

# RBF QUARTERLY ECONOMIC REVIEW

## Overview at glance - December 2025

### International Economy

The IMF in its January WEO, estimated global economic growth at 3.3 percent in 2025 and projects the same rate for 2026, before moderating slightly to 3.2 percent in 2027.

#### World GDP Growth Rates

Year	GDP Growth Rate (%)
2019	2.8
2020	-2.7
2021	6.5
2022	3.5
2023	3.5
2024	3.3
2025e	3.3
2026f	3.3
2027f	3.2

### Commodity Prices (Dec-end: q-o-q)

#### Export Commodities

<b>Gold</b> US\$4,341.1 per fine ounce <b>12.1%</b>	<b>Sugar</b> US\$15.0 cents per pound <b>-9.6%</b>
---	--

---

#### Import Commodities

<b>Brent Crude Oil</b> US\$60.85 per barrel <b>-9.2%</b>	<b>FAO Food Index</b> 124.3 points <b>-3.3%</b>
--	---

## Fijian Economy

### Fiji's GDP

Year	GDP Growth Rate (%)
2024p	3.5%
2025e	3.4%
2026f	3.0%

Key sectors for 2025 growth:

- Public administration
- Wholesale & retail trade
- Finance & insurance
- Transport
- Accommodation
- Information & communication

### Domestic Indicators in 2025 (y-o-y)

Sectoral performances:	Investment related activity:	Consumption activity:
<b>Visitor Arrivals</b> 0.3%	<b>New Investment Lending (excl refinancing)</b> 0.2%	<b>Net VAT Collections:</b> -3.8%
<b>Electricity Production</b> 0.7%	<b>Building Materials Price Index</b> 0.9%	<b>New Consumption Lending:</b> 23.6% (excl refinancing)
<b>Gold Ore</b> -28.2%	<b>Building Permits Issued (number of permits)</b> 10.4% (Sept qtr of 2025)	<b>Vehicle Registrations:</b> 23.6%
<b>Timber Industry:</b>	<b>Estimated Value of Work Put-in-Place</b> 20.4% (Sept qtr of 2025)	<b>Public Finance Government Debt:</b> (First 4 months of fiscal year 2025-26) 79.6% (of GDP)
<b>Woodchip</b> -0.7%		
<b>Sawn</b> -7.1%		
<b>Mahogany</b> 46.2%		
<b>Sugar Industry: (End of crushing season)</b>		
<b>Cane</b> 9.6%		
<b>Sugar</b> -12.5%		

### Labour Market in 2025 (y-o-y)

**RBF Job Advertisements Survey:** -4.1%

**Resident Departures for Employment (one year and above):** -15.5% departing citizens

### External Sector (y-o-y)

**Trade Deficit: (cum. to Nov)** 10.3%

**Imports** 6.6%

**Exports** 0.5%

**Tourism Earnings (cum. to Sept Qtr)** 11.3%

**Net Remittances (2025)** -1.2%

### Financial Sector (y-o-y)

**Liquidity (31/12)** \$1.9 billion

**Broad Money (2025)** 10.4%

**Private-Sector Credit (2025)** 8.4%

## Monetary Policy Twin Objectives (2025)

**1 Annual Headline Inflation (y-o-y)** 0.0% (-0.2% in 2024)

**2 Foreign Reserves (RBF Holdings)** \$3.7 billion (5.6 MORI\*)

**Drivers of lower inflation outcome:**

Subdued global oil prices has kept costs down in categories closely linked to fuel such as:

- transport and;
- housing & utilities.

## Overnight Policy Rate

**The RBF Board maintained the Overnight Policy Rate at 0.25% in 2025.**

## OVERVIEW

---

The International Monetary Fund's January 2026 World Economic outlook estimates global economic growth at 3.3 percent in 2025, with a similar outcome anticipated for 2026.<sup>1</sup> The outlook reflects ongoing investment in technology, supportive fiscal and monetary policies, favourable financial conditions, and private sector resilience. Global headline inflation is forecast to moderate to 3.8 percent in 2026 from 4.1 percent in 2025 as most major economies are expected to return to their inflation targets. The United States (US) economy remains an exception, where the impact of higher tariff pass-through into domestic prices is anticipated to slow progress toward target inflation.

Domestically, growth momentum is sustained and estimated at 3.4 percent for 2025, marking the fourth consecutive year of expansion following the provisional 3.5 percent growth recorded in 2024. This estimate reflects a modest upward revision from the June 2025 projection of 3.2 percent, based on newly updated data.<sup>2</sup>

Sectoral outcomes in 2025 were mixed but positive, despite industry-specific challenges. In 2025 visitor arrivals reached a new peak of 986,367, reflecting a modest 0.3 percent increase, following a strong 5.7 percent expansion in 2024. Growth was primarily driven by arrivals from the US (9.6%), the United Kingdom (12.7%), Europe (7.4%), and Pacific Island Countries (3.7%). In addition, electricity production rose (0.7%) in 2025 despite a

decline in renewable energy generation (-2.3%), which accounted for 53.0 percent of total electricity output. Similarly, electricity consumption also increased (2.2%), owing to additional household connections leading to higher domestic consumption up to October.

Primary and industrial sector performances varied. In the 2025 crushing season, the sugar industry recorded an increase in cane output (9.6%), however, sugar production declined (12.5%) due to poor cane quality and adverse weather. In the same period, the timber industry recorded mixed outcomes, with strong growth in mahogany production (46.2%), while weaker performance was noted for woodchip (-0.7%) and sawn timber (-7.1%) production. Mineral water production fell (11.2%) owing to weaker demand from the US as well as scheduled plant maintenance spread throughout the year. Gold ore output also fell (-28.2%) in the same period, driven by Vatukoula Gold Mine Limited's (VGML) strategic reprioritisation to gold concentrates.

Consumption activity remained robust in 2025, as revealed by partial indicators. New consumption lending increased by 23.6 percent in 2025, while household spending was further supported by stable remittance inflows (2.2%), higher incomes reflected by the rise in Pay As You Earn (PAYE) tax collections (17.0%), increased government spending, and the reduced VAT rate. Although net VAT collections

---

<sup>1</sup> The projection for 2025 and 2026 has been slightly revised upwards by 0.1 and 0.2 percentage points (pp) from the October 2025 WEO.

<sup>2</sup> Economic projections have been revised using the 2019 GDP base released by the Fiji Bureau of Statistics in September 2025, along with additional recent data and industry feedback.

fell by 3.8 percent due to higher refunds (9.8%) and the lower VAT rate, the underlying trend was positive. After adjusting for these effects, real net VAT collections grew by 4.9 percent, indicating firm consumption activity.<sup>3</sup> Other indicators reinforced this strength. Vehicle registrations rose by 23.6 percent, driven by growth in both new (27.0%) and second-hand (21.3%) vehicles. In addition, sales and services income increased by 5.0 percent (Wholesale & Retail Sales Survey, cumulative to September 2025), confirming resilient demand throughout the year.

Investment activity picked up in 2025, supported by a moderation in construction prices and some improvement in labour supply. New investment lending<sup>4</sup> rose marginally (0.2%) in 2025, supported by higher credit to the real estate and private individual's categories. Cumulative to September, the volume of building permits issued increased (10.4%) while its value fell (-3.6%) while the value of work put-in-place grew strongly (20.4%), reflected in a sharp rise in the value of completion certificates issued (167.8%). This outcome mirrored a modest increase in average building material prices (0.9% in 2025) and improved investor confidence. However, Cement sales declined (-2.1%) due to production issues in the earlier part of the year and partly due to a shift towards prefabricated materials (43.5%), driving higher imports of construction materials (5.4%).<sup>5</sup>

Labour market conditions continued to ease in 2025, although sector-specific challenges and concerns about labour quality persist. Job advertisements<sup>6</sup> declined by 4.1 percent, signalling softer demand for labour. This easing is also reflected in the formal employee registration (0.3%) which grew marginally up to November 2025. In contrast wages paid (9.0%) noted a stronger growth over the same period, suggesting retention strategies by firms. The higher wages payouts were reflected in a notable rise in the PAYE tax collections (17.0%) in 2025.

In the same period, fewer residents left for overseas employment (-15.5%) and ongoing labour imports dropped sharply (-87.4%) helping to ease vacancy pressures. Nevertheless, departures under the labour mobility schemes increased by 1.8 percent, driven by a sharp rise in PALM's<sup>7</sup> short-term placements (32.0%).

On the prices front, official data<sup>8</sup> noted that annual headline inflation settled at zero percent in December 2025, up from the -1.4 percent in November and -0.2 percent in December 2024. Overall food prices were unchanged, while declines in furnishing & maintenance, transport, and housing & utilities offset higher prices for sin goods<sup>9</sup>, restaurants, and other miscellaneous items. Year-end inflation for 2026 is currently projected at 2.5 percent, barring any external shock or changes to domestic policies.

<sup>3</sup> Deflated by the annual average VAT rate and inflation for 2025.

<sup>4</sup> Excluding refinance.

<sup>5</sup> Imports of construction related materials data up to October.

<sup>6</sup> The job advertisements survey collects vacancies from both the Fiji Sun and Fiji Times.

<sup>7</sup> Pacific Australia Labour Mobility.

<sup>8</sup> Official inflation statistics is released by the Fiji Bureau of Statistics.

<sup>9</sup> Sin goods, also referred to as demerit goods, are products considered harmful to individuals or society, such as tobacco and alcohol.

Financial conditions remained conducive in 2025 underpinned by strong credit and ample liquidity (\$1.9b), contributing to a historically low-interest rate environment. Broad money increased by 10.4 percent in December 2025, led by persistent growth in private sector credit (8.4%) mostly to real estate; wholesale, retail, hotels & restaurants; and building & construction sectors.

