

Revisions to GDP Forecasts-Fiji

GDP growth forecast for 2023 revised upward

Sectors largely underpinning the 8.2% growth forecast for 2023

*pp means percentage points

Sectors that will contribute the most to the 3.4% growth forecast for 2024

Other sectors forecast to contribute positively to growth in 2024 are the wholesale & retail, accommodation, agriculture, information & communication, and electricity sectors

RISKS TO THE OUTLOOK

Fragile global economy

Rising global commodity prices

Loss of domestic skilled workers

Increasing cost of doing business

Natural Disasters

Economic activity needs to push above trend

To compensate lost economic outputs in 2020-21

To rebuild fiscal buffers for future economic shocks
