OVERVIEW

Based on the International Monetary Fund (IMF) projections and latest data, global economic activity continues to rebound with recovery underway. Emerging and developing economies are leading the recovery while developed economies continue on a more subdued recovery path. According to the IMF, the world economy is expected to contract by 1.1 percent in 2009 and a 3.1 percent turnaround is projected for 2010. Nonetheless, economic activity is still heavily reliant on policy support.

While Fiji's major trading partner economies expanded in the third quarter, they are expected to contract in 2009, with the exception of Australia. Nonetheless, a modest recovery is expected for these economies in 2010. However, this will come at the cost of higher consumer prices as most of the trading partners have revised their inflation projections up in the December quarter. A further rebound in commodity prices particularly crude oil remains a risk to this assessment.

Consistent with the global economy, the Fiji economy is forecast to contract by 2.5 percent in 2009 and grow modestly by 1.9 percent in 2010.

Consumer spending remained subdued throughout 2009. In the year to November, Net Value Added Tax (VAT) noted a 10.8 percent annual decline. In addition, new vehicle sales fell by 28.4 percent in the first 10 months of 2009.

Sectoral performances during the December quarter were mixed.

Provisional data from the Fiji Islands

Bureau of Statistics (FIBOS) showed that visitor arrivals totalled 539,405 in 2009, an annual decline of 7.8 percent. Following a period of sharp decline earlier in the year, visitor arrivals recovered very strongly in the last few months of 2009 exceeding performances in September and October last year. The introduction of new airlines and new routes partly contributed to this outcome and will augur well for the industry in 2010. The improvement in arrivals was also contributed by discounted hotel rates and great package deals.

Since the start of the crushing season, sugar production has been weaker than a year ago mainly attributed to lower cane produced. In addition, milling problems affected the performance of the industry. On other developments, industry liaison revealed that the impact of Cyclone Mick on standing cane was minimal.

The mining industry continues to perform well with positive performances noted in recent months. Given that international gold prices were at historical highs in December, sentiments on the industry look promising.

Electricity production by the Fiji Electricity Authority (FEA) rose by 2.3 percent in the year to November.

Similarly, the fisheries sector noted a 16.9 percent annual increase in export earnings in the year to September. On the downside, in the same period, export earnings for garments and timber fell by 20.1 percent and 44.5 percent, respectively as weak global demand continues to affect these industries.

On public finance, latest data showed that Government recorded an \$88.7 million net deficit, equivalent to -1.5 percent of GDP in the first 10 months of 2009. In the same period, Government expenditure and revenue were 17.6 percent and 8.2 percent lower than budgeted levels.

Employment conditions remained soft throughout 2009. Weaker demand from both the domestic and external sectors underpinned the outcome. Annual declines were recorded for taxpayer registrations and job advertisements.

The Reserve Bank continued to evaluate its policies during the December quarter as foreign reserve levels stabilised and liquidity conditions improved. In December, the Bank raised the Statutory Reserve Deposit (SRD) ratio and announced the lifting of its lending and interest rate spread policies, effective 1 January 2010. Certain exchange control transactions were re-delegated to commercial banks and foreign exchange dealers with higher limits. The policies were aimed at maintaining liquidity at adequate levels, safeguarding foreign reserves and facilitating economic activity.

Following the stabilisation of foreign reserves, liquidity conditions improved further during the quarter. Aligning with the Reserve Bank's interest rate policy, commercial banks' lending rates have trended downwards in the November

period. This is expected to bond well with the Bank's recent policies announcement. In contrast, deposit rates trended upwards in the same period.

The Fiji dollar strengthened against the Japanese Yen, the Euro and the US dollar during the quarter which helped contain price pressures. Inflation rose to 6.8 percent in December in line with the 7.0 percent projected. In comparison with previous devaluations, inflation was well supported by the favourable currency movements in the last 2 quarters of 2009. In 2010, inflation is expected to subside to 2.0 percent.

On the external sector, the trade deficit narrowed in the year to September on account of a larger fall in import payments compared to the fall in export receipts. Personal remittances performed very well in the first 10 months of 2009, growing by 45.4 percent from the same period in 2008.

At the end of 2009, Fiji's foreign reserves were around \$1,096 million, from \$1,019 million at the end of September quarter. Foreign reserves were sufficient to cover 3.7 months of import of goods and non-factor services. Accordingly, supported by the improved prospects in the tourism sector and the use of capital controls, the Standard & Poor's rating agency revised Fiji's outlook from negative to stable.

THE INTERNATIONAL ECONOMY

International Economic Conditions

Global economic activity continued to rebound and financial conditions have improved markedly. Emerging and developing economies are a step ahead on the recovery road propelled by the resurgence in Asia. The developed economies, on the other hand, continue on a more subdued recovery path. While activity is expanding, sustained growth is not assured and unemployment rates remain high. Economic activity is still heavily dependent on policy support.

According to the IMF, the world economy is expected to contract by 1.1 percent (Graph 1) in 2009, compared to a 3.0 percent growth in 2008. A 3.1 percent recovery is projected for 2010.

Graph 1
World GDP Growth Rate

Source: IMF World Economic Outlook - October 2009

The **Australian** economy grew for a third consecutive quarter by 0.2 percent in the three months to September boosted by government spending. This follows a 0.6 percent growth from the June quarter.

Latest data indicate that the economy is on track for recovery. Retail sales rose in

October, while business confidence rose for the second consecutive month and reached a 7-year high in November. In addition, the jobless rate fell in November. However, the gain in manufacturing activity slowed in November, while consumer confidence fell for two straight months in November and December. The trade deficit also widened in October, owing to a fall in exports. Consumer prices rose in November, a further indication that the economy is on the road to recovery.

The Reserve Bank of Australia (RBA) became the first central bank out of Fiji's major trading partners to raise borrowing costs in 2009, with three increases. The RBA raised its policy interest rate in every month of the fourth quarter of 2009 by 25 basis points each time, reaching 3.75 percent in December. This was in an effort to contain prices while citing a rebound in consumer confidence and increasing external demand for exports.

The Australian economy is projected to have grown by 1.1 percent in 2009. A further recovery of 2.9 percent is envisaged for 2010. Inflation is expected at 1.8 and 2.4 percent in 2009 and 2010, respectively.¹

The **New Zealand** economy grew by 0.2 percent in the third quarter, unchanged from a similar growth rate in the second quarter, as the decline in construction, manufacturing and business investment staggered the nation's recovery from its worst recession in 30 years.

¹ Asia Pacific Consensus Forecast - December 2009.

While positive economic data have emerged, other indications suggest a weak recovery is to be expected. The jobless rate rose to a 9-year high of 6.5 percent during the third quarter, while the strengthening New Zealand currency in the same period pushed export prices to a 2-year low, shrinking the country's terms of trade index for the sixth straight quarter. Nonetheless, consumer prices rose by a more than expected 1.3 percent from the second quarter.

On a positive note, manufacturing gained in October and November, while business confidence rose in all three months of the quarter reaching a 10-year high in December. In addition, the trade deficit narrowed in November.

The Reserve Bank of New Zealand kept its benchmark interest rate unchanged at 2.5 percent throughout the quarter.

The economy is projected to have contracted by 1.2 percent in 2009. Nonetheless, a recovery of 2.5 percent is envisaged for 2010. Inflation is expected to be around 2.2 percent in 2009 and 2.0 percent in 2010.²

The US economy grew by an annual 2.2 percent in the September quarter, following a 0.7 percent contraction in the second quarter, as corporate profits gained the most in five years.

Latest data indicate the increasing signs of stabilisation and that the economy is on track for recovery. There were gains in industrial production, manufacturing and retail sales in November. The decline in the unemployment rate in November to 10.0 percent boosted consumer confidence

which rose consecutively in the last two months of the year. In addition, the trade deficit narrowed in October, as the rebounding overseas economies and a weaker dollar lifted exports for the sixth month.