On the external front, Fiji's merchandise trade deficit widened by 10.3 percent in the year to November. This was attributed to a strong surge in merchandise imports (6.6% to \$6,683.8m) which outweighed the marginal growth in exports (0.5% to \$2,344.0m). In 2025, inward personal remittances rose (2.2%), totalling \$1,358.1 million, with mobile network operators being the main platform used for transactions. At the same time, outward

remittances increased by a notable 7.9 percent to \$539.9 million, resulting in marginal contraction in net remittances.

Cumulative to September quarter, tourism earnings reached \$2,101.9 million, a growth of 11.3 percent compared to the same period last year, with the September quarter alone reaching the highest at \$918.4 million, a 25.7 percent growth compared to the same period in 2024.

Foreign reserves (RBF holdings) settled at \$3,709.6 million at the end of 2025 sufficient to cover 5.6 months of retained imports (MORI).

Given the current stability and outlook for inflation and foreign reserves, the RBF maintained the OPR at 0.25 percent throughout 2025.

## THE INTERNATIONAL ECONOMY

### International Economic Conditions

The IMF in its 2026 January WEO estimated global growth at 3.3 percent for 2025 and envisaged a similar outcome in 2026, representing a modest increase from the October 2025 forecast (by 0.1 percentage points (pp) and 0.2pp, respectively) (Graph 1). This modest improvement is supported by ongoing technology investments, fiscal and monetary stimulus, favourable financial conditions, and better than anticipated private sector adaptability, which collectively help counteract the impact of shifting trade policies.

Source: IMF WEO, January 2026  
e- estimate  
f- forecast

Global headline inflation is expected to ease from an estimated 4.1 percent in 2025 to 3.8 percent in 2026. These projections are broadly consistent with the October WEO, supported by softening demand and lower energy prices.

In the review period, growth rates among Fiji's trading partner economies (TPEs) remained positive, except for Japan, which experienced a contraction (Table 1).

Table 1  
TPEs' Summary Indicators Table

TPEs	Summary Indicators		
	Quarterly GDP (q-o-q)	Inflation Rate (y-o-y)	Unemployment Rate (y-o-y)
US	4.4 Q2 2025: 3.8%	2.7 Sept: 3.0%	4.4 Sept: 4.4%
Euro Area	0.3 Q2 2025: 0.1%	1.9 Sept: 2.2%	6.3 Sept: 6.4%
Japan	-0.6 Q2 2025: 0.5%	2.1 Sept: 2.9%	2.6 Sept: 2.6%
China	1.2 Q3 2025: 1.1%	0.8 Sept: -0.3%	5.1 Sept: 5.2%
Australia	0.4 Q2 2025: 0.7%	3.8 Sept: 3.6%	4.1 Sept: 4.3%
NZ	1.1 Q2 2025: -1.0%	3.1 Q2 2025: 3.0%	5.3 Q2 2025: 5.2%

Source: Trading Economics Website

The US economy expanded by 4.4 percent in the September quarter 2025 (from 3.8% in June), supported by strong performance in consumer spending, exports and government spending. Similarly the Euro Area's economy grew by 0.3 percent (from 0.1% in the June quarter), driven by a rebound in fixed investment and stronger government spending. Australia's economy also expanded by 0.4 percent in the third quarter of 2025, easing from 0.7 percent in the previous quarter. A sharp decline in household consumption drove the slowdown, as discretionary spending cooled following a strong Easter-related boost in the prior quarter.

The New Zealand (NZ) economy expanded by 1.1 percent over the same period rebounding from a 1.0 percent contraction in quarter two supported by a rise in business services and manufacturing and construction. China's economy grew 1.2 percent in quarter 4 (from 1.1% in September), supported by policy measures, including liquidity injections to stabilise credit markets and government-subsidised consumer trade-in program to counter deflation amid weak domestic demand. On the contrary, Japan's economy contracted by 0.6 percent in the September quarter, a reversal from the 0.5 percent growth seen in the June quarter, with the decline largely attributed to slower business spending due to ongoing pressures from higher borrowing costs. Furthermore, unemployment rates among Fiji's TPEs mainly remained unchanged in the December quarter from the September quarter.

Annual headline inflation is steadily aligning with central bank targets in most countries. In the US, the inflation rate fell slightly to 2.7 percent in December 2025 (from 3.0% in September), due to lower price increases for apparel and new vehicles. In the Euro Area, inflation eased to 1.9 percent in December 2025 (from 2.2% in September), slightly below the European Central Bank's (ECB) midpoint target. Similarly, Australia's inflation rose to 3.8 percent in December (from 3.6% in September) as housing prices rose modestly. On the other hand, China's inflation edged higher to 0.8 percent in

December (from -0.3% in September), underpinned by consumer inflation for foods (fresh vegetables and fruits). In quarter three, NZ's inflation increased to 3.1 percent, largely on account of increases in electricity, council rates, and housing rental costs. Japan's inflation rate eased to 2.1 percent from 2.9 percent in the September quarter.

During the quarter, most TPEs' central banks either lowered or kept key interest rates unchanged, excluding the Bank of Japan. (Table 2).

Table 2  
TPEs' Policy Interest Rates

Central Bank	Policy Interest Rate (%)		
	Oct	Nov	Dec
The US Federal Reserve	↓ 3.75-4.00	3.75-4.00	↓ 3.50-3.75
Reserve Bank of Australia	3.60	3.60	3.60
Reserve Bank of New Zealand	↓ 2.50	↓ 2.25	2.25
European Central Bank	2.15	2.15	2.15
Bank of Japan	0.50	0.50	↑ 0.75
People's Bank of China	3.00	3.00	3.00

Source: Various Central Bank websites.

The US Federal Reserve cut the fed funds rate twice by 25 basis points (bps) in October and again in December, bringing it to the 3.50 - 3.75 percent target range. Similarly, the Reserve Bank of NZ lowered its official cash rate by 50 bps in October and by 25 bps in November, bringing the rate to 2.25 percent. The ECB, Reserve Bank of Australia and People’s Bank of China kept their rates unchanged from the September quarter at 2.15 percent, 3.6 percent and 3.0 percent, respectively, in their December meeting. On the other hand, the Bank of Japan increased its interest rate to 0.75 percent in December (from 0.5% in September), to achieve sustainable price stability.

**Commodity prices** edged lower over the quarter for all except gold, which rose throughout 2025, supporting export receipts.

**World sugar prices**<sup>10</sup> fell over the quarter by 9.6 percent, settling at US15.0 cents per pound at December-end. The price drop was driven by anticipated oversupply from Brazil and a production rebound in India (Graph 2).

Graph 2  
**Sugar Price**  
 (Quarter End)

**Gold prices** surged by 12.1 percent over the quarter, continuing its upward trajectory, reaching US\$4,341.1 per fine ounce at the end of December. Gold prices remained elevated due to the Federal Reserve’s December rate reduction, expectations of further cuts, a weaker US dollar, persistent geopolitical tensions, continued central bank purchases, and robust safe-haven demand (Graph 3).

Graph 3  
**Gold Price**  
 (Quarter End)

**Brent crude oil prices** fell further by 9.2 percent over the December quarter to US\$60.85 per barrel, amid oversupply expectations and stagnant demand outlook. The US acquisition of Venezuela boosted expectations of higher 2026 oil supply, whilst emerging tensions in Iran exerted some offsetting upwards pressure on prices in early 2026. (Graph 4).

Graph 4  
**Crude Oil Price**  
 (Quarter End)

<sup>10</sup> Month-end world market sugar prices per the New York No. 11 benchmark.

**Global food prices**<sup>11</sup> dropped by 3.3 percent in December to 124.3 points, compared to the previous quarter-end (Graph 5). The outcome was led by a decline in prices for all categories except for cereals price, which noted an increase.

Graph 5

<sup>11</sup> As measured by the Food and Agriculture Organisation (FAO) Food Price Index.

## THE DOMESTIC ECONOMY

### Domestic Economic Conditions

The Fijian economy is estimated to have grown by 3.4 percent in 2025, driven primarily by the public administration, wholesale and retail trade, finance and insurance, transport, accommodation, and the information and communication sectors. This marks the fourth consecutive year of expansion, following the 3.5 percent growth in 2024. Despite the challenging global economic conditions throughout 2025, domestic activity remained resilient, supported by the reduction in the VAT rate and the increase in civil service pay, both of which helped strengthen household demand and sustain overall economic momentum.

Over the 2026–2028 period, the economy is projected to expand at a broad-based rate of 3.0 percent, signalling a normalisation towards long-term growth. Over the forecast horizon, the service-related sectors are expected to remain the main drivers of growth, supported by steady contributions from the industrial and primary sectors.

### Production

Despite persistent challenges in the global economic environment, the Fijian economy continued to demonstrate resilience, with sectoral outcomes generally positive and supporting a fourth year of economic expansion.

The tourism sector achieved a new record in 2025 supported by stronger visitor arrivals in most months compared with 2024. Overall sector performance remained positive despite early-year softness, subdued demand from traditional source markets, and ongoing structural challenges. Notably, year-end visitor arrivals registered only marginal growth; however, this was sufficient to deliver another record year for the industry. While the outlook is favourable, concerns regarding the sustainability of this growth trajectory persist.

In 2025, total **visitor arrivals** reached 986,367 visitors, representing a modest annual increase of 0.3 percent. This growth was driven by continued gains from the United States (9.6%; 1.1pp), the United Kingdom and Europe (8.9%; 0.4pp), and Pacific Island Countries (3.7%; 0.2pp). In contrast, arrivals from Australia (-0.6%; -0.3 pp), New Zealand (-2.9%; -0.7pp), and Asian markets (-6.3%; -0.4pp) remained subdued.

Graph 7  
Monthly Visitor Arrivals

Source: FBoS  
p - provisional

The **sugar industry** recorded an improvement in cane output, although sugar production declined due to poor cane quality and unfavourable weather conditions. As of 5 January 2026, total cane crushed reached 1,458,952 tonnes, reflecting an annual growth of 9.6 percent, a turnaround from the 15.0 percent decline recorded during the 2024 crushing season. In contrast, sugar production fell by 12.5 percent to 110,453 tonnes, following on from the 9.6 percent contraction (126,184 tonnes) in the comparable period of the previous season. The outcome was on account of adverse weather conditions that affected cane harvesting as well as poor quality cane supplied to the mills.

