflows of remittances and tourist earnings and favourable labour market conditions, have boosted consumer spending and investor sentiments."

Mr Whiteside added that global economic conditions remain subdued underpinned by weaker outcomes in emerging markets and developing economies. Global growth for 2017 is expected to improve to 3.4 percent from a lower 3.1 percent estimated for last year, supported by an improved outlook for advanced economies. Notably, potential policy changes by the new United States administration and its impact across the globe represent the key downside risk to the current global growth outlook.

On the dual mandates of the RBF, inflationary pressures in 2016 largely emanated from domestic supply side factors following the natural disasters earlier in the year. However in December, inflation fell to 3.9 percent from 4.3 percent in November 2016. Inflation in the near term is expected to continue to domestically driven with be maior downside risks stemming from adverse weather conditions and a sharp increase in oil and food prices. For now, year-end inflation is projected at around 2.5 percent.

With the modest performance of Fiji's external sector, foreign reserves levels remain adequate, currently (25 January) at \$1,906.0 million, sufficient to cover 5.1 months of retained imports of goods and non-factor services.

The Governor highlighted that the Bank will continue to closely monitor the latest developments and risks to the global and domestic economic outlook and align monetary policy accordingly.

GENDER DIVERISTY ON BOARDS OF LISTED COMPANIES IN FIJI

Statement by the Governor of the Reserve Bank of Fiji, 3 February 2017

The Governor of the Reserve Bank of Fiji and the Chairman of the Capital Market Advisory and Development Taskforce, Mr Barry Whiteside, has made a call to action for higher participation and representation of women of merit on the boards of listed companies on the South Pacific Stock Exchange (SPSE).

Governor Whiteside stated that whilst there remains a few who are yet to be convinced, there is a general consensus that gender diversity based on merit needs to be seriously considered at the board or top management level. As such, the notion of gender diversity on boards of listed companies has become an integral indicator of corporate governance.

Currently. women hold less than 10 percent of board positions. Approximately 60 percent of the companies listed on the SPSE do not have a single woman as part of their boards. It is time that companies took action to break this glass ceiling and take advantage of this untapped pool of qualified board candidates. These statistics also highlight the need for talent development and investment in leadership taking into consideration gender diversity.

Governor Whiteside stated that the Bank is in the process of reviewing the current Corporate Governance Code for the Capital Market to address this issue and would like to see that as a goal; at least 20 percent of board members are to be women over the next 5 years. This can only be achieved as part of a collaborative movement and the listed companies can take a lead in championing this policy stance in their respective companies. In addition, there is also a need for the employers to release potential candidates regardless of gender to serve on boards when called upon.

This initiative also aligns with the objectives of the National Gender Policy for Fiji as well as the Sustainable Development Goal 5 – Gender Equality. The need to mainstream gender in the financial sector is a priority for the Reserve Bank. The Governor further added that "there is a need to change the mind-set and make а serious commitment in supporting gender diversity on boards based on merit. Consideration must also be given to candidates with the right expertise instead of solely focussing on those with prior board experiences"

RESERVE BANK OF FIJI LAUNCHES 2017 STUDENT DIARY

Statement by the Governor of the Reserve Bank of Fiji, 20 February 2017

The Reserve Bank of Fiji launched the seventh edition of its student diary at PT Shreedhar Maharaj College in Nausori on Friday 17 February 2017. The Governor of the Reserve Bank, Mr Barry Whiteside said that a total of 4,000 copies were printed which will be distributed to 26 secondary schools around Fiji, mainly those in the rural and maritime areas that affected by Tropical Cyclone were Winston last year. This is an initiative by the Reserve Bank to complement financial education and promote financial literacy awareness in our community.

Governor Whiteside said last year was a very challenging year for Fiji, especially for many of our schools and students. Some students were still recovering this year from the devastating effects of Severe Tropical Cyclone Winston and the recent floods. He hoped the diary would assist students in their recovery and learning efforts that were interrupted by Cyclone Winston and the floods.