The US Federal Reserve kept its key interest rate between 0 and 0.25 percent throughout the quarter.

In 2009, the US economy is expected to have contracted by 2.5 percent. A solid recovery of 2.7 percent is envisaged for 2010. Inflation is projected at -0.4 percent in 2009 and then rise to 2.1 percent in 2010.³

The **Euro-zone** economy expanded by 0.4 percent in the September quarter, as governments stepped up spending and exports increased for the first time in one-and-a-half years.⁴ The expansion followed a 0.2 percent contraction in the second quarter.

Recent economic data nonetheless remain weak. Retail sales fell for the sixteenth month in September, while the unemployment rate remained at a decade-high of 9.8 percent in October, as firms cut jobs and a stronger Euro threatened demand for the region's exports. On a more positive note, manufacturing rose for two straight months in October and November, and the economic sentiment among businesses and consumers improved in November. Moreover, the Italian economy grew by 1.0 percent in the third quarter after five straight quarters of decline and French manufacturing confidence rose to a 1-year high in October.

³ Consensus Forecast - December 2009.

⁴ Exports increased by 2.9 percent from the second quarter, when it fell by 1.3 percent and government spending increased by 0.5 percent.

² Asia Pacific Consensus Forecast - December 2009.

The Euro-zone economy is projected to have declined by 3.9 percent in 2009. A 1.3 percent recovery is envisaged for 2010. Inflation is projected at 0.3 percent in 2009 and 1.2 percent in 2010.⁵

In the September quarter, the **Japanese** economy grew by 0.3 percent, slower than the 0.7 percent growth in the previous quarter, as deflation and the strengthening Yen continue to hamper the economy's recovery.

Recent economic data continue to indicate weak economic activity. Machinery orders, reflecting business investment, and production fell in October, while consumer prices fell at near-record pace in October and November, reinforcing the government's concern that deflation will hinder the recovery prospects. Furthermore, consumer confidence fell in November for the first time this year, in line with an increase in the jobless rate to 5.2 percent, the first increase in four months. Nevertheless, on a positive note, industrial production which rose at a slower pace in October gained momentum in November, rising by the most in 6-months.

The Japanese economy is expected to have contracted by 5.3 percent in 2009. The economy is anticipated to recover with a growth of 1.5 percent in 2010. Inflation is projected at -1.3 percent in 2009 and -1.0 percent in 2010.⁶

The **Chinese** economy grew by an annual 8.9 percent in the third quarter, following a growth of 7.9 percent in the June quarter, underpinned by the gains in industrial production and retail sales.

Latest data indicate that the economy is destined to meet its 8.0 percent growth target for 2009. Foreign direct investment rose in October and November, lured by China's strengthening recovery. Similarly, industrial production was up for the same two months, while manufacturing grew at its fastest pace in 16 months in November.

The Chinese economy is projected to have expanded by 8.5 percent in 2009. A further 9.6 percent growth is envisaged for 2010. Inflation is projected at -0.7 percent in 2009 and 2.5 percent in 2010.⁷

India's economy grew by an annual 7.9 percent in the third quarter the fastest pace in one-and-a-half years, as manufacturing activity soared. This follows a 6.1 percent gain in the previous quarter.

Recent data show some positive indicators. Industrial production rose for the second straight month in October while manufacturing output rose for the eighth consecutive month in November as low interest rates and tax-cuts spurred consumer spending. Nonetheless, the inflation rate accelerated to an 11-month high in December as food costs soared.

The Indian economy is expected to grow by 5.4 percent in 2009. For 2010, the economy is expected to expand by 7.7 percent. Inflation is projected at 10.4 percent in 2009 and 7.2 percent in 2010.⁸

World commodity prices rose by 12.5 percent in the December quarter led by price increases of sugar, fish and gold (Graph 2).

⁵ Consensus Forecast - December 2009.

⁶ Consensus Forecast - December 2009.

⁷ Asia Pacific Consensus Forecast - December 2009.

⁸ Asia Pacific Consensus Forecast - December 2009.

Graph 2

Over the December quarter, world market sugar prices (New York No.11 price) rose by 10.5 percent (Graph 3). Sugar prices rose over the quarter as excess rain hampered harvesting in Brazil and India, the largest producers, extending a global supply deficit.

Graph 3

In the coming months, sugar prices are expected to rise in anticipation of

tightening supplies in the first quarter of 2010.

At the end of December, the European Union (EU) preferential sugar price was around US21.8 cents per pound, a decrease of 26.5 percent over the quarter.

Gold prices rose by around 9.2 percent over the December quarter (Graph 4). More recently on 2 December, gold prices reached a historical high of US\$1,212.5 per ounce.

Graph 4

Prices rose after a weakening US dollar and signs of a recovering global economy spurred demand for the metal as an alternative investment and in order to hedge against inflation.

In the months ahead, gold prices are expected to rise, as the dollar is anticipated to weaken, increasing demand for the metal as an alternative investment.

Brent **crude oil** prices (Graph 5) rose by around 14.1 percent over the quarter, after economic activity picked up in the US and China, signalling that the worst global recession is abating. At the end of December, the crude oil price was around US\$77.2 per barrel.

In the months ahead, cold weather in the US is expected to raise demand and keep crude oil prices high.

THE DOMESTIC ECONOMY

Domestic Economic Conditions

The Fiji economy, is forecast to contract by 2.5 percent in 2009 (Graph 6). The contraction is expected to be driven by weak performances in the transport, storage & communication, wholesale & retail trade, agriculture & forestry, manufacturing, public administration & defence, education, health & social work and the hotels & restaurants sectors.

Graph 6
GDP Growth Rate

In 2010, the economy is expected to make a recovery and modestly grow by 1.9 percent. Growth is expected in most of the sectors. However, the manufacturing, agriculture & forestry, financial intermediation, wholesale & retail trade, hotels & restaurants, construction, mining & quarrying, real estate & business services, fishing and other community, social & personal services are expected to be the main sectors driving growth in 2010.

For the years 2011 and 2012, growth is projected at 2.4 percent and 2.5 percent, respectively.

Consumer Spending

Consumer spending remained soft throughout the year as revealed by partial indicators. Cumulative to November, net Value Added Tax (VAT) collections declined by 10.8 percent when compared with the corresponding period in 2008. Additionally, an annual decline of 6.1 percent was noted for import of consumption goods in the first nine months of the year. Weak consumption activity was also supported by stronger declines in new vehicle sales (28.4% cumulative to October).

Production

Mixed sectoral performances were noted during the review period. While the gold, electricity and fishing industries recorded higher outcomes, production in the tourism, sugar, copra, clothing & footwear and timber sectors were lower. There was, however, a noticeable improvement in tourism towards the latter part of the year.

Output in the **cane and sugar** industries was weak in the 2009 season. Statistics by the Fiji Sugar Corporation Limited revealed that by December end, around 2.1 million tonnes of cane were crushed to produce 161,810 tonnes of sugar (Graph 9). This was a yearly decline in cane and sugar production of 9.1 percent and 22.2 percent, respectively. The fall in sugar output was attributed to lower cane produced as well as milling problems. The Total Cane to Total Sugar (TCTS) ratio was 13.0 in December, compared to a ratio of 11.2 for the same period last year. As a result of earlier mill problems,

crushing at the Lautoka and Rarawai mills was extended into January 2010.

On other developments, industry liaison revealed that the damage caused by Cyclone Mick in December on the standing cane was minimal and is not expected to affect current projections of cane and sugar output for the 2009 crushing season.

Graph 9
Sugar Production
(Seasonal)

Sugar export earnings faced a marked reduction in EU preferential prices from October 2009, offsetting some benefits derived from the April currency devaluation.