**Electricity** production rose slightly (0.7%) in 2025 to 1,163,369 Megawatts per hour (MWh), compared to the 10.6

percent increase in 2024 (Graph 8). While total renewable energy generation fell by 2.3 percent, it still, accounted for 53.0 percent, a little over half of total electricity produced.

Graph 8  
Electricity Production

Source: EFL

In 2025, the **timber industry** recorded mixed outcomes, with strong mahogany production, while woodchip and sawn timber outputs declined.

Mahogany output increased sharply by 46.2 percent in 2025 to 39,627.3 cubic metres, reversing the contraction recorded in 2024 (-19.2% to 27,105.2 cubic metres). This strong performance was driven by favourable weather, that enabled uninterrupted harvesting and the resumption of operations at several stations. Pine wood production maintained strong momentum over the same period, increasing by 65.8 percent to 301,159 tonnes, a sharp rebound from the 34.5 percent decline recorded in the previous year (181,686 tonnes). This outcome was largely driven by higher pulp production, which accounted for 84.0 percent of total production, followed by sawlogs at 15.7 percent. In contrast, woodchip production declined by 0.7 percent during the 2025 season after three consecutive months of contraction, reflecting supply constraints. Similarly, sawn timber output fell by 7.1 percent to

25,770 cubic metres, as no production was recorded in November.

Gold ore output fell by an annual 28.2 percent to 20,292 ounces (oz) in 2025, driven by Vatukoula Gold Mines Limited (VGML's) continued weak ore production amid its strategic shift towards gold concentrates. VGML's ore output plunged by 62.4 percent to 6,376oz, while its concentrate production surged to 12,405oz, nearly double its ore output, underscoring the strategic reprioritisation. In contrast, Tuvatu Gold Mine sustained a buoyant growth, with ore production rising by 23.1 percent to 13,916oz, accounting for 68.6 percent of total ore output. Nonetheless, Tuvatu's ore output was insufficient to offset the declines in ore production by VGML (Graph 9).

Graph 9  
Gold Ore Production

Sources: VGML and Lion One Metals

**Mineral water** production fell in 2025 by an annual 11.2 percent compared to 2024 (-2.8%). Weaker demand from the US market and scheduled plant maintenance carried throughout the year, weighed on overall output.

## Consumption

Higher incomes, remittance inflows and government spending drove consumption activity in 2025.

New consumption related lending,<sup>12</sup> a key indicator of consumer activity, increased by 23.6 percent in 2025, reaching \$2,334.8 million from \$1,889.2 million in 2024. This growth was driven by higher lending to the wholesale, retail, hotels and restaurants (WRHR) sector (24.3% to \$1,992.3m) and private individuals' category (19.5% to \$342.5m). After adjusting for price effects, real growth was stronger at 25.3 percent.

On the contrary, net VAT collections (on a nominal basis) declined by 3.8 percent in 2025 to \$1,442.1 million, from \$1,498.7 million in 2024, largely reflecting the reduction in the VAT rate from 15.0 percent to 12.5 percent effective from August 2025. While domestic VAT collections edged up by 1.7 percent to \$969.4 million, this increase was insufficient to offset weaker customs VAT receipts (-3.3% to \$904.2m) and higher VAT refunds,

<sup>12</sup> Excluding refinance.

which rose by 9.8 percent to \$437.9 million. Although net VAT collections fell in nominal terms, adjusting for VAT rate and price changes indicates stronger consumption activity, with real net VAT collections increasing by 4.9 percent.<sup>13</sup>

Graph 10  
Net VAT Collections

Source: FRCS

Vehicle registrations increased (23.6%) to 15,162 in 2025, supported by growth in both second-hand vehicles (21.3% to 8,761 registrations) and new vehicles (27.0% to 6,491 registrations). This suggests that while households continue to purchase big-ticket items, there is a growing preference for used vehicles, consistent with cost-conscious spending behaviour amid persistently elevated prices.

Electricity consumption expanded by 2.2 percent (to 926,822 MWh) cumulative to October, partially driven by additional households connecting to the EFL grid (1.7%), which is reflected in the increase noted in domestic consumption category (Graph 11).

Graph 11  
Electricity Consumption  
(Jan-Oct)

Source: EFL

Cumulative to the third quarter of 2025, the Wholesale and Retail Trade (WRT) sector reflected strong consumption activity, with total sales and services income rising by 5.0 percent to \$5,265.3 million, up from \$5,013.5 million (3.9%) in the comparable period of 2024. The increase was largely driven by higher earnings from the wholesale of motor vehicles, wholesale of food and non-alcoholic beverages, retail sale of hardware, paints & glass in specialised stores, retail sale of automotive fuel, retail sale of food, beverages or tobacco in non-specialised stores, wholesale of pharmaceutical supplies & cosmetics, and the wholesale of motor vehicle parts and accessories.

In real terms, WRT sales income grew at a higher rate of 6.4 percent, largely reflecting the impact of the VAT rate reduction implemented in August, which helped moderate prices to some extent.

<sup>13</sup> Nominal net VAT deflated by annual average VAT rate and CPI.

## Investment

Monitored partial indicators suggest a pick-up in investment activity in 2025.

New investment lending (excluding refinancing) increased marginally by 0.2 percent to \$961.7 million in 2025, mostly driven by higher lending to the real estate (3.5% to \$519.0m) and private individuals (10.6% to 149.0m) categories which slightly offset reduced lending to the building & construction sector (-9.1% to \$293.7m). Adjusting for price effects, new investment-related lending is noted to have declined by 0.7 percent in real terms.

In 2025, building material prices increased by an average 0.9 percent, a slower increase than the 1.2 percent recorded in 2024, and partly reflective of the reduction in the VAT rate. Nonetheless, the annual increase was driven by higher prices for cement & related materials (1.0%), wood & related materials (6.5%), and door & window frames (3.8%).

Cumulative to October, domestic cement sales declined by an annual 2.1 percent, to 104,400 tonnes, reversing the 11.2 percent growth recorded over the same period in 2024. This contraction was largely driven by a 31.8 percent drop in sales by Pacific Cement Limited (PCL), which holds about 70.0 percent market share,<sup>14</sup> following a near three-month mill shutdown that disrupted production.<sup>15</sup> Excluding the months affected by PCL's closure, cement sales to October would have increased by 4.9 percent year on year, underpinned by a

75.4 percent rise in TCL's sales, which partly compensated for the decline in PCL's sales (19.1%).

In the same period, construction related imports increased by 5.4 percent to \$4.3 billion, driven by higher demand for key inputs, including general industrial and specialised industrial equipment, iron and steel, other manufactured metals, and prefabricated building materials, indicating continued construction activity and greater use of cost-efficient building methods.

Cumulative to September, the building and construction survey indicates that the number of building permits issued rose by 10.4 percent to 830, signalling stronger construction activity ahead, supported by higher permits for new buildings and for alterations and repairs. In contrast, the total value of permits issued declined by 3.6 percent to \$413.4 million from \$429.0 million in the same period of 2024, suggesting that upcoming projects may be smaller in scale.

Over the same period, the number of completion certificates issued fell by 25.1 percent to 188, reflecting fewer completions across new buildings, additions, and repair works. Despite the decline in volumes, the total value of completions surged by 167.8 percent to \$179.8 million, driven largely by high value commercial building projects, with real values increasing by 162.6 percent to \$129.3 million.

Consistent with this trend, the total value of work put in place rose by 20.4 percent year on year to \$448.1 million cumulative to the third quarter of 2025, and by 21.4

<sup>14</sup> Based on a 10 year average (2015-2024).

<sup>15</sup> PCL had suspended its cement production in mid-March following a mill breakdown. Operations resumed from mid-June.

percent quarter on quarter. Growth was supported by higher activity in both the private (15.9%) and public sectors (26.4%). Private construction recorded gains in new buildings, maintenance, and civil works, while public sector growth was led by repairs and civil engineering, despite a contraction in new buildings. In real terms, total work put in place increased by 18.0 percent to \$322.2 million.

Graph 12

### Public Finance

On the fiscal front, in the first four months of the fiscal year (FY) 2025-26,<sup>16</sup> the government recorded a net deficit of \$25.8 million (or -0.2% of GDP) compared to the surplus of \$93.7 million (0.7% of GDP) noted in the same period of FY2024-25. This shift reflects an increase in government expenditure by 8.1 percent (to \$1,402.0m, +\$105.0m, 10.0% of GDP) on account of higher operational expenditure (21.8% to \$1,213.2m). This increase more than offset revenue collections which slightly dipped by 1.0 percent (to \$1,376.2m, -\$14.5m, 9.8% of GDP) mainly due to lower receipts from indirect taxes

(-6.7%) compared to the same period last year. Meanwhile, capital spending (-37.3% to \$188.8m) remained subdued in the same period due to slower project implementation and reduced transfer payments allocated for capital projects.<sup>17</sup>

**Government debt** stood at \$10,933.8 million in December 2025, or 79.6 percent of GDP<sup>18</sup> (Graph 13). Domestic debt totalled \$7,271.2 million (53.0% of GDP), while external debt stood at \$3,662.7 million (26.7% of GDP).

Graph 13  
Government Debt

### Labour Market

While labour shortages persist in certain sectors, overall labour market conditions appear to be easing, reflected in declining hiring intentions, fewer residents leaving the workforce, and weaker demand for foreign labour.

In 2025, job advertisements declined by 4.1 percent to 13,638 vacancies, representing a smaller contraction than the 11.6 percent reduction recorded over the same period in 2024 (14,220 vacancies). Lower recruitment intentions were most evident in agriculture, forestry

<sup>16</sup> Fiji's FY runs from August to July.

<sup>17</sup> Reason as per the Ministry of Finance Quarter 1 report.

<sup>18</sup> Based on Nominal GDP.