Governor Whiteside said the Theme for this year's Diary is "Money Talks, I should Bank or Invest" which was similar to last year's edition. Financial security is and will always remain one of the most critical things in students' lives and they need to learn and understand how to achieve it.

Setting of goals and working towards achieving them is an important aspect of life and this should be learnt and instilled as a habit while students are still young. Students are encouraged to take part in the fun-filled activities planned in their schools or by the Ministry of Education that complement what they learn in the classroom.

This year's diary also contains some very interesting information, activities and real life experiences which will help students in their academic studies and personal development.

Fiji is one of the first countries in the Pacific, which has integrated financial education into the formal school curriculum at all levels. In 2013, the Ministry of Education introduced financial education as part of the formal school curriculum and it is now taught in all schools from year 1 to year 12.

A copy of the Diary may also be downloaded from the RBF Website at <u>www.rbf.gov.fj</u>

MONETARY POLICY STANCE MAINTAINED

Statement by the Governor of the Reserve Bank of Fiji, 23 February 2017

At its monthly meeting on 23 February 2017, the Reserve Bank of Fiji Board maintained the Overnight Policy Rate at 0.5 percent.

The Governor and Chairman of the Board. Mr Barry Whiteside stated that "despite the setback from last year's natural disasters, key sectors such as tourism, gold, garments and electricity registered positive performances in 2016. For this year, latest partial indicators suggest continuing domestic demand strong through higher consumption and investment on the back of buoyant spending and ongoing consumer rehabilitation activities. As such, a better growth outlook of 3.6 percent is anticipated for this year following a 2.0 percent estimated growth in 2016. This is led by improved performances expected across all major sectors of the economy, supported bv favourable domestic sentiments and accommodative fiscal and monetary policy settings. Nevertheless, downside risks to the growth outlook especially adverse prevail. weather conditions, higher import prices and domestic supply side constraints."

On the global outlook, Mr Whiteside added that key commodity prices are slowly gaining traction whilst improved sentiments for advanced economies have underpinned a higher growth forecast for the world economy this year. On the contrary, geo-political and financial markets uncertainties, lower potential growth and elevated vulnerabilities in some emerging markets and developing countries may dampen growth expectations.

On the dual objectives of the Bank, inflation outcomes were higher in January at 6.8 percent from 3.9 percent in December, as a result of one-off factors such as the impact of the December 2016 TD 04F on prices of agricultural produce and the fallout of the lower Value Added Tax rate implemented a year ago from the inflation calculation. Inflationary pressures this year are expected to be domestically driven, mainly from the impact of the tropical depression on prices for market items while price pressures from imported inflation are anticipated to remain low.

Foreign reserves remained at comfortable levels, supported by buoyant tourism receipts. Currently (23 February), foreign reserves are at \$1,976.1 million, sufficient to cover 5.3 months of retained imports of goods and non-factor services.

The Governor highlighted that the Bank will continue to closely monitor global and domestic developments, assess risks to the economy and the Bank's objectives, and align monetary policy accordingly.

RESERVE BANK OF FIJI RELEASES JANUARY-JULY 2016 REPORT

Statement by the Governor of the Reserve Bank of Fiji, 22 March 2017

The Honourable Minister for Economy, Mr Aiyaz Sayed-Khaiyum, tabled the Reserve Bank of Fiji's January-July 2016 Report in Parliament on 22 March 2017. The Report included the audited accounts and the operations of the Reserve Bank for the seven month period ended 31 July 2016. The Governor of the Reserve Bank, Mr Barry Whiteside, said it was necessary to produce the Report covering the shorter period, to coincide with the change in the Bank's financial year. Mr Whiteside highlighted that despite the negative impact from the natural disasters at the beginning of 2016, the Fijian economy stayed on track to record positive growth for the seventh consecutive year, although at a projected slower pace of 2.0 percent. The outcome was attributed to strong macroeconomic fundamentals prior to 2016 which helped the country withstand the effects of tropical cyclones Winston and Zena.