Tourism Industry

Provisional data from the Fiji Islands Bureau of Statistics showed that visitor arrivals totalled 539,405 in 2009, an annual decline of 7.8 percent. In the last few months of 2009, visitor arrivals had recovered strongly with actual performances in September and October exceeding performances last year. The introduction of new airlines and new routes as well as the heavy discounted packages offered by the industry has contributed to the strong recovery in visitor arrivals towards the end

of 2009 (Graph 10).

Graph 10
Monthly Visitor Arrivals

The performance of the mining industry gained some momentum in 2009 from the last year. Recent data from the Vatukoula Gold Mines Limited (VGML) indicate that a total of 29,703 ounces of gold was produced up to November 2009. The upgrading of plant, machinery and equipment by the VGML has, to some degree, contributed to the positive performance in recent months (Graph 11).

Graph 11
Gold Production and Earnings

Gold exports earnings for the first nine months of 2009 totalled \$26.9 million. Gold earnings are currently benefitting from high gold prices and the devaluation

of the Fiji dollar.

The copra industry was weak in 2009. Cumulative to November, around 9,535 tonnes of copra were produced, an annual decline of 20.2 percent when compared to the same period last year (Graph 12). The lower output corresponds to lower prices, which declined by around 26.1 percent over the year.

Graph 12
Copra Production

Source: Coconut Industry Development Authority

In the review period, the minimum mill gate price stood at \$500 per tonne, similar to the Government Support Price.

Copra prices have notably remained dormant at \$500 per tonne for the last 4 months of 2009. The developments in the world market prices with lower crude oil prices in 2009 compared to 2008 have affected the prices for copra. However, for the month of January 2010, copra prices have risen slightly to around \$508 per tonne.

Total **electricity** generated by the FEA, cumulative to November, was 715,204 mega watt hours (Mwh), which is a growth of 2.3 percent on a yearly basis.

Fish export receipts noted a positive performance up to September 2009 where

fish exports earnings rose annually by 16.9 percent to \$113.1 million.

The **clothing, textiles & footwear** industry continues to be affected by weak global demand. Cumulative to September, the total earnings from this sector declined by 20.1 percent (to \$66 million) compared with the corresponding period in 2008. This was driven by a decline of 20.5 percent in garment export earnings (from \$75.6 million to \$60.1 million).

Timber export earnings cumulative to September fell by 44.5 percent to \$24.7 million when compared with \$44.5 million in 2008. The global economic slowdown this year has affected the demand for woodchips and mahogany.

According to the **Building and Construction** Survey Report released by the FIBOS, \$170.3 million worth of construction work has been realised up to September 2009. This represents a decline of around 8.2 percent on an annual basis.

By categories, cumulative to September, work put-in-place by the private sector registered an annual decline of 8.9 percent (to \$158.4m). The public sector, on the other hand, rose by an annual 2.0 percent to \$11.9 million.

The total number of building completion certificates issued cumulative to September (247) declined on an annual basis by 5.0 percent. The value of building completion certificates (\$36.9m) issued increased over the year by 39.1 percent.

Looking at leading indicators, cumulative to September, the total number of building permits issued (811) declined an annual 12.1 percent. The value of building

permits (\$69.9m) registered a growth over the year of 5.4 percent.

Public Finance

Latest cash flow data show that cumulative to October 2009, Government recorded a net deficit of \$88.7 million equivalent to -1.5 percent of GDP. This compares with a net surplus of \$148.1 million (2.5 percent of GDP) recorded in the corresponding period last year.

Government expenditure increased on an annual basis by 10.2 percent, underpinned by a 56.2 percent increase in investing payments and a 4.5 percent rise in operating expenses. Notably, capital expenditure in the review period rose by 30.2 percent on an annual basis but was below target by 38.0 percent. Compared with the forecast for the period, total expenditure was lower by 17.6 percent.

Government revenue fell by 6.5 percent in the review period. The decrease in revenue collections stemmed from lower export duty receipts (-88.6 percent), corporate taxes (-15.9 percent), import excise duty collections (-9.7 percent) and a 6.8 percent fall in excise duty collections. In addition, grants in aid, other revenue & surpluses, fees, fines & miscellaneous charges, and dividends from investments fell by 17.4 percent, 29.0 percent, 15.4 percent, and 39.7 percent respectively. Moreover, total revenue collections were also lower by 8.2 percent when compared with the budgeted level.

Government's outstanding debt at the end of October totalled \$3,067.3 million, equivalent to 51.3 percent of GDP. This compares with the outstanding debt level at October 2008 of \$2,876.5 million, or 50.5 percent of GDP.

For 2010, the Government is taking an expansionary fiscal stance. As such, Government's position is budgeted for a headline deficit of \$220.1 million, equivalent to 3.5 percent of GDP. With no asset sales expected next year the underlying balance is also envisaged at a deficit of 3.5 percent of GDP. Excluding loan repayments, total expenditure next year is anticipated to be \$1,706.6 million (a decrease of 0.5 percent). Total revenue, on the other hand, is budgeted at \$1,486.5 million (an increase of 7.5 percent over 2009 levels).

Inflation

Inflation in December was 6.8 percent, in line with the 7.0 percent projected. In September, inflation was 6.3 percent (Graph 13). Consumer prices rose by 0.2 percent over the quarter.

Higher prices were recorded in the miscellaneous items, durable household goods, food items, clothing and footwear and heating and lighting categories. Nevertheless, the higher prices were partially offset by lower charges in the alcoholic drinks & tobacco and transport categories while charges for services and housing remained unchanged.

Graph 13
Inflation

Source: Fiji Islands Bureau of Statistics

Over the year, except for the heating & lighting category, higher prices were noted

across all other categories. This is attributed to the impact of devaluation on most items in the basket. Since the April devaluation, consumer prices have increased by 8 percent. The impact is expected to continue in the earlier part of next year and then recede thereafter. Thus, inflation is anticipated to subside to 2.0 percent by the end of 2010.

Core inflation, measured by the trimmed mean, rose to 2.2 percent in December, compared to 2.0 percent in September. The increase in prices of most items contributed to this outcome.

Labour Market

Recent data indicated that employment conditions remained subdued.

New taxpayer registration, a partial indicator of employment, noted an annual 47.3 percent fall to 3960 registrations in 2009. Apart from the mining & quarrying sector which recorded an improvement after a rebound in gold mining, new taxpayer registrations fell across the rest of the sectors. The fall was mainly underpinned by the electricity & water; construction; wholesale & retail trade, restaurants & hotels; manufacturing; and finance, insurance, real estate & business services sectors.

While the fall in new taxpayer registrations was partially influenced by the increase in the income tax threshold on 1 June 2008, weaker demand emanating from both the external and domestic fronts are also responsible for subdued labour market conditions.

Similarly, recruitment intentions were also weak. The number of jobs advertised in 2009 noted an annual 7.5 percent fall (Graph 14).

The community, social & personal services sector has recorded the largest number of advertised positions. This was followed by the wholesale & retail trade & restaurants & hotels, transport, storage & communications, finance, insurance, real estate & business services and construction sectors. The sluggish demand and the expected contraction for the year may have contributed to this outcome.

Graph 14
Job Advertisements

With modest recovery expected in 2010 and fiscal consolidation in the public service to persist, recruitment intention is expected to remain sluggish in the next 6 months.

The External Sector

Cumulative to September 2009, the merchandise trade deficit (excluding aircraft), narrowed to \$1,164 million⁹, compared to the same period in 2008 when it was \$1,524 million.

Domestic export earnings fell by 2.5 percent over the same period. The decline was led by sugar, timber, garments, coconut oil and folding cartons, boxes & cases which more than offset the increases from exports of other domestic exports,

⁹Trade figures were sourced from FIBOS and RBF.

fish, gold, molasses and mineral water. Including re-exports, total export earnings fell by 11.7 percent, compared to a 22.4 percent growth in the same period last year.