& fishing, finance, insurance, real estate & business services, and the wholesale and retail trade and hotels and restaurants sectors. In contrast, vacancies increased in construction, manufacturing, community, social & personal services, and mining & quarrying sectors, pointing to ongoing labour shortages in these industries. Additionally, pooled recruitment drives resulted in 1,348 advertisements from the Ministry of Health and 102 from the Ministry of Education, reflecting elevated staff turnover, likely due to overseas migration and retirements.

As for migration,<sup>19</sup> resident departures declined by 7.7 percent to 10,933 citizens in 2025, compared to 2024 (-39.1%). The reduction was driven by fewer departures for employment (-15.5%, -833 citizens), education & training (-5.4%, -130 citizens), and emigration (-2.4, -52 citizens). In contrast, departures classified under other purposes<sup>20</sup> increased (4.4%; 80 citizens), marking the first rise in this category since 2022.

Additionally, after two consecutive years of contractions, employment-related departures under labour mobility schemes increased by 1.8 percent in 2025 to 2,300 citizens, reversing the sharp contraction recorded in 2024 (-31.0%; 2,260 citizens). This recovery was driven by a substantial rise in the short-term PALM programme (32.0%), which more than offset reductions in the RSE<sup>21</sup> scheme (-10.6%) and the long-term PALM programme (-15.9%).

As of November 2025, formal employment recorded a slight annual

growth of 0.3 percent to 203,849 workers, according to FNPF<sup>22</sup> data, although this was markedly slower than the 4.2 percent expansion observed over the same period in 2024. Employment gains were mainly driven by the accommodation & food service activities, followed by administrative & support services, financial & insurance, and the WRT, repair of motor vehicles & motorcycles category.

Over the same period, formal sector wages rose by 9.0 percent to \$4,376.0 million but moderated compared with the 11.4 percent increase recorded up to November 2024. The public administration & defence; compulsory social security; WRT; repair of motor vehicles & motorcycles; and accommodation & food service activities sectors largely contributed to this outcome. Consistent with these developments, PAYE tax collections recorded a strong growth of 17.0 percent, reaching \$255.6 million in 2025.

Meanwhile, labour importation declined sharply in 2025, with approved foreign work permits falling by 87.4 percent to 604 permits, reversing the growth (31.2%) recorded in 2024. The contraction was broad-based across occupations, particularly in construction, building & skilled trades, creative, media & entertainment, management & leadership positions and engineering, technical & Information Technology fields. The largest reductions in foreign worker approvals were recorded from Bangladesh, China, and India.

<sup>19</sup> Departure for one year and above.

Graph 15

Source: FBoS

**Inflation**

In 2025, growth in overall prices levelled out at zero percent compared to the year before (-0.2%). While prices for food and everyday beverages remained steady (0.1% in 2025, from 0.8% last year), the biggest relief has come from subdued global oil prices which kept costs down in categories closely linked to fuel such as transport (-0.8pp) and housing & utilities (-0.3pp). These balanced out the few categories where prices continued to rise, like alcohol & tobacco and spending at restaurants and hotels (Graph 16).

Year-end inflation trend upward in 2026 is projected to settle at 2.5 percent, driven by the expectations of subdued fuel prices VAT reduction, barring any external shock or changes to domestic policies.

**External Sector**

In the year to November, Fiji’s **merchandise trade deficit**<sup>23</sup> widened by 10.3 percent to \$4,339.8 million, compared to a 6.2 percent narrowing in the same period last year. This outcome was supported by a surge in merchandise imports (6.6% to \$6,683.8m) which outweighed the marginal growth in exports (0.5% to \$2,344.0m).

<sup>23</sup> Trade deficit (value of imports exceeding the value of exports) excluding aircraft.

Fiji's merchandise imports (excluding aircraft) cumulative to November demonstrated a strong annual growth of 6.6 percent to \$6,683.8 million (from -1.9% in November 2024 to \$6,268.7m). The growth in imports was broad based, except for mineral fuel, with machinery and transport equipment (3.6pp), (particularly road vehicles), miscellaneous manufactured goods (0.8pp), manufactured good (0.7pp) and animal and vegetable fats (0.5pp) categories contributing the most.

Merchandise exports (excluding aircraft) grew by 0.5 percent annually to \$2,344.0 million, slightly higher than the outcome in the comparable 2024 period (6.4% to \$2,333.1m). The growth in exports was attributed to higher contributions from domestic exports (4.3pp) which more than offset the negative contributions from re-exports (-3.7pp). Higher domestic exports were driven by increased demand for gold (4.9pp),<sup>24</sup> woodchips (1.2pp) and kava (1.0pp). On the other hand, the fall in re-exports was mostly due to the decline in the re-export of mineral fuels & lubricant (-3.4pp) category. In addition, domestic exports of sugar also contributed negatively (-3.2pp) to the export growth.

Cumulative to the third quarter of 2025, tourism earnings grew by 11.3 percent, totalling \$2,101.9 million (from 2.2%, \$1,888.1m in the cumulative to the September quarter of 2024) (Graph 16). Despite the fall in average length of stay over the year (-4.2% to 8.2 days), higher tourism earnings was underpinned by a growth in average daily spending (+8.8% to \$409.1), particularly for per diems

from education training, business and holiday complemented by the higher visitor arrivals in the September quarter (2.0% to 291,392). Holiday per diems (\$437.8) increased by 11.5 percent over the year, in line with higher visitor arrivals and possibly supported by the lower VAT rate. A quarterly decline of 2.8 percent was recorded, likely due to normal seasonal patterns in tourism. Earnings from Australian, New Zealand, and US visitors continued to make up the largest share of tourism receipts in the third quarter.

In 2025, inward personal remittances rose to \$1,358.1 million, growing by 2.2 percent, compared to a 6.0 percent growth (\$1,328.7m) in the same period in 2024 (Graph 17). Australia, US, and New Zealand remained key sources of remittance inflows, reflecting the sizable Fijian diaspora in these countries. Additionally, the US government's planned implementation of a 1.0 percent remittance tax from 2026 could potentially weigh on the volume of remittance inflows from the US moving forward.<sup>25</sup> Mobile money transfers continued to grow, making up 54.3 percent of inward remittances in 2025 (up from 47.5 % in 2024), while transfers via

<sup>24</sup> Gold dore and concentrates.

<sup>25</sup> The US Congress has passed the 'One Big Beautiful Bill Act,' which includes a 1.0 percent tax on remittances, set to take effect in January 2026.

foreign exchange dealers and banks declined over the same period.

Outward remittances rose by 7.9 percent annually to \$539.9 million, mainly driven by transfers from non-residents to meet overseas commitments and increased pension and superannuation payments. On a net basis,<sup>26</sup> remittances fell by 1.2 percent to \$818.2 million.

Graph 17  
Remittances  
(Annual)

Source: RBF

At the end of 2025, foreign reserves (RBF holdings) remained adequate at \$3,709.6 million (5.6 MORI). On an annual basis, foreign reserves rose by \$1.9 million in 2025 (Graph 18), supported by tourism receipts, government grants, and Fiji Airways fares and complemented by a slowdown in outflows for dividend repatriation and offshore investment. Given this position, foreign reserves are projected to remain adequate over the medium term.

Graph 18

Foreign Reserves

Source: RBF

## Financial Conditions

The RBF maintained the OPR at 0.25 percent throughout 2025 given the outlook for foreign reserves and prices were stable. Sufficient liquidity kept lending rates at historic lows, supporting private sector credit growth and creating conditions conducive to economic activity. Banking system liquidity stood at around \$1.9 billion in 2025.

## Financial Intermediation

**Broad money (M3)** expanded to \$13.3 billion in 2025, registering an annual growth of 10.4 percent (\$1.3b), higher than the 7.7 percent (\$0.9b) growth in 2024. The outcome was driven by the robust growth in net domestic assets (NDA) (10.4%, \$938.7m) and complemented by a moderate increase in net foreign assets (5.9%, \$192.2m) and a notable decline in non-liquid liabilities (-48.8%, -\$125.9m).<sup>27</sup>

<sup>26</sup> Difference between inward (inflow) and outward (outflow) remittances.

<sup>27</sup> NLL is a negative component of M3 and thus a decline in NLL contributes positively to the growth in M3. The significant decline in NLL was driven entirely by the drop

in trade credit and advances to other non-financial corporations (-51.2%, -\$125.4m).

The robust expansion in NDA mirrored increases in NDC (10.5%, \$1.2b), particularly the growth in PSC (8.4%, \$866.5m) and was further supported by the rise in net credit to Central Government (106.4%, \$177.5m). PSC was driven by credit to the households (13.4%, \$413.4m), real estate (9.1%, \$180.6m), WRHR (6.0%, \$132.7m) and the B&C sectors (13.6%, \$129.5m).

On the other hand, the increase in NFA was primarily led by the rise in other foreign assets (OFA) (63.6%, \$491.3m) which outweighed the robust expansion in foreign liabilities (FL)<sup>28</sup> (24.5%, \$309.8m) while gross reserves contributed marginally (0.3%, \$10.6m) amid muted growth in foreign reserves (0.1%, \$1.9m).

On the liabilities side of M3, the annual outturn was mainly driven by the growth in narrow money (M1) (11.3%, \$1.0b), particularly transferable deposits (TD) (11.5%, \$954.3m) of PSBEs (15.9%, \$537.6m), HHs (11.6%, \$325.3m) and non-banking financial institutions (NBFIs) (17.2%, \$183.6m). Additionally, other deposits (6.1%, \$174.7m), currency in circulation (8.7%, \$73.8m) and securities other than shares (137.8%, \$53.8m) also contributed to the overall increase.

**Commercial banks' (CBs') outstanding loans** rose by 10.8 percent (\$1.0b) to \$10.7 billion in 2025 largely led by the HHs sector (16.4%, \$446.6m) with most of the growth coming from housing loans (14.7%, \$345.0m), followed by motor vehicle (41.3%, \$47.6m) and unsecured lending (19.6%, \$54.1m).