In addition, the immediate and ongoing relief efforts by the authorities, private sector and financial institutions postcyclones provided the much needed economic stimulus. Furthermore, favourable financial conditions, including ample liquidity and low interest rates, also supported the recovery.

In terms of monetary policy objectives, foreign reserves remained comfortable at the end of July 2016, while inflation trended higher than expected due to supply side shortages following the cyclones. Looking ahead, foreign reserves are projected to remain stable while the current high inflation level is expected to moderate as supply for cyclone-impacted agricultural items normalise. The Bank maintained an accommodative monetary policy stance throughout the seven month period and is expected to continue in the following months as warranted by the economic outlook.

Mr Whiteside also highlighted the soundness of Fiji's financial sector remains intact, as indicated by adequate earnings, capital, liquidity positions and asset quality for banks, companies and credit institutions. The Reserve Bank continued to prioritise efforts to further develop the financial system during the first seven months of 2016 through various policy initiatives, including the expansion of mobile services. microfinance development and financial literacy awareness programs.

The Report underscored the Bank's ongoing commitment towards financial inclusion, in particular the hosting of the eighth Alliance for Financial Inclusion (AFI) Global Policy Forum (GPF) in Nadi in September 2016. The milestone event would bring together more than 540 delegates from 82 countries at Denarau to discuss financial inclusion issues. It was also an opportunity to share Fiji's financial inclusion journey and its close collaboration with other fellow central banks in the Pacific region.

Governor Whiteside noted that the change in the Reserve Bank's financial year from 1 August to 31 July was in alignment with Government's change in fiscal year. On the Bank's financial performance for the seven months, lower interest rates in most of our trading partner countries resulted in the lower income and profits from its investments offshore. Nevertheless, the Bank transferred \$15.7 million in profits and an additional \$3.0 million from the Revaluation Reserve Account to Government in early October 2016. The Governor and the Board of Directors thanked the RBF staff for meeting their key objectives and extended their appreciation to all the Bank's stakeholders for their continued support during the first seven months of 2016.

The January-July 2016 Report can be downloaded from the RBF's website at www.rbf.gov.fj

MONETARY POLICY STANCE REMAINS UNCHANGED

Statement by the Governor of the Reserve Bank of Fiji, 30 March 2017

The Reserve Bank of Fiji Board agreed to keep its Overnight Policy Rate unchanged at 0.5 percent following its monthly meeting on 30 March, 2017.

In announcing the decision, the Governor and Chairman of the Board, Mr Barry Whiteside highlighted that this year's domestic growth outlook remained generally positive with upbeat performances in sectors such as tourism, remittances and construction, but weaker outcomes in the mining and timber industries. Domestic demand continues to be buoyant, as suggested by strong growth in partial indicators for consumption and investment including net VAT collections, vehicle sales and registrations and new Adequate bank liquidity, bank lending. low interest rates and favourable business sentiments, continue to support the economic expansion. The Reserve Bank's December 2016 Business Expectations and Retail Sales surveys prove the optimism by businesses through expectations for improved economic conditions, higher investments and retail sales over the next twelve months.

On the global front, Mr Whiteside stated that "global economic activity is expected to pick up in 2017 led by emerging market and developing economies and a turnaround in key advanced economies. A stronger global economy augurs well for the Fijian economy in terms of increased export demand, visitor arrivals and personal remittances."

Against the positive outlook for the economy, the Bank's twin monetary policy objectives are expected to remain intact. As expected, inflation eased to 5.5 percent in February having peaked to 6.8 percent in January, although remained high when compared to 1.2 percent in the same period last year. The current higher inflation continues to be driven by supply shortages of market items resulting from adverse weather conditions and the consistently high yaqona prices, post Tropical Cyclone Winston. Given the recent outcomes, the year-end inflation forecast is now expected to be around 3.0 percent.