Over the same period, import payments (excluding aircraft) fell by 18.7 percent, compared with a growth of 26.0 percent in the same period last year. The decline was led by lower payments for all categories of imports - intermediate goods (40.2 percent), consumption goods (6.1 percent) and investment goods (4.8 percent).

During the year to October, personal remittances rose by around 45.4 percent to \$242 million compared to the same period in 2008. Exchange rate gains from the 20 percent devaluation may explain part of the rise in remittances.

At the end of 2009, foreign exchange reserves were around \$1,096 million (Graph 15), equivalent to around 3.7 months of imports of goods and non-factor services.

Graph 15
Foreign Exchange Reserves

Domestic Financial Conditions

The Reserve Bank continued to review its policies during the December quarter as foreign reserve levels stabilised and liquidity conditions improved.

Due to the significant build-up in liquidity during the quarter, the Reserve bank raised the Statutory Reserve Deposit (SRD) ratio from 5 to 7 percent effective from 7 December 2009. Raising the SRD was aimed at maintaining liquidity in the banking system at adequate levels while safeguarding Fiji's foreign reserves.

Following the improved outlook for foreign reserves towards the end of the quarter, the Reserve Bank announced the removal of its lending and interest rate spread policies, effective from 1 January 2010. However, any future increases in bank margins will require justification and explanation to the Reserve Bank. Furthermore, specific exchange control transactions were re-delegated to commercial banks and foreign exchange dealers with increased limits. The easing of these controls is expected to support investment lending and economic activity in the country.

Liquidity in the banking system fell during the fourth quarter due to an increase in the SRD requirement to supplement recent measures taken by the Bank to ensure that liquidity in the banking system is maintained at an acceptable level while safeguarding Fiji's foreign reserves. Over the quarter, commercial banks' Exchange Settlement balances with the Reserve Bank rose by \$49 million to \$391 million (Graph 16).

Graph 16
Bank Demand Deposits

Source: Reserve Bank of Fiji

Money Markets

Due to the high level of liquidity in the banking system during the fourth quarter, only \$8 million was traded in the interbank money market at the weighted average rate of 2.17 percent. This compared with \$9 million traded in the September quarter.

The Government floated \$125 million in treasury bills (t-bills) during the December quarter, an increase of \$55 million over the September quarter. Similar to the previous quarter, Government issues were over-subscribed, with \$221 million received in tenders. However, only \$98 million were allotted with maturities ranging from 28 to 245 days, while the range on the yields widened to between 2.50 to 6.50 percent compared to 5.50 to 8.80 percent in the previous quarter.

Statutory corporations' issues of promissory notes (P-notes) continued to be under-subscribed during the December quarter. A total of \$28 million in P-notes were floated, which received only \$9 million in tenders of which \$8 million were allotted in maturities ranging from 245 to 364 days. The weighted average yields ranged from 8.35 to 9.00 percent.

In line with the buoyant level of liquidity in the banking system, interest rates continued to decline. The 91-day t-bill rates declined sharply by 399 basis points to 3.00 percent. This is in line with the Government's efforts to reduce the interest rates to a sustainable level.

Capital Markets

Issues of Government bonds were hugely under-subscribed by \$42 million for the December quarter compared with \$3 million in the previous quarter. The Government issued bonds worth \$155 million in the fourth quarter, compared to \$100 million in the previous quarter. Maturities ranged from 3 to 20 years, while the weighted average yields ranged from 4.00 percent to 11.00 percent. The weighted average Government yield fell during the quarter reflecting fixed coupon rates for the Government.

During the December quarter, bonds issued by statutory corporations remained under-subscribed. Statutory bodies floated a total of \$203 million bonds with only \$70 million received in tenders. However, only \$44 million were allotted in maturities ranging from 3 to 10 years. The weighted average yields ranged from 4.50 to 7.50 percent.

Foreign Exchange Markets

Bilateral movements in exchange rates saw the Fiji dollar strengthen during the December quarter against the Japanese Yen (3.6%), the Euro (2.7%) and the US dollar (1.0%) but weakened against the Australian dollar (-1.7%) and the New Zealand dollar (-0.1%) (Graph 17).

Graph 17

Source: Reserve Bank of Fiji

During the December quarter, the Nominal Effective Exchange Rate (NEER)¹⁰ index rose marginally by 0.5 percent, reflecting an overall appreciation of the Fiji dollar against Fiji’s major trading partner currencies. In contrast, the NEER index fell in November by 19.0 percent on an annual basis.

The Real Effective Exchange Rate (REER)¹¹ index rose over the fourth quarter by 0.5 percent, indicating a marginal deterioration of Fiji’s international competitiveness relative to its major trading partners (Graph 18). This was partly on account of the relatively higher domestic inflation of 6.8 percent in December. In the same period, the weighted average trading partner inflation rose marginally by 0.1 percent to 1.6 percent.

¹⁰ The NEER is the sum of the indices of each trading partner country’s currency against the Fiji dollar, adjusted by their respective weights in the basket. This index measures the overall movement of the Fiji dollar against the basket of currencies. An increase in this index indicates a slight appreciation of the Fiji dollar against the basket of currencies and vice versa.

¹¹ The REER index is the sum of each component of the NEER index, adjusted by the relative price differential between Fiji and each of Fiji’s major trading partners. The index measures the competitiveness of the Fiji dollar against the basket of currencies. A decline in REER index indicates an improvement in Fiji’s international competitiveness.

Graph 18

Source: Reserve Bank of Fiji

Financial Intermediaries

Movements in commercial banks’ interest rates remained mixed during the first two months of the quarter. The weighted average outstanding lending rate fell by 7 basis points to 7.57 percent (Graph 19), in alignment with the Reserve Bank’s policy on lending rate. However, the new lending rate rose by 29 basis points to 8.71 percent over the same period.

Graph 19

Source: Commercial Banks

In November, the weighted average outstanding and new time deposit rates rose by 33 and 100 basis points to 5.73 and 6.75 percent respectively. The significant rise in the new time deposit rate is due to higher rates recorded in the

1-3 months and 12-24 months maturities by one of the commercial banks. The weighted average savings deposit rate rose slightly from 0.81 percent in September to 0.89 percent in November.

For Licensed Credit Institutions (LCIs)¹² interest rates generally trended upwards during the first two months of the December quarter. While the weighted average outstanding lending rate was unchanged at 12.32 percent, the new lending rate rose by 120 basis points to 15.31 percent. Similarly, both the existing and new weighted average time deposit rates of LCIs rose in November by 22 and 5 basis points to 6.95 and 7.09 percent, respectively.

Broad money (M2) rose annually by 3.6 percent in November, the first increase since the September quarter of 2008, compared to a 1.6 percent contraction in the previous quarter. The expansion over the quarter was underpinned by a higher growth in time deposits by 18.3 percent coupled with a slower decline in demand deposits from -27.2 percent in September to -13.4 percent in November.

Domestic credit growth rose annually by 2.6 percent in November, from 4.2 percent in September. The growth was attributed mainly to a significant increase in government credit from -1.7 percent in September to 34.3 percent in November. Moreover, private sector and official entities credit growth slowed annually by 0.2 and 0.4 percent from a growth of 4.4 and 8.7 percent respectively in September.

The annual growth in total lending by commercial banks slowed to 0.7 percent in

November compared to 5.2 percent in September. The weaker growth during the review period was largely due to reduced lending to the sectors for manufacturing, private individuals, agriculture, public enterprises and wholesale, retail, hotels & restaurants (Graph 20).

Similarly, the LCIs total outstanding loans slowed to 2.6 percent on an annual basis in November, after rising by 3.2 percent in September. This decline was underpinned by lower lending to the real estate, agriculture, building & construction and the public enterprise sectors.

Banking Industry Quarterly Condition Report – September 2009

Overview – Commercial Banks

The banking industry's performance was assessed as marginal over the September quarter, compared to the satisfactory rating of the June quarter. This assessment was based on asset quality, profitability and liquidity being assessed as marginal, though capital adequacy continued to be strong.