The RE (8.2%, \$158.2m), WRHR (6.0%, \$125.0m), building & construction (12.3%, \$105.7m) sectors also contributed to the outcome, which offset the fall in loans to the manufacturing (-5.5%, -\$31.3m) and mining & quarrying (-4.5%, -\$1.4m) sectors (Graph 19).

Graph 19

Source: RBF

New loans issued by CBs rose by 13.1 percent (\$604.1m) to \$5.2 billion in 2025 stemming mostly from higher lending to the WRHR sector, which grew by 20.4 percent (\$342.3m) to a total of \$2.0 billion. Complementing the expansion was lending to the HHs sector (20.5%,

<sup>28</sup> FL is a negative component of NFA and therefore, an increase in FL contributes negatively to NFA growth.

\$188.1m), mostly housing loans (20.8%, \$130.6m). The agriculture (106.5%, \$47.1m), RE (7.5%, \$42.5m) and transport & storage (16.9%, \$33.7m) sectors also supported the growth in new lending which jointly offset the fall in new loans to the manufacturing (-18.7%, -\$87.9m) and B&C (-9.1%, -\$29.7m) sectors.

**CBs' lending rates and term deposit rates** declined over the review period. The weighted average new lending rate settled at 4.50 percent in 2025 dropping from 4.55 percent in the previous year while the weighted average outstanding lending rate fell to 4.49 percent from 4.56 percent in 2024.

The weighted average new time deposit rate declined to 1.53 percent in 2025 from 1.62 percent in the previous year while the existing time deposit rates fell to 1.56 percent from 1.71 percent in 2024. Consequently, both the new (4bp) and the existing (8bp) interest rate spreads widened over the year in 2025 settling at 2.97 percent and 2.93 percent, respectively (Graph 20).

Graph 20

### Money Market

Government treasury bills (T-bills) were oversubscribed during the December quarter, totalling \$50.0 million with \$30 million accepted on both the 91-day and 182-day maturities and \$95 million on the 364-day maturity, at interest rates of 0.20 percent, 0.45 percent and 1.13 percent, respectively. According to the issuance prospectus, the Government plans to float a total of \$290.0 million in T-bills during the current financial year, with \$255.0 million already issued from August to December 2025.

### Bond Market

Fiji Infrastructure Bonds were undersubscribed by \$130.4 million in the December quarter and a total of \$394.6 million was accepted on the 3 years, 5 years, and 20 years maturities with interest rates of 1.59 percent, 2.06 percent, and 5.67 percent, respectively. Viti bonds were undersubscribed by \$177.6 million during the same quarter. Only \$2.5 million was accepted on the 5, 7 and 10 year maturities with fixed rates of 3.00 percent, 3.50 percent, and 4.00 percent, respectively.

Fiji Development Bank Bonds were oversubscribed by \$72.0 million in the December quarter. A total of \$35.0 million was accepted across the 2, 3, 4, 5, and 7-year maturities, offering annual interest rates of 3.00 percent, 3.71 percent, 4.45 percent, 4.70 percent, and 5.00 percent, respectively.

### Exchange Markets

In December 2025, the Fijian Dollar (FJD) appreciated against the United States Dollar (3.3%) the Japanese Yen (YEN) (3.0%) and the New Zealand Dollar (0.6%) but weakened against the EURO (-8.5%) and the Australian Dollar (-4.0%).

### Banking Industry Quarterly Condition Report – 30 September 2025

#### Overview – Commercial Banks

The overall performance of the commercial banking sector for the September 2025 quarter was assessed as satisfactory, based on satisfactory capital, earnings, liquidity and asset quality positions.

#### Balance Sheet

Commercial banks’ total assets stood at \$16.4 billion, recording a growth of 2.8 percent over the quarter and 9.5 percent over the year.

The quarterly growth in the balance sheet was largely attributed to increases in net loans, exchange settlement account (ESA), investments, statutory reserve

deposits (SRD) and cash. These were partially offset by the decline in other assets and deposits with banks and at call. (Graph 22)

Graph 22  
Structural Change and Growth In  
Commercial Banks’ Assets

The gross assets of the commercial banks represented 47.9 percent of the total financial system (excluding the RBF) gross assets of \$35.0 billion as of 30 September 2025.

#### Balance Sheet Funding

Total deposits increased by 2.8 percent over the quarter to \$13.1 billion (Graph 23), underpinned by the increase in demand deposits, while time deposits and savings deposits declined.

The 4.2 percent growth over the quarter in demand deposits to \$10.6 billion was attributed to increases in deposit placements from non-bank financial institutions (NBFIs), followed by the central government, private individuals (PIs), and private sector business entities (PSBEs), which was partially offset by the withdrawals made by public enterprises (PEs) and non-residents.

On the other hand, time deposits decreased over the quarter by 2.7 percent,

however remained at \$2.5 billion. The decline is largely due to the withdrawals by NBFIs and PEs. This was largely offset by placements from the central government.

Similarly, savings deposits decreased by 2.5 percent to \$39.1 million, owing to withdrawals by PSBEs and PIs.

In terms of composition, demand deposits continued to account for the largest share of commercial banks' total deposits at 80.9 percent, followed by time deposits at 18.8 percent and savings deposits at 0.3 percent, respectively. The 15 largest depositors stood at \$3.0 billion and represented 22.9 percent of the commercial banks' total deposits.

**Graph 23**  
**Commercial Banks' Customer Deposits & Loans**

Source: Commercial Banks

## Financial Intermediation

Commercial banks' gross loans & advances grew over the quarter by 2.6 percent to \$10.5 billion (Graph 24). On an annual basis, gross loans increased by 11.0 percent from \$9.4 billion. The quarterly increase in lending was largely driven by loans to PSBEs and PIs.

**Graph 24**  
**Commercial Banks' Gross Loans, Advances and Leases By Sector**

Source: Commercial banks

New loans disbursed during the review quarter amounted to \$1.3 billion, concentrated in the wholesale, retail, hotels & restaurants (WRHR) sector at 36.7 percent, followed by PIs at 21.9 percent and real estate at 11.5 percent.

The 15 largest credit exposures of commercial banks remained at \$2.7 billion as at 30 September 2025, and represented 25.6 percent of the industry’s gross loans, and 150.5 percent of total capital.

### Capital Adequacy

Commercial banks’ combined capital adequacy ratio improved to 17.2 percent as at 30 September 2025 (June 2025: 17.0%), well above the prudential minimum requirement of 12.0 percent and continued to be assessed as satisfactory (Graph 25).

The increase in the total capital to \$1.8 billion over the quarter was attributed to the growth in core capital, resulting from an increase in assigned capital, followed by an increase in supplementary capital stemming from unaudited retained profits.

Similarly, the increase in total risk-weighted assets by 1.2 percent to \$10.3 billion was mainly due to the increase in on-balance sheet exposures, from increases in 50 percent risk-weighted assets. Additionally, off-balance sheet exposures also noted an increase of 2.6 percent to \$1.2 billion.

Non-performing loans (NPLs) (classified exposures) less specific provisions to capital ratio stood at 12.6 percent, from 11.6 percent reported in the prior quarter, reflective of the greater increase in NPLs and specific provisions in comparison to the increase in capital and reserves.

### Asset Quality

Asset quality for commercial banks continued to be assessed as satisfactory as at 30 September 2025, as classified exposures to gross loans ratio increased over the quarter to 3.3 percent from 3.1 percent (Graph 26).

Graph 25  
Commercial Banks' Capital Adequacy

The increase in the capital adequacy ratio was attributed to a larger increase in total capital by 2.4 percent relative to the increase in total risk-weighted assets by 1.2 percent.

Graph 26

**Commercial Banks' Non-performing Loans**

Source: Commercial banks

Commercial banks' classified exposures noted an increase over the quarter by 10.3 percent to \$346.7 million. The increase is owed to increases in doubtful, substandard and loss categories. Similarly, the special mention category also increased to \$223.4 million. The increases noted in the review quarter were mainly due to the downgrading of accounts to the substandard category.

Similarly, total past due levels for commercial banks grew over the quarter by 3.7 percent to \$197.9 million, stemming from increases in the "three to six months" time bucket (by \$11.6m) and "one to two years" time bucket (by \$4.0m), while declines were noted in the "six months to one year" time bucket (by \$6.0m) and "over 2 years" time bucket (by \$2.6m) (Graph 27).

NPLs were concentrated in the PI sector at 29.3 percent, followed by real estate at 20.8 percent, WRHR at 17.8 percent and transport and storage at 14.0 percent.

Graph 27

**Commercial Banks' Past Due Status**

Source: Commercial banks

In terms of coverage, specific provisions grew over the quarter by 9.7 percent to \$111.7 million, due to an increase in both collectively assessed provisions (CAP) to \$66.4 million and individually assessed provisions (IAP) to \$45.3 million. Specific provisions to non-performing loans stood at 32.2 percent (June 2025: 32.4%).

General reserve for credit losses (GRCL) declined by 6.0 percent to \$110.4 million and covered 1.1 percent of net loans.

**Earnings and Interest Spread**

Commercial banks' earnings performance continued to be assessed as satisfactory, albeit registering a slight reduction in net profit before tax (NPBT) by 3.6 percent to \$79.3 million, compared to \$82.3 million recorded in the prior quarter. Similarly, on an annual basis, net profit before tax decreased by 10.4 percent from \$88.5 million (Table 1).