Foreign reserves stood at around \$1,991.0 million as at 30 March, sufficient to cover 5.2 months of retained imports of goods and non-factor services.

Taking into account the recent developments outlook for and the economy, Mr Whiteside stated that the current accommodative monetary policy stance remains appropriate to support safeguarding while growth macroeconomic stability. Furthermore, the Reserve Bank of Fiji will continue to closely monitor external and domestic risks to the growth outlook and align monetary policy as warranted.

Note:

^{1/} The Monetary & Credit Aggregates table is derived from the Central Bank Survey (CBS) (Table 3) and Other Depository Corporations Survey ODCS (Table 2).

^{2/} Monetary base is normally referred to as reserve money and its components include currency in circulation, ODCs deposits at the Reserve Bank and other deposits of other financial corporations.

³⁷ As of May 2012, the official definition of broad money has changed to include securities of money issuers. As a result M3 will now be known as broad money.

Note:

^{1/} The Statutory Reserve Deposit is derived as 10 percent of commercial banks' deposits and similar liabilities at the end of the previous month.
 ²⁷ From 1996, demand deposits include funds placed in the Trust Account established for re-financing NBF Asset Management Bank.

^{3/} Currency with non-bank public was revised from 2001-October 2015.

^{4/} Held outside of the banking system.

^{5/} Differences, if any, in total assets and liabilities are due to rounding off.

Note:

^{1/} The values reported in the table include both local and foreign currency denominated assets.

 $^{2\prime}$ The actual Statutory Reserve Deposit held by commercial banks.

^{3/} This includes RBF Notes & Bonds.

^{4/} The previously reported Balance with banks abroad has been separated into either transferable deposits or other deposits.

^{5/} Differences, if any, in total assets and liabilities are due to rounding off.

Note:

^{1/} Commercial banks liabilities reported in the table include both local and foreign currency denominated liabilities.

^{2/} Previously reported as demand deposits.

^{3/} Previously reported as Local Government.

^{4/} Previously reported as Statutory Bodies.

⁵/Includes both savings and time deposits.

^{6/} Includes local bills payable.

⁷⁷ Under Non-Residents, previously reported balance to banks abroad has been separated into transferable and other deposits, while foreign bills payable is classified under others.

^{8/}Differences, if any, in total assets and liabilities are due to rounding off.

Note:

^{1/} As defined under the Section 43 of the RBF Act. Since 1996, when the National Bank of Fiji Restructuring Act became effective, Section 31 exempts the NBF Assets

Management Bank from holding Statutory Reserve Deposit and Unimpaired Liquid Asset.

^{2/} Balances at the end of the review month.

³⁷ Refers to the total only and not individual items. The total is derived as 10% of commercial banks deposits and similar liabilities at the end of the previous month.

^{4/} Balances of deposits and related liabilities as at the end of the previous month.

Note:

n.i.- no issue

n.t. - no trade

^{1/} Represents monthly weighted average rate.

^{2/} Prior to October 2006, Minimum Lending Rate (MLR) = Repurchase Facility Rate (Policy Indicator Rate + 100 basis points). From October 2006, MLR = Policy Indicator Rate + 100 basis points and Repurchase Facility Rate = latest weighted average overnight interbank rate + 100 basis points. From October 2007, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 5 percentage points). From January 2009, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 2 percentage points).

Note:

^{1/} Excludes cane cutters and household help.

 $^{\rm 2\prime}$ For year 2000, the reference period is year-end and not mid-year.

Due to low response rate, figures for the years 1991,1992,1994,1995 and 2001 were not complied.

No Survey was conducted in 2002.

*Reference period was end of December.