Commercial banks' lending declined marginally mainly attributed to the credit ceiling in place.

¹² LCIs, include Merchant Finance Investment Company Limited, Credit Corporation (Fiji) Limited and Home Finance Company Limited.

Deposits expanded over the quarter, underpinned by an increased level of time deposits.

Asset quality improved slightly due to a contraction in the level of classified exposures. Prudential assessment however, remained as marginal.

The banking industry’s profits before tax registered a quarterly and an annual decline.

Liquid assets continued to improve in the second consecutive quarter resulting into an upgrade in assessment from poor to marginal¹³. This in turn also increased the liquidity coverage ratios.

The Reserve Bank’s policy on interest spread strongly contributed to the gradual decline in commercial banks’ spread.

Balance Sheet

Total assets expanded over the September quarter by 3.3 percent and by 8.4 percent over the year to \$4.2 billion (Graph 21).

**Graph 21
Structural Change and Growth in Bank Assets**

Source: Commercial Banks

¹³ The prudential liquidity benchmarks assess liquidity relative to total assets and total deposits. The liquidity indicator ratios used are liquid assets to total deposits, liquid assets to total assets and total loans to total deposits ratio.

The quarterly growth was mainly underpinned by an increase in cash & settlement balance, other assets, SRD and investments. These increases more than offset the decline noted in gross loans and deposits with banks.

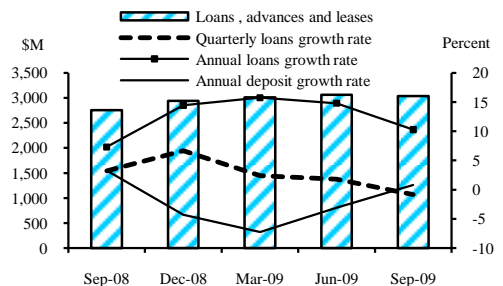

In line with the movements in assets, the increase in liabilities was a result of an increase in deposits, other liabilities, bills payable and balance due to RBF.

Total deposits grew by \$98.9 million to \$3.3 billion in September as a result of increased time deposits by the non-bank financial institutions, private sector business entities and private individuals.

Lending

Commercial banks’ lending recorded a marginal decline of 0.8 percent over the quarter to \$3.0 billion (Graph 22).

**Graph 22
Banking Industry's Loans and Growth Rate**

Source: Commercial Banks

On an annual basis however commercial banks credit grew by 10.3 percent from \$2.8 billion. Following the removal of the credit ceiling, effective from 1 September 2009, banks have been requested as a guide, to contain the annual growth of loans at or below 10.0 percent unless the exceeding loans are to the high priority sectors.

Lending to the high priority sectors over the review period increased by \$33.7 million to \$1.4 billion, while low priority loans rose marginally by 0.4 percent to \$1.3 billion. The growth in the high priority sectors was attributed to the electricity, building & construction and manufacturing sectors.

Commercial bank lending mainly concentrated in private sector business entities (Graph 23).

Graph 23
Commercial Banks' Loans and Advances by Sector

Capital Adequacy

Commercial banks' capital adequacy remained strong at 16.1 percent, and was well above the 8.0 percent requirement (Graph 24).

Graph 24
Capital Adequacy Ratio of Commercial Banks

Asset Quality

Commercial banks' asset quality improved slightly over the quarter, however the overall assessment continues to be marginal. Classified exposures and past due loans declined, while impaired assets rose with downgrading of accounts to loss category. In line with the deterioration, an increase was noted in the provisioning levels (Graph 25).

Graph 25
Commercial Banks' Asset Quality

Total classified exposures as a percent of gross loans remained low at 3.2 percent. This was attributed to the decline in total classified exposures by \$14.0 million to \$98.6 million. The contraction was mainly due to the upgrading of accounts to standard, with some full settlements reported. Loss accounts, however, rose as a result of downgrading from the substandard and doubtful categories.

Past due loans stood at \$88.9 million, reflecting a decline of 8.1 percent (Graph 26). The contraction was noted in the 3-6 months and the 1-2 years categories which more than offset the increase noted in the 1-3 months, 6 months -1 year, and over 2 years categories.

Graph 26
Past Due Status of Commercial Banks

Source: Commercial Banks

Total provisions of the banking industry increased by 20.0 percent to \$91.5 million in September. The increase was underpinned by a growth in collectively assessed provisions of 54.9 percent to \$31.4 million and general reserve for credit losses (GRCL) of 12.0 percent to \$41.6 million.

Coverage on the standard part of the loan book (GRCL to net loans and advances) stood at 1.4 percent, denoting an increase from 1.2 percent in the June quarter, while coverage of problems loans (collective and individually assessed provisions to classified exposures) was 50.7 percent (from 34.8%). Provisioning levels were assessed to be adequate.

The number of new restructured credit facilities decreased during the quarter to 165. Demand notices issued increased to 1,613, while 51 mortgagee sales were initiated during the quarter.

Interest Spread

As at September 2009, aggregate commercial banks’ interest spread was 4.3 percent, 30 basis points from the required level. This also reflected a contraction from 4.8 percent noted in June

2009 and 6.0 percent in September 2008 (Graph 27).

The contraction over the quarter was underpinned by an increase in cost of funding liabilities by 0.2 percent, while yield on earning assets decreased by 30 basis points to 7.0 percent.

Graph 27
Interest Spread of Commercial Banks

Source: Commercial Banks

Banks’ spreads are expected to decline further in the coming quarter as banks seek to comply with the 4.0 percent spread directive.

Income and Profitability

Commercial banks’ earnings level was assessed as marginal reflecting the impact of the weighted average lending rate and interest spread policy directives.

Commercial banks aggregate net profit before tax for the quarter stood at \$20.9 million, a decline from \$28.8 million recorded in the June quarter, and \$49.0 million recorded over the same period in 2008.

In line with the reduced profits, the ratio on return on assets before tax decreased to 2.0 percent, while return on equity contracted to 17.4 percent.

The reduction in net profit before tax for

the quarter was largely driven by a rise in bad debts & provisions and operating expenses, coupled with a decline in net interest income.

Table 1
Banks' Combined Income Statement

| Quarter Performance(\$m) | | | | % Change | |
|--|-------------|-------------|-------------|--------------|--------------|
| | Sep 08 | Jun 09 | Sep 09 | Over Qtr | Over Sep 08 |
| Interest Income | 61.0 | 65.4 | 63.7 | -2.6 | 4.4 |
| Interest Expense | 10.8 | 20.4 | 23.1 | 13.1 | 114.6 |
| Net interest income | 50.2 | 45.0 | 40.6 | -9.8 | -19.2 |
| Add: Non interest income | 25.0 | 26.6 | 35.1 | 31.8 | 40.4 |
| Income from overseas exchange transactions | 12.8 | 11.4 | 12.2 | 6.9 | -4.9 |
| Commission | 1.5 | -2.3 | 3.0 | 233.1 | 100.0 |
| Fee Charges | 11.9 | 12.3 | 12.3 | 0.5 | 3.9 |
| Other income | -1.2 | 5.2 | 7.5 | 43.9 | 714.2 |
| Total operating income | 75.2 | 71.6 | 75.7 | 5.7 | 0.6 |
| Less: Operating expenses | 32.4 | 34.3 | 37.7 | 9.9 | 16.6 |
| Less: Bad Debts & provisions | -6.2 | 8.5 | 17.0 | 100.9 | 374.2 |
| Profit before tax | 49.0 | 28.8 | 20.9 | -27.5 | -57.4 |
| Less: Tax | 13.9 | 8.1 | 6.0 | -26.2 | -57.1 |
| Net profit after tax | 35.1 | 20.7 | 14.9 | -28.0 | -57.6 |

Source: Commercial Banks

Net interest income noted a decline over the review period due to decreased interest income, while interest expenses grew. Interest expenses continued to increase as commercial banks gradually moved towards being compliant with the interest spread policy. This was in line with the rise noted in total deposits of the banking industry for the quarter.