Table 1  
Commercial Banks' Combined Income  
Statement

Quarter Performance \$M	Sep-24	Jun-25	Sep-25	% Change	
Interest Income	119.8	124.7	128.2	2.8	7.0
Interest Expense	20.5	23.2	24.6	6.3	20.2
<b>Net interest income</b>	99.4	101.5	103.6	2.0	4.3
<i>Add: Non-interest income from overseas exchange transactions</i>	70.9	73.0	74.4	2.0	4.9
Commission Fee Charges	2.2	3.2	3.3	2.4	50.4
Other income	23.1	25.2	24.2	(4.3)	4.3
<i>Equals</i>	12.3	13.1	11.6	(11.4)	(5.3)
<b>Total operating income</b>	170.3	174.5	178.0	2.0	4.5
<i>Less: Operating expenses</i>	82.8	84.3	92.7	9.9	12.0
<i>Less: Bad Debts &amp; provisions</i>	(1.0)	7.9	6.0	(23.9)	693.4
<i>Equals: Profit before tax</i>	88.5	82.3	79.3	(3.6)	(10.4)
<i>Less: Tax</i>	20.5	16.0	20.7	29.2	(0.9)
<b>Net profit after tax</b>	68.0	66.3	58.6	(11.5)	(13.8)

Source: Commercial banks

The quarterly decline in before-tax profits was underpinned by a greater increase in operating expenses compared to the increase in operating income, which resulted in a reduction in total net income of 5.4 percent.

Operating expenses grew over the quarter by 9.9 percent to \$92.7 million, attributed to increases in personnel expenses and other expenses.

The larger increase in the operating expense relative to the increase in operating income deteriorated the efficiency ratio from 48.3 percent to 52.1 percent.

Bad debts & provisions decreased by 23.9 percent to \$6.0 million, mainly due to a decline in loan loss provisions of 16.7 percent, emerging from a reduction in CAP, offset by the increase in IAP. Bad debt write-offs and recoveries also recorded decreases of \$1.0 million and \$0.1 million, respectively.

In line with the decrease in profits reported in the review quarter, the annualised return on assets (ROA) and return on equity (ROE) for commercial banks increased to 1.4 percent (June 2025: 1.7%) and 12.7 percent (June 2025: 15.0%), respectively.

The combined interest spread for commercial banks increased by 31 basis points to 3.7 percent during the quarter (Graph 28).

Graph 28  
Commercial Banks' Margin and Spread

Source: Commercial banks

## Liquidity

The commercial banks’ liquidity position continued to be assessed as satisfactory in the review quarter, with the liquid assets ratio increasing to 25.6 percent (June 2025: 25.2%).

For the quarter, commercial banks’ liquid assets<sup>29</sup> increased by 4.0 percent to \$4.2 billion, primarily due to an increase in ESA, followed by increases in investments and cash. This was offset by the decline in deposits with banks and at call.

The liquid assets<sup>30</sup> ratio, which is an indicator of liquid assets available to meet expected and unexpected demand for cash, stood at 25.6 percent in the review quarter (June 2025: 25.2%). Loans to deposits ratio dropped to 79.7 percent (June 2025: 79.9%).

Furthermore, commercial banks’ core liquidity<sup>31</sup> ratio increased further to 181.4 percent from 162.3 percent recorded in the prior quarter (Graph 29) and continued to be assessed as adequately placed to meet short-term withdrawal of funds.

Graph 29  
Commercial Banks' Core Liquidity Ratio

Source: Commercial banks

The average liquidity coverage ratio (LCR) was recorded at 105.0 percent<sup>32</sup> for the banking industry, with all the commercial banks meeting the 70.0 percent minimum LCR required for 2025. It is anticipated that all banks will remain on track to meet the 80.0 percent minimum LCR requirement for 2026.

## Overview – Credit Institutions

The overall performance of credit institutions continued to be assessed as satisfactory in the September 2025 quarter, supported by satisfactory capital, earnings and liquidity positions, and a marginal asset quality rating.

<sup>29</sup> Liquid assets include cash on hand, demand balances at RBF, demand and term balances due from corresponding foreign banks and holding of Government and Quasi Government debt securities.

<sup>31</sup> Core liquidity includes cash on hand, demand balances at RBF and demand balances due from corresponding foreign banks. Core liquidity ratio is the ratio of core liquidity to

term deposits maturing in three months or less, plus demand deposits of non-bank financial institutions.

<sup>32</sup> One bank reported between the range of 80% to 100%, four banks between 100% to 200%, while one bank reported over 200%.

### Balance Sheet

Credit institutions’ total assets increased over the quarter by 3.0 percent (or \$25.1m) to \$863.9 million, largely attributed to increases in net receivables, future income tax benefits (FITB), fixed assets and investments, which outweighed the decrease in deposits with banks and other assets.

On an annual basis, credit institutions’ balance sheet grew by 8.3 percent (or \$66.2m) from \$797.7 million (Graph 30).

Graph 30  
Structural Change and Growth in Credit Institutions’ Assets

Source: Credit institutions

### Balance Sheet Funding

Total deposits increased by 3.6 percent over the quarter to \$620.2 million, underpinned by new deposit placements by PSBEs, PIs, NBFIs and local government, which offset withdrawals by PEs and the central government. On an annual basis, total deposits increased over the year by 21.4 percent from \$511.0 million.

The PIs sector accounts for majority of the credit institutions’ term deposits at 32.1 percent, followed by the PSBEs (25.5%), NBFIs (20.5%), and PEs (18.2%).

The 15 largest depositors decreased to \$313.4 million and represented 50.5 percent of the credit institutions’ total deposits.

### Financial Intermediation

Lending by credit institutions grew over the quarter by 4.9 percent to \$637.4 million, driven by the increases in borrowings by PSBEs, PIs and PEs. On an annual basis, gross loans increased by 9.1 percent from \$583.9 million (Graph 31).

Graph 31  
Credit Institutions’ Customer Term Deposits and Loans and Advances

Source: Credit institutions

Loans to PIs increased by 2.7 percent over the quarter to \$302.9 million, underpinned by housing loans, ‘others’ (comprised of personal loans and credit card receivables) and cars, motorcycles & other personal transport.

Similarly, loans to PSBEs increased by 5.8 percent to \$333.0 million, mainly due to loans to real estate, building & construction, WRHR, transport & storage, agriculture, mining & quarrying and manufacturing, which outweighed the decline noted by professional & business services and other loans.

The PSBEs continued to account for most of the credit institutions' gross loans at 52.2 percent, followed by PIs (47.5%) and PEs (0.2%).

The 15 largest credit exposures of credit institutions decreased to \$46.7 million and represented 7.3 percent of the industry's gross loans and 24.1 percent of total capital.

**Capital Adequacy**

Credit institutions' capital adequacy continued to be assessed as satisfactory for the review quarter, noting an increase from 26.4 percent in the prior quarter to 26.7 percent. All credit institutions maintained their capital adequacy ratios well above the minimum prudential requirement of 15.0 percent (Graph 32).

Graph 32

**Credit Institutions' Capital Adequacy**

Source: Credit institutions

The increase in the capital adequacy ratio was attributed to a higher percentage increase in total capital compared to risk-weighted assets.

Total capital increased over the quarter by 4.1 percent to \$187.3 million, due to the increase in disclosed reserves, other supplementary capital and contra-accounts such as future income tax benefits, which was partially offset by the decreases in unaudited retained profits.

Total risk-weighted assets increased by 3.0 percent over the quarter to \$663.9 million, reflective of the increases in 100 percent risk-weighted on-balance sheet exposures mainly from the increase in other loans to the private sector and loans to the commercial public sector, which offset the decrease in other assets and premises, plant, equipment & other fixed assets.

Non-performing loans (NPLs) less specific provisions to capital ratio decreased from 18.3 percent to 16.7 percent as at 30 September 2025, due to a greater decline in NPLs compared to the decline in specific provisions, while capital & reserves increased.

**Asset Quality**

Asset quality for credit institutions continued to be assessed as marginal, with a slight improvement noted in classified exposures to gross loans ratio to 8.4 percent compared to 9.2 percent in the prior quarter (Graph 33).

Classified exposures declined over the quarter by 3.8 percent to \$53.8 million, due to decreases in substandard accounts, loss accounts and doubtful accounts. Similarly, special mention accounts decreased over the quarter by 2.3 percent to \$59.6 million and represented 9.3 percent of total gross loans.

Impaired assets increased over the quarter by 7.5 percent to \$43.1 million and represented 6.8 percent of gross loans.

In terms of coverage, specific provisions to classified exposures increased to 42.0 percent from 41.2 percent in the prior quarter, mainly due to a greater decline in classified exposures compared to the decrease in specific provisions.

GRCL increased by 3.1 percent to \$13.0 million and covered 2.1 percent of net loans as at 30 September 2025.

Past due levels for credit institutions stood at \$42.7 million in the review quarter, an increase of 9.8 percent, due to increases noted in 3 – 6 months and 6 months – 1 year, which outweighed the decrease noted in 1 – 3 months and 1 – 2 years. (Graph 34).

### Earnings and Interest Spread

Credit institutions' earnings performance continued to be assessed as satisfactory for the review quarter, despite recording a decrease in profit before tax of \$11.9 million compared to \$12.3 million reported in the prior quarter. The quarterly decrease in profit before tax was largely driven by the decrease in non-interest income recorded in the review quarter. On an annual basis, profit before tax increased by 23.0 percent from \$9.7 million (Table 2).

Table 2  
**Credit Institutions' Combined Income Statement**

Quarter Performance (\$m)	Sep - 24	Jun- 25	Sep- 25	% Change	
				Over Qtr.	Over Yr.
Interest Income	25.3	25.1	27.3	8.8	7.9
Interest Expense	3.7	4.5	4.6	1.6	24.9
Net interest income	21.6	20.6	22.7	10.4	5.1

Less: Bad Debts & provisions	3.8	2.2	1.0	(52.3)	(72.7)
Profit before tax	9.7	12.3	11.9	(3.3)	23.0
Less: Tax	2.0	2.3	3.0	34.0	49.5
Net profit after tax	7.6	10.0	8.8	(11.8)	15.9

Source: Credit institutions

Net interest income stood at \$22.7 million in the September 2025 quarter compared to \$20.6 million in the prior quarter. This was largely due to an increase in interest income. On the other hand, the decrease in non-interest income in the review quarter was due to the decrease in dividends and other income, which outweighed the increase in service charges/fees.