FIJI: KEY FINANCIAL INCLUSION INDICATORS

| | 2012 | 2013 | 2014 | 2015 | 2016 |
|---|--------|--------|--------|--------|--------|
| I. Access ^{1/} - Demographic (service points per 10,000 adults ^{2/} nationally) | | | | | |
| Number of Cash-In and Cash-Out access points | 10.64 | 9.46 | 16.38 | 21.78 | 21.41 |
| Number of Bank Branches | 0.99 | 1.05 | 1.16 | 1.17 | 1.13 |
| Number of ATMs | 3.71 | 4.23 | 4.58 | 4.74 | 5.28 |
| Number of EFTPOS | 59.76 | 80.20 | 87.74 | 93.16 | 98.47 |
| Number of Bank Agents | 1.22 | 1.62 | 1.69 | 1.64 | 1.54 |
| Number of MNO active Agents | 8.44 | 6.80 | 7.13 | 5.86 | 5.68 |
| II. Usage ^{3/} | | | | | |
| Number of regulated deposit accounts per 10,000 adults | 10,801 | 11,830 | 13,007 | 13,702 | 16,178 |
| Number of regulated credit accounts per 10,000 adults | 1,442 | 1,601 | 1,724 | 2,022 | 2,186 |
| Number of insurance policy accounts per 10,000 adults | 4,620 | 4,963 | 5,352 | 6,278 | 6,632 |
| Number of FNPF membership accounts per 10,000 adults | 6,123 | 6,232 | 6,436 | 6,549 | 6,575 |
| III. Access - Administrative Units ^{4/} | | | | | |
| Percentage of urban administrative units with at least one access point | n.a | n.a | n.a | 100 | 100 |
| Percentage of rural administrative units with at least one access point | n.a | n.a | n.a | 88.37 | 88.37 |
| Percentage of total population living in administrative units with at least one access | | | | | |
| point | n.a | n.a | n.a | 99.45 | 99.45 |
| Percentage of active mobile financial accounts/wallets | n.a | 1.55 | 2.18 | 2.16 | 2.56 |
| IV. Quality ^{5/} | | | | | |
| Average minimum balance to open a basic deposit account (\$) | n.a | n.a | 16.67 | 16.67 | 16.67 |
| Average cost of travelling to the nearest access $point^{6'}$ (\$) | n.a | n.a | 4.20 | n.a | n.a |
| Average time of travelling to the nearest access point (minutes) ^{6/} | n.a | n.a | 42 | n.a | n.a |
| Average Number of identification documents required to open a bank account | n.a | n.a | 2.80 | 2.80 | 2.80 |
| Percentage of Primary and Secondary school students receiving financial education | | | | | |
| in school annually | n.a | n.a | 100 | 100 | 100 |
| Percentage of consumers who contacted protection authority to report a complaint | | | | | |
| within the last 6 months and complaint solved within 2 months | n.a | n.a | n.a | 75.56 | 61 |
| Percentage of banks in the country reporting to the credit bureau | n.a | n.a | 100 | 100 | n.a |
| Percentage of adults with a bad record at the credit bureau | n.a | n.a | n.a | 3.06 | n.a |
| Existence of a central bank regulatory framework on consumer protection | n.a | n.a | 100 | 100 | 100 |
| Percentage of administrative units with branches of at least 3 different formal | | | | | |
| financial institutions, among administrative units with more than 10,000 inhabitants | n.a | n.a | n.a | 100 | 100 |
| Percentage of users who felt mistreated by staff of financial institutions | n.a | n.a | 0.009 | 0.003 | 0.003 |
| | | | | | |

Note:

^{1/}Access refers to the ability for households and firms to use financial products and services.

^{2/}Adults refer to the population that are 15 years and above.

³/Usage refers to the opportation that are 15 years and above. ⁴/Administrative units are measured at fourth tier level – "Urban and Rural Tikina/District."

⁵/Quality refers to the relevance of the financial products and services to the lifestyle needs of the consumer, demonstrated in attitudes and

opinions towards those products that are currently available to them. ⁶/Data is sourced from the "National Demand Side Survey to Assess the Access and Usage of Financial Services and Products in Fiji" Report.