Combined banks' efficiency ratio stood at 49.9 percent, reflecting a deterioration both on a quarterly and on an annual basis. This was due to operating expenditure registering a greater increase than operating income, over the quarter.

Liquidity and Funding

The liquidity position of commercial banks significantly improved in the September quarter by 20.5 percent to \$913.4 million.

The liquidity assessment of commercial banks was upgraded to marginal from the poor assessment noted in the June quarter.

The growth in liquid assets also led to an improvement in the liquid assets to deposits ratio from 23.4 percent in June to 27.4 percent in the September quarter. Liquid-assets-to-total-assets ratio also strengthened on a quarterly basis from 18.6 percent to 21.7 percent (Graph 28).

Graph 28
Liquid Assets to Total Deposits of Commercial Banks

Source: Commercial Banks

The loans-to-deposits ratio also recorded an improvement to 91.1 percent from 94.6 percent in June 2009, while over the year comparison noted an increase from 83.3 percent. The improvement has been attributed to a significant increase in deposits over the quarter.

Maturity profiles¹⁴ of banks showed a negative mismatch of \$307.3 million for

¹⁴ Maturity profile reflects the difference between loans and term deposits classified by remaining term to maturity brackets.

the short term (less than 12 months). Deposits held by the 15 large depositors declined by 1.3 percent over the quarter and accounted for 23.9 percent of total deposits.

Overview – Credit Institutions

The overall assessment of the performance of the credit institution industry over the September 2009 quarter was marginal. Capital remained strong with satisfactory earnings level. Asset quality however remained marginal along with liquidity which continued to be assessed as poor.

Credit institutions’ registered a strong capital adequacy ratio of 25.6 percent in September, against the minimum requirement of 10 percent.

Assets of credit institutions recorded a growth on a consolidated basis over the quarter and over the year.

Credit institutions’ earnings continued to be assessed as satisfactory over the September quarter.

Balance Sheet

Credit institutions’ total assets expanded by 1.8 percent over the quarter and by 2.2 percent over the year to \$330.4 million (Graph 29).

The increase over the quarter was due to deposits with banks increasing by 60.1 percent as commercial banks offered relatively high interest rates on deposits during the review period. Investments also noted a marginal increase of 1.6 percent with other assets increasing by 2.5 percent.

On the liabilities side, growth was mainly

led by deposits increasing by 3.9 percent to \$177.5 million.

Graph 29
Structural Change and Growth in Credit Institutions' Assets

Lending

Total lending by credit institutions marginally decreased by 0.7 percent over the quarter to \$289.2 million.

Lending to private sector business entities declined by 1.3 percent to \$174.2 million. Loans to private individuals, however rose marginally by 0.3 percent to \$114.7 million (Graph 30).

Graph 30
Credit Institutions' Loans and Advances by Sector

Capital Adequacy

Credit institutions registered a strong capital adequacy ratio of 25.6 percent in September, against the

minimum requirement of 10 percent (Graph 31).

Graph 31
Capital Adequacy Ratio of Credit Institutions

Asset Quality

Credit institutions’ asset quality was assessed as marginal though classified assets noted a decline.

Classified exposures declined by 5.6 percent to \$29.6 million mainly led by the doubtful and loss categories (Graph 32). The percentage of classified exposures to total loans improved over the quarter by 1.0 percent to 35.5 percent.

Graph 32
Asset Quality of Credit Institutions

Individually assessed and collective provisions totalled \$18.3 million,

representing 61.8 percent of classified loans and were considered adequate.

The number of demand notices issued reduced from 226 to 150, however an increase was noted in the number of restructured credit facilities and the number of mortgage sales in process.

Interest Spread

Interest spread for credit institutions marginally increased over the September quarter by 12 basis points to 7.7 percent. This was due to yield on earning assets registering a greater increase of 1.0 percent to 13.9 percent, while cost of funding liabilities increased by 0.9 percent to 6.2 percent (Graph 33).

Graph 33
Interest Spread of Credit Institutions

Earnings

Credit institutions’ earnings continued to be assessed as satisfactory over the September quarter.

Pre-tax net profits strengthened by 13.5 percent to \$4.3 million (Table 2). In line with the increase, return on assets also increased to 5.3 percent and return on equity to 24.7 percent.

Table 2

Credit Institutions' Income Statement

| Quarter Performance(\$m) | Sep 08 | Jun 09 | Sep 09 | % Change | |
|---------------------------------|--------|--------|--------|----------|-------------|
| | | | | Over Qtr | Over Sep 08 |
| Interest Income | 10.5 | 10.0 | 10.8 | 8.2 | 2.9 |
| Interest Expense | 2.9 | 3.2 | 3.7 | 16.5 | 27.2 |
| Net interest income | 7.6 | 6.8 | 7.1 | 4.4 | (6.3) |
| Add: Non interest income | 0.9 | 1.1 | 0.7 | (34.4) | (25.3) |
| Commission | 0.1 | 0.1 | 0.1 | 14.3 | (39.3) |
| Fee Charges | 0.4 | 0.3 | 0.4 | 25.6 | (3.3) |
| Other income | 0.4 | 0.7 | 0.2 | (66.0) | (44.6) |
| Total operating income | 8.6 | 7.9 | 7.8 | (0.8) | (8.4) |
| Less: Operating expenses | 2.9 | 3.3 | 3.1 | (8.0) | 5.3 |
| Less: Bad Debts & provisions | 0.9 | 0.8 | 0.4 | (41.7) | (48.9) |
| Profit before tax | 4.8 | 3.8 | 4.3 | 13.5 | (9.5) |
| Less: Tax | 0.3 | 3.4 | 1.3 | (62.0) | 379.8 |
| Net profit after tax | 4.5 | 0.4 | 3.0 | 619.4 | (32.7) |

Source: Credit Institutions

The growth in pre-tax profits was largely underpinned by a higher decline in the operating expenses (8.0%), which more than offset the marginal contraction of 0.8 percent recorded in total operating income.

As a result of a larger contraction in operating expenditure than operating income, the efficiency ratio of credit institutions improved by 3.0 percent to 39.3 percent.

Liquidity

Credit institutions' liquidity position continues to be assessed as poor, despite liquid assets improving over the quarter from \$38.0 million to the current \$45.2 million (Graph 34). Likewise liquid assets to total deposits improved from 22.2 percent to 25.5 percent. Liquid assets to total assets also strengthened from 11.7 percent to 13.7 percent.

Graph 34

Credit Institutions' Liquid Assets to Total Deposits

Source: Credit Institutions

The rise in liquid assets was mainly due to increase in deposits with banks to \$18.0 million. Credit institutions' deposits with banks rose in light of the higher interest rates being offered.

Loans-to-deposit ratio improved from 170.3 percent to 162.9 percent.

The maturity profile showed a negative mismatch of \$84.5 million in the short term. As term deposits generally give ample time for the issuer to repay depositors, net maturing obligations were ably managed.

The 15 largest depositors in the review quarter totalled \$46.3 million (\$51.5 million in the June quarter), representing 26.1 percent of total deposits.

Insurance Industry Quarterly Condition Report – June 2009

Overview

The insurance industry continued to be resilient over the June 2009 quarter. The industry solvency surplus however decreased over the quarter by \$0.4 million to \$32.8 million as liabilities and inadmissible assets increased. Both the life and general insurance sectors reported

profits in the second quarter of 2009.

Capital

The life insurance industry recorded a solvency deficit of \$11.4 million against a required solvency margin of \$16.6 million. This was underpinned by decrease in assets whilst actuarial liabilities increased. The solvency deficit when compared to the March 2009 quarter [\$16.8 million] improved due to increase in assets and a decline in inadmissible assets.