Operating expenses remained relatively unchanged over the quarter and stood at \$11.2 million. Bad debts & provisions declined by 52.3 percent over the quarter to \$1.0 million

As a result of the greater decrease in operating income and operating expenses remaining relatively unchanged over the quarter, credit institutions' efficiency ratio deteriorated from 43.6 percent to 46.4 percent in the review quarter.

In line with the decline in profits reported in the review quarter, the annualised return on equity (ROE) and return on assets (ROA) ratios decreased to 18.4 percent and 4.1 percent, respectively, for the September 2025 quarter.

The combined annualised interest spread of credit institutions stood at 10.5 percent in the review quarter, compared to 9.8 percent in the previous quarter, with an increase noted in the yield on earnings assets while the cost of funding liabilities fell (Graph 35).

Graph 35

**Credit Institutions' Margins and Spreads**

Source: Credit institutions

## Liquidity

The liquidity position of credit institutions continued to be assessed as satisfactory as at 30 September 2025, despite noting a decline in liquid assets<sup>33</sup> over the quarter.

Liquid assets stood at \$206.3 million, a decrease of 2.1 percent from the prior quarter, mainly due to term deposit maturities, which outweighed the increase in new deposits and investments. Liquid assets represented 22.9 percent of the credit institutions’ total assets (Graph 36).

Core liquidity<sup>34</sup> ratio significantly increased over the quarter to 305.3 percent from 221.4 percent in the prior quarter, attributed to a greater decrease in maturing short-term deposits compared to the decrease in core liquid assets.

## Insurance Industry Quarterly Condition Report – 30 September 2025

The insurance industry’s overall performance for the September 2025 quarter continued to be assessed as satisfactory based on satisfactory solvency, satisfactory liquidity and earnings positions.

### Life Insurance Sector

### Capital

Life insurers continued to demonstrate a strong solvency position as evidenced by a 0.8 percent (or \$3.9m) increase in the solvency surplus to \$496.8 million as at 30 September 2025, which remained well above the minimum solvency requirement of \$43.9 million (Graph 37).

Graph 36

Source: Credit Institutions

33 Liquid assets include demand and term balances with banks, and holdings of Government and Quasi Government debt securities.

34 Core liquidity includes demand balances with banks. Core liquidity ratio is the ratio of core liquidity to term deposits maturing in three months.

The increase in the solvency surplus during the quarter was driven by a 0.8 percent (or \$16.9m) growth in total admissible assets to \$2.2 billion along with a 0.8 percent (or \$12.6m) increase in admissible liabilities to \$1.6 billion, resulting in an overall growth in the net adjusted assets to \$540.6 million (June 2025: \$536.3m).

Graph 37  
Life Insurers' Solvency

**Assets**

Total assets for life insurers stood at \$2.3 billion, growing slightly by 0.6 percent (or \$14.5m) during the quarter. On an annual basis, total assets noted a growth of 6.1 percent (or \$130.1m) from \$2.1 billion.

The growth in total assets was primarily driven by an increase of \$17.8 million in current assets. However, this was partially offset by a decline of \$4.2 million in investments during the quarter.

Investments continued to represent the largest share of total assets within the life insurance sector, accounting for 88.1 percent (or \$2.0b). Other secured loans made up 5.8 percent (or \$131.4m), while cash on hand represented 4.0 percent (or \$89.3m) (Graph 38).

Government securities constituted the largest portion of the total investment portfolio, representing 55.0 percent. This was followed by shares at 27.3 percent, land & buildings at 10.1 percent, and bank deposits at 6.5 percent.

Graph 38  
Distribution Of Assets of Life Insurance Companies

Total investments of life insurers fell over the quarter by 0.2 percent (or \$4.2m) to \$2.0 billion. The decline was primarily due to a reduction in Government securities (by \$7.2m) and debentures with related persons (by \$1.3m). The overall reduction was slightly offset by an increase in shares in non-related persons by \$2.8 million and bank deposits by \$1.0 million (Graph 39).

Annually, investments grew by 6.4 percent (or \$118.8m) from \$1.9 billion.

Graph 39

### Composition of Investments

Source: Insurance companies

### Liabilities

Total liabilities of the life insurance sector increased by 0.6 percent (or \$13.4m) over the quarter to \$2.2 billion, attributed to a 0.8 percent (or \$16.4m) growth in the balance of revenue account, which continued to dominate liabilities at 96.5 percent. On an annual basis, life insurers' total liabilities recorded an increase of 6.2 percent (or \$125.5m) from \$2.0 billion.

Other provisions for the life insurance sector noted a marginal decrease by 4.7 percent (or \$2.3m) to \$46.8 million, due to the rise in employee entitlements (by \$1.0m) and doubtful debts (by \$0.4m), which was offset by the decline in taxation (by \$0.2m).

'Other' liabilities declined further over the quarter by 2.5 percent, (or \$0.5m) to \$19.8 million, primarily attributable to a \$0.6 million decrease in sundry creditors.

### Earnings

The earnings level of life insurers was assessed as satisfactory for the September 2025 quarter. The life insurers' consolidated net profit after-tax was \$3.8 million, however it declined by \$17.2 million over the quarter (September 2024 quarter NPAT: \$7.6m).

Total income fell by 18.9 percent (or \$15.8m) to \$67.9 million over the quarter, mainly resulting from asset value depreciation of \$29.0 million, and net insurance premiums declining by \$1.0 million. These were marginally offset by increases in investment income from dividends (\$12.9m) and interest income (\$1.3m), respectively.

Total outgoings of the life insurance sector grew during the reporting period by 4.4 percent (or \$2.7m), driven by the increase in policy liabilities (by \$5.3m). Operating expenses and new policy payments, on the other hand, decreased by \$1.9 million and \$0.6 million, respectively, during the quarter.

## Liquidity

Life insurers’ core liquid assets recorded a growth from the previous quarter by 8.7 percent (or \$17.4m) to \$218.0 million, stemming from the increase in cash on hand by \$16.4 million and bank deposits by \$0.9 million.

The broad liquidity ratio (incl. Government securities), which measures the ability of life insurers to meet their total liabilities, noted a slight increase to 60.7 percent from 60.6 percent in the previous quarter. Overall, the liquidity position of life insurers continued to be assessed as satisfactory.

### General Insurance Sector

## Capital

General insurers’ solvency position was assessed as satisfactory, as all insurers maintain their capital positions above the mandated levels. The consolidated solvency surplus stood at \$203.9 million as at 30 September 2025, however declining by 2.7 percent (or \$5.6m) over the quarter (Graph 40).

During the review quarter, total net adjusted assets decreased by 1.6 percent (or \$4.2m) to \$251.9 million, driven by a larger reduction in total admissible assets (by \$14.2m) relative to the decline in total adjusted liabilities (by \$10.1m).

## Assets

Total assets stood at \$694.9 million for the quarter, reflecting a 3.3 percent decrease (or \$23.7m) from the previous quarter, while reporting an annual growth of 7.1 percent (or \$46.3m) from \$648.6 million.

The quarterly decline in total assets was mainly driven by reductions in amounts due from reinsurers on outstanding claims (by \$23.6m), cash on hand (by \$14.6m), sundry debtors in related persons by (\$10.3m), deferred reinsurance expenses by (\$5.5m), and other assets (by \$1.9m).

However, increases were observed in outstanding premiums – 3 months and under (\$15.1m), investments (by \$14.0m), prepayments in non-related persons (by \$2.1m) and future income tax benefit (by \$1.0m), alongside other smaller movements.

Graph 40  
General Insurers’ Solvency

Source: Insurance companies

### Investments

Total investments continued to grow, registering an increase of 3.3 percent (or \$14.0m) to \$437.4 million, and accounted for 62.9 percent of total assets. The growth is underpinned by increases in all investment categories, with Government securities showing the most significant rise (\$5.4m), followed by bank deposits (\$5.3m), land & buildings (\$2.9m) and shares in non-related persons (\$0.4m).

In terms of composition, bank deposits continued to dominate the general insurers’ investment portfolio at 73.9 percent (\$323.4m). This was followed by land and buildings at 14.1 percent (\$61.9m), shares in non-related persons at 4.5 percent (or \$19.9m), shares in related persons at 4.0 percent (or \$17.4m) and Government securities at 2.9 percent (or \$12.9m) (Graph 41).

Graph 41

#### Distribution of Assets for General Insurance Companies

Source: Insurance companies

### Reinsurance

Reinsurance premium ceded offshore increased by 10.9 percent (or \$0.9m) during the quarter to \$9.9 million (June 2025: \$8.9m). All general insurers remained compliant with the reinsurance requirements.

### Liabilities

General insurers’ total liabilities decreased by 2.4 percent (or \$9.6m) over the quarter to \$395.8 million. However, on a year-over-year basis, liabilities grew by 10.6 percent (or \$37.8m) from \$358.0 million.

The quarterly reduction was driven by contractions in other borrowings (\$7.7m), other liabilities (\$7.3m) and outstanding claims provision (\$5.8m). This offset the significant increase noted in the unearned premium provision of \$12.4 million.

Unearned premium provision accounted for the largest share of total liabilities in the general insurance sector at 36.1 percent (or \$142.9m), followed by outstanding claims provision at 35.2 percent (or \$139.5m) and other liabilities at 23.0 percent (or \$91.2m) (Graph 42).

Graph 42  
Distribution of Liabilities of General Insurers

Source: Insurance companies

### Earnings

Earnings position for general insurers were at marginal levels, following a decline in the after-tax profit by 107.0 percent (or \$12.7m) to a loss of \$0.8 million (Graph 43). This was attributed to the \$16.2 million reduction in underwriting results, however slightly offset by the rise in non-underwriting income (\$2.1m) and the reduction in taxation expenses (\$2.2m).

Graph 43  
General Insurers' Viability

Source: Insurance companies

The decline in the underwriting result for the quarter was reflective of the increases in net claims incurred (by \$13.4m) and underwriting expenses (by \$0.5m), coupled with a reduction in net earned premiums (by \$2.3m).