The general insurance industry’s solvency surplus increased from \$43.8 million in March 2009 to \$44.2 million as at June 2009.

The capital level of the general insurers remained similar to the March 2009 levels at \$63.1 million. This however decreased by 18.9 percent over the year (Graph 35).

Graph 35
Insurance Industry Actual Capital & Required Capital Levels

Source: Insurance Companies

Assets

Total assets of the life insurers grew by

1.4 percent over the quarter to \$546.9 million mainly driven by the increases in cash on hand and investments. Total assets however declined by 6.0 percent over the year due to decreasing investments and loans.

Investments in government securities recorded an increase of 4.3 percent over the quarter to \$198.3 million. Investments continued to account for a significant portion of total assets of the life insurers at 74.0 percent followed by loans at 17.0 percent (Graph 36).

Graph 36

Distribution of Assets of Life Insurance Companies

Source: Insurance Companies

General insurers’ total assets recorded a marginal decline of 1.1 percent over the quarter to \$258.9 million mainly due to decreases in loans, current assets and fixed assets.

Similar to life insurers, majority of the assets of the general insurance industry are in investments representing 66.7 percent. Within the investment portfolio, bank deposits accounted for the largest share at 78.9 percent (Graph 37).

Graph 37

Distribution of Assets for General Insurance Companies

Actuarial Liabilities

Total liabilities of the life insurance industry marginally grew by 1.1 percent over the quarter to \$527.6 million. The growth was a result of an increase in the balance of revenue account by \$3.6 million.

The balance of the revenue account accounted for the largest share of total liabilities at 94.0 percent followed by borrowings at 1.8 percent and other provisions at 1.7 percent.

General insurers' total liabilities rose by 2.2 percent over the quarter to \$173.7 million underpinned by a decrease in underwriting provisions. However, over the year liabilities recorded a marginal increase of 18.1 percent.

Underwriting provisions of the general insurers increased by 23.1 percent over the year to \$145.6 million as a result of substantial provisions for outstanding claims and unearned premiums. On a quarterly basis, underwriting provisions have fallen by 3.0 percent mainly due to settlement of the flooding claims.

Earnings

The life insurance industry reported a \$2.9 million net profit after tax for the second quarter of 2009 following a net loss after tax position of \$0.3 million in March 2009 quarter. The improved performance was underpinned by the increase in net insurance premiums and revaluation gains.

Asset value appreciation for the review quarter was \$4.2 million compared to a negative \$8.0 million in the previous quarter largely due to appreciation in the value of overseas investments as a result of the devaluation. Net insurance premiums also increased by \$4.2 million to \$23.5 million.

The general insurance industry recorded an after tax profit of \$1.4 million for the second quarter of 2009, an improvement from a net loss of \$6.5 million reported in the March 2009 quarter. The improvement in profit over the quarter is due to lower net claims incurred. Lower net earned premium income, however, subdued the underlying performance of the industry.

Net claims incurred fell to \$13.0 million, down by 41.9 percent over the quarter as there were lower claims by policyholders relating to the 2009 January floods. This improved the underwriting result by \$6.3 million over the quarter to \$1.6 million.

Gross premium income was \$27.7 million in June 2009, down by 2.9 percent over the quarter.

Liquidity

Liquidity position of life insurers remained satisfactory in June 2009 with

liquid assets recorded at \$266.3 million. As at June 2009, liquid assets made up 53.7 percent of the life insurance industry's net statutory liabilities.

Liquid assets of the general insurance industry were recorded at \$159.1 million in June 2009. General insurers continue to hold adequate liquid funds to match short term liabilities of \$94.5 million.

Insurance Brokers

The broking industry recorded a net profit after tax of \$0.7 million for the second quarter of 2009. This compares with \$0.1 million profit recorded in the first quarter. Revenue increased by 32.7 percent to \$3.0 million over the quarter owing to the rise in brokerage earned as commission.

Expenses marginally increased by 1.0 percent over the quarter to \$2.1 million. The efficiency ratio of the broking industry improved to 70.1 percent in June 2009 quarter from 92.1 percent in the

previous quarter.

A total of 164 offshore placement applications totalling \$6.2 million were approved compared to 120 applications with premiums amounting to \$5.0 million approved in the June 2008 quarter.

Table 3

Summary of Offshore Placements

| Category by Insurance Class | Jun-09 \$m | % of Total | Jun- 08 \$m | % of Total |

Source: Reserve Bank of Fiji

For the Record**RBF TO REMOVE CONTROLS FROM JANUARY 2010**

Statement by the Governor of the Reserve Bank of Fiji, 27 November 2009

The Reserve Bank of Fiji Board held its monthly meeting on 26 November 2009. The Governor and Chairman of the Board, Mr. Sada Reddy said that “Foreign reserves have continued to improve since the devaluation to current levels of \$1,085 million, equivalent to close to 4 months of imports. As a result, liquidity in the banking system has also risen to around \$390 million.”

Mr. Reddy noted that with the improvements in the foreign reserves, it was time to remove various direct controls that were put in place in April to assist in economic recovery. “These controls had served their purpose during a period when foreign reserve levels were very low.”

Hence the Board took the following decisions which will be effective from 1 January 2010:

1. Specific Exchange Control transactions will be re-delegated to commercial banks and foreign exchange dealers with increased limits. The Governor noted that in April this year, with low foreign reserves levels, it became necessary for the Reserve Bank to take control of most foreign exchange transactions. The Bank will now increase the delegation limits of specific transactions to the commercial banks and foreign exchange dealers. (See Attachment for the list of transactions and delegated limits).

2. The lending rate and interest rate spread polices will be removed. In April 2009, the Bank announced that the weighted average lending rates of banks and other lending institutions should be brought down to 31 December 2008 levels. All commercial banks have now complied with the lending rate policy of the RBF. In addition, banks are on target to meet the 4 percent interest rate margin policy by December 2009.

In removing the lending rate and interest rate spread policies, Mr. Reddy stated that “all commercial banks are advised to maintain the trend in lending rate and any increase in spread above 4 percent in the future will have to be fully justified and explained to the RBF.”

On the economy, the Governor noted that 2009 was a tough year with the full impact of the global economy and the adverse effects of the floods passing through the economy. This led to the economy to decline by 2.5 percent. As the international economy improves next year, the domestic economy is expected to grow a modest 1.9 percent. As a result of the weak economy, the current account deficit has improved to an estimated 8.6 percent of GDP from 17.7 percent in 2008. Mr. Reddy reiterated the need to reduce the current account deficit to 5 percent of GDP in the medium term.

With the announcement of the National

Budget earlier today, Governor Reddy commended the Government for the bold announcements on much needed

reforms in the economy. He said this augurs well for a sustained economic recovery in the future.

Appendix **Exchange Control Delegated Limits**

The Reserve Bank will increase delegated limits on the following transactions, effective 1 January 2010:

- a) Travel:
 - Delegated limit will be increased from **\$5,000** to **\$10,000** return trip
- b) Charges/Fees/Services
 - Delegated limit will be increased from **\$50,000** to **\$100,000** per invoice
- c) Airline Ticket Sales
 - Delegated limit will be increased from **\$50,000** to **\$100,000** per application
- d) Education/Medical Expenses
 - Delegated limit will be increased from **\$500** to **\$1,000** paid to student/patient
- e) Loan Repayments
 - Delegated limit will be increased from **\$50,000** to **\$100,000** for scheduled principal and interest payments
- f) Lease Payments
 - Delegated limit will be increased from **\$50,000** to **\$100,000** per scheduled payment

The revised amounts are maximum amounts delegated to authorised foreign exchange dealers. Requests for amounts in excess of these must be referred to the Reserve Bank of Fiji.

For the Record**RBF's STATEMENT ON CYCLONE MICK**

Statement by the Governor of the Reserve Bank of Fiji, 16 December 2009

The Governor of the Reserve Bank of Fiji, Mr. Sada Reddy, issued the following statement in relation to 'Cyclone Mick' which affected the main island of Viti Levu, the economic hub of Fiji.

“While it will take the Government teams few days to assess the full impact of the cyclone, initial reports suggest that while no significant damages have been caused to infrastructure, the agricultural sector has suffered major damage especially to food crops. This will have short term effect of vegetable shortages and thus increases in prices of vegetables and other food crops.

The cyclone may have some adverse

effects on tourism and agro-based industries. The full impact on the economy is difficult to assess at this stage but it will have some downside effects.

Governor Reddy, therefore, called on all financial institutions to assist in the quick recovery of the economy by assisting those affected financially by making temporary adjustments to repayments and to extend credit for replanting and business resumptions. He specially requested the insurance companies to assess and settle insurance claims quickly.

Mr. Reddy said all banks should resume full services from today after being closed for business in the last two days.”

For the Record**RBF STATEMENT ON STANDARD AND POORS RATING OF FIJI**

Statement by the Governor of the Reserve Bank of Fiji, 18 December 2009

The Governor of the Reserve Bank of Fiji, Mr. Sada Reddy, welcomed the revision of the outlook for Fiji from negative to stable by Standard and Poors on 16 December 2009.

Mr. Reddy said this comes in the wake of the recent review of the Fiji economy by the International Monetary Fund where the Fund commended the Fiji's authorities for decisive and timely action on monetary

policy front and for keeping fiscal discipline despite the very adverse global and domestic economic conditions.

Mr. Reddy added that the recent stable ratings by Standard and Poors reflects well on the stability of the financial conditions in Fiji; and augurs well for Fiji's international credit ratings in the event Fiji wishes to borrow in the international money markets.

For the Record**NEW POLICY GUIDELINES FOR COMMERCIAL BANKS**

Statement by the Governor of the Reserve Bank of Fiji, 30 December 2009

The Reserve Bank announced the issue of three new policy guidelines for licensed commercial banks following its final Board Meeting for the year on 17 December 2009. The new guidelines, disseminated to commercial banks on 22 December 2009, include the following:-

- Minimum Guidelines for the Establishment of a Local Advisory Board;
- Policy Guideline on Complaints Management; and
- Minimum Requirements for Commercial Banks on Internal Microfinance Divisions and Units.

The Reserve Bank issued these guidelines under its powers in the Reserve Bank of Fiji Act Rev. 1985 and the Banking Act 1995.

The Governor of the Reserve Bank, Mr. Sada Reddy indicated that the guidelines become effective from 1 January 2010 and would apply to existing and any new entrant into Fiji's banking industry. He elaborated that each guideline provides for the establishment of an enabling policy governance structure as well as lays down the minimum operational requirements.

Governor Reddy explained that these guidelines are targeted at promoting broad based economic development and greater financial inclusion. This includes extension of financial services to the informal sector of the economy and ensuring that commercial banks undertake development activities suitable to the

needs of people in Fiji. He also emphasized that the Complaints Management guideline is aimed at improving the efficiency and effectiveness of resolution of customer complaints and consumerism issues by commercial banks as well as credit institutions.

On the Microfinance guideline, Governor Reddy stressed that commercial banks are required to establish internal microfinance divisions and units in existing branches. He added that towns and cities with more than one branch shall establish a single microfinance unit in any one branch which shall be complemented by a microfinance division established at the particular town or city's main branch.

Governor Reddy added that the Microfinance guideline requires commercial banks to innovatively and effectively extend sustainable banking services to Fiji's marginalized, poor communities and individuals as well as small and micro enterprises, and to empower them to participate in economy building and in the development of their welfare. He explained that the guideline encourages a greater role for commercial banks in promoting financial inclusion.

The guideline on Local Advisory Board applies specifically to foreign bank operations. Governor Reddy said this guideline aims to assist the banks to better understand and align their strategies to Fiji's regulatory and supervisory environment as well as national development objectives, including those

on the provision of financial services to the wider community.

He added that the guideline requires Local Advisory Board members to have sufficient knowledge and understanding of Fiji's business and socio-economic environment and the banking industry, as well as an awareness of the long term growth strategies of the Government. The guideline requires the members to meet Reserve Bank's fit and proper requirements.

In issuing the Complaints Management guideline, Governor Reddy said the aim was to ensure the customer complaints that commercial banks and licensed credit institutions receive are addressed efficiently and effectively. The guideline should provide customers with confidence

that their complaints will be given due consideration.

Under the guideline, the Board of commercial banks and licensed credit institutions, or its proxy is required to approve the policy framework for complaints management, clearly defining the responsibilities for senior management and complaints handling staff. Governor Reddy stressed that it is imperative that clear delegation of authority for complaints handling is established and that adequate training is provided to complaints handling staff. All branches must keep a Complaints Register while a Master Register is kept at the head office. The banks and credit institutions are encouraged to undertake public awareness campaigns on their complaints management framework.

For the Record**RBF ANNOUNCES THE ESTABLISHMENT OF AN INTERAGENCY COMMITTEE TO GUIDE THE WORK OF THE EXPORT PROCEEDS MONITORING UNIT**

Statement by the Governor of the Reserve Bank of Fiji, 15 January 2010

The Reserve Bank of Fiji (RBF) today announced the establishment of an Interagency Committee to strengthen the role of the Export Proceeds Monitoring Unit (EPMU). The Interagency Committee includes senior representatives from the Fiji Islands Revenue and Customs Authority (FIRCA), the Financial Intelligence Unit (FIU) and the RBF. The EPMU based in the Reserve Bank will be appropriately manned with competent personnel.

The Governor, Mr. Sada Reddy, said that, “Given the importance of exports proceeds to Fiji, there is a need to approach this task in a coordinated fashion. In this regard, the Interagency Committee will ensure that information exchanged between the three agencies so that any investigation is effective and

avoids any duplication of work”.

Shortly the Committee will prepare a Memorandum of Understanding which will guide the three agencies involved in the exchange of information and collaborative work.

The EPMU, as announced by the Prime Minister and Minister of Finance in his 2010 Budget Address, is charged with the responsibility of ensuring all export proceeds are remitted to Fiji in compliance with the Exchange Control (EC) Act, Cap 211. The work of this Unit will also benefit other cross border trade and tax compliance issues.

Governor Reddy added that the EPMU will also carry out investigations into **transfer pricing** and **over-invoicing of imports**.

Note:

^{1/} From 1997, credit to the private sector is adjusted for NBF Asset Management Bank's non-performing loans and advances.

Differences from previously published tables reflect re-classification of data for Commercial Banks' Assets and Liabilities.

^{2/} Foreign Assets RBF (net) includes crown agent balance.^{3/} Held outside of the banking system.

Note:

^{1/} As defined under the Section 43 of the RBF Act. Since 1996, when the National Bank of Fiji Restructuring Act became effective, Section 31 exempts the NBF Assets Management Bank from holding Statutory Reserve Deposit and Unimpaired Liquid Asset. Certain columns. (previously numbered 6,7,8,14,15,16) have been eliminated with effect from August 2000.

^{2/} Balances at the end of the review month.

^{3/} Refers to the total only and not individual items. The total is derived as 10% of commercial banks deposits and similar liabilities at the end of the previous month.

^{4/} Balances of deposits and related liabilities as at the end of the previous month.

Note:

^{1/} •n.i : no issues

•n.t : no trading

^{2/} •Represents monthly weighted average rate.^{3/} •Prior to October 2006, Minimum Lending Rate (MLR) = Repurchase Facility Rate (Policy Indicator Rate + 100 basis points).

• From October 2006, MLR = Policy Indicator Rate + 100 basis points and Repurchase Facility Rate = latest weighted average overnight interbank rate + 100 basis points.

• From October 2007, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 5 percentage points).

• From January 2009, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 2 percentage points).

• From October 2007, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 5 percentage points).

• From January 2009, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 2 percentage points).