### Liquidity

General insurers' core liquid assets (cash and bank deposits) remain strong, despite the contraction of 2.2 percent (or \$9.2m) to \$406.7 million in the reporting period

The broad liquidity ratio (incl. Government securities), reflecting the ability of general insurers to meet their total liabilities, slightly improved over the quarter from 104.4 percent to 106.0 percent.

### Insurance Broking

#### Earnings

During the September 2025 quarter, the insurance broking sector recorded an after-tax profit of \$1.8 million, a slight decline compared to \$2.6 million recorded in the previous quarter

Total revenue fell by 8.3 percent over the quarter to \$8.5 million, mainly attributed to the decreases in brokerage earned as commission by \$0.4 million and brokerage earned as fees by \$0.3 million, which made up 95.6 percent and 3.7 percent of the sector's total revenue, respectively, for the quarter.

Total expenses also recorded a slight decrease of \$0.2 million during the quarter to \$5.0 million, mainly attributable to the decline in travel (by \$0.2m) and ‘other’ (by \$0.2m) expenses.

### Broking Account

The broking account balance decreased by \$0.1 million to \$10.8 million as at 30 September 2025, mainly due to more money being withdrawn than received during the quarter.

Total monies received by insurance brokers grew by 43.1 percent (or \$26.9m) for the review quarter, the majority of which were on behalf of premiums received from insured accounts of licensed insurers at 70.6 percent, followed by premiums received on the accounts of unlicensed insurers at 29.4 percent, and subsequently followed by other minor adjustments.

Similarly, total monies withdrawn during the quarter also increased by 42.4 percent and stood at \$89.3 million. This was mainly for payments to licensed insurers at 55.8 percent and payments to unlicensed insurers at 28.2 percent. Similarly, \$13.9 million was withdrawn for payments to self, representing 15.6 percent of the total withdrawals for the review quarter.

### Offshore Placements

A total of 235 applications amounting to \$15.7 million in premiums were approved during the quarter, compared to 241 applications at \$14.3 million approved in the prior quarter (Table 3).

Of the 235 approved applications, 25 applications worth \$11.1 million were approved by the RBF, whilst the remaining, worth \$4.4 million, were approved by licensed insurance brokers.

The material damage & business interruption (MD/BI) class accounted for the largest share of premiums remitted offshore at 55.5 percent, followed by the ‘others’ class at 12.3 percent and term life at 11.5 percent.

Table 3

**Capital Markets Quarterly Performance Report – 30 September 2025**

**Stock Market**

The key performance indicators of the stock market, such as market capitalisation, SPX Total Return Index (STRI) and value of shares traded, increased, while the reduction in the number and volume of shares traded was noted over the quarter. The buy and sell ratio continued to indicate an oversupply of listed securities, with more offers than bids in the market.

As at 30 September 2025, the total market capitalisation of listed securities grew by 3.1 percent (or \$112.9m) to \$3,729.7 million. Annual market capitalisation registered a 1.7 percent increase (or \$60.7m) from \$3,669.0 million (Graph 44).

Graph 44  
**Market Capitalisation**

The quarterly increase in market capitalisation was largely attributed to the increase in share price of SUN Insurance Company Limited (SICL) and Amalgamated Telecom Holdings Limited (ATH). This was complemented with the additional shares quoted by Pleass Global Beverages (PBP) as part of its dividend reinvestment plan and Free Bird Institute Limited as part of the Free Bird Group’s Share-Swap Program.

The composition of the top five listed securities in terms of market capitalisation remained unchanged and represented 65.1 percent of the stock market as at 30 September 2025 (June 2025: 65.3%). Seventeen (17) listed entities released their financial statements, of which ten (10) recorded an increase in net profit after tax, while seven (7) reported a decline.

The SPX Total Return Index (STRI) over the quarter closed at 9,566.77, an increase of 3.4 percent (or 315.4 points), attributed to an increase in capital and dividend returns. In comparison to September 2024, the STRI grew by 3.70 percent from 9,226.07.

During the September 2025 quarter, the stock market recorded a year-to-date (YTD) average return of 3.46 percent, consisting of a capital gain of 0.9 percent and an average yield of 2.6 percent.

The stock market reported 936<sup>35</sup> trades over the September 2025 quarter, in comparison to 960 trades in the prior quarter. Majority of trades were in Fijian Holdings Limited shares followed by Kontiki Finance Limited and SICL (Graph 45).

Graph 45  
Number of Trades\*

\* Excludes special crossing transactions  
Source: SPX

Five (5) special crossing transactions were approved during the quarter, with a total volume of 2.5 million shares at \$22.6 million. Following the exclusion of the special crossing transactions, the volume and value shares traded registered 3.2 million and \$7.0 million, respectively (Graph 46).

Graph 46  
Volume and Value Traded\*

\* Excludes special crossing transactions  
Source: SPX

The buy-to-sell ratio significantly grew over the quarter from 1:9 to 1:86, indicating a very low demand (bid) compared to the supply (offer), suggesting weak buying interest at the current price level.

### Managed Investment Schemes (MIS) Market

The MIS market’s key performance indicators of funds under management, investments and number of unitholders rose over the quarter. On the other hand, investment income and liquid assets declined.

### Balance Sheet

For the quarter, the MIS market reported growth in funds under management of 2.3 percent (or \$17.9m) to \$814.1 million. This was a result of an increase in unitholders' funds (by \$18.8m) to \$606.1 million and slightly offset by the decline in reserves (by \$0.8m) to \$208.1 million.

Annually, the funds under management increased by 19.6 percent (or \$133.6m).

### Assets

The MIS market registered a quarterly growth of 2.3 percent (or \$19.1m) to \$837.1 million in consolidated assets. This expansion was driven by an increase in investments (by \$40.5m), which outweighed the reduction in cash on hand (by \$25.9m).

35 Excludes 5 special crossing transactions.

## Investments

The combined investment portfolio of the MIS market grew by 5.6 percent (or \$40.5m) to \$763.5 million, underpinned by the increase in listed securities (by \$20.5m), term deposits (by \$10.0m), money market instruments (by \$9.2m) and unlisted securities (by \$0.9m). On the other hand, loans & receivables reduced (by \$0.2m) over the quarter.

On an annual basis, the consolidated investment portfolio registered a growth of 29.4 percent (or \$173.3m) from \$590.2 million.

Listed securities continue to dominate the investment portfolio at 32.7 percent, followed by term deposits and unlisted securities, both representing 27.4 percent of the portfolio, while bonds, property and loans & receivables stood at 7.4 percent, 3.2 percent, and 1.8 percent, respectively.

## Liabilities

The consolidated liabilities of the MIS market noted an increase of 5.1 percent (or \$1.1m) to \$23.0 million, underpinned by the increase in the 'other' category (by \$1.5m), outweighing the reductions in distributions payable (by \$1.0m) and management fee payable (by \$0.4m).

## Liquidity

The MIS market registered a reduction in its liquid assets of 5.7 percent (or \$15.9m) to \$264.1 million, due to the greater decrease in cash on hand (by \$25.9m) despite the increase in term deposits (by \$10.0m).

Following the reduction in liquidity, the ability of liquid assets to cover unitholders' fund also fell from 47.7 percent to 43.6 percent, however, this is considered sufficient. In addition, the coverage of unitholders' equity by liquid assets stood at 32.4 percent (June 2025: 35.2%).

In terms of repurchases, a total of 8.5 million units were redeemed over the quarter at a value of \$12.2 million (June 2025: 7.8m units redeemed at \$10.4m). The MIS market registered a large number of redemptions from local institutional and retail investors.

In line with the increase in redemptions over the quarter, the total repurchases to unitholders' fund ratio increased to 2.0 percent from 1.8 percent in the prior quarter.

Accordingly, liquid assets remained adequate and will be able to cover redemptions 21.6 times (June 2025: 27.0 times).

## Unitholders

The MIS market noted a marginal increase in the number of unitholders of 0.5 percent (or 680 unitholders) to 140,905 unitholders, driven by the increase in local retail unitholders (by 2,001 unitholders) and offset by the reduction in local institutional unitholders (by 1,356 unitholders). Additionally, the MIS market also registered an increase in foreign unitholders (by 39 unitholders), totalling 582 unitholders.

## Earnings

Over the quarter, the MIS market reported a reduction in after-tax income of 62.1 percent (or \$9.3m) to \$5.7 million. This is attributed to the greater decrease in investment income (by \$9.4m) compared to the decline in investment expenses (by \$22.5k) (Table 4).

Table 4

Source: MIS

Following the reduction in investment income, the annualised return on investment (AROI) fell over the quarter from 9.5 percent to 4.1 percent.

## Bond Market

As of 30 September 2025, the total value of bonds outstanding rose by 1.0 percent (or \$66.1m) to \$6,845.3 million (June 2025: \$6,779.2m). This is attributed to the greater increase in the issuance of bonds valued at \$149.1 million over the bonds redeemed at \$83.0 million.

Government bonds continued to grow the fixed income market through the issuance of Fiji Infrastructure Bonds (FIB) (by \$104.1m), Fiji Development Bank (FDB) (\$29.0m), Housing Authority Bonds (by \$9.0m) and Viti Bonds (by \$7.0m).

On the other hand, redemptions were noted for Fiji Infrastructure Bonds (FIB) (by \$51.8m), Fiji Development Loans (FDL) (by \$28.2m) and Fiji Development Bank (FDB) (by \$3.0m).

There was no secondary trading of bonds on the SPX in the review quarter.

Note:

<sup>1/</sup> The Monetary & Credit Aggregates table is derived from the Central Bank Survey (CBS) (Table 3) and Other Depository Corporations Survey (ODCS) (Table 2).<sup>2/</sup> Monetary base is normally referred to as reserve money and its components include currency in circulation, ODCS deposits at the Reserve Bank and other deposits of other financial corporations.<sup>3/</sup> As of May 2012, the official definition of broad money has changed to include securities of money issuers. As a result, M3 will now be known as broad money.

Note:

<sup>1/</sup> The Statutory Reserve Deposit is derived as 10 percent of commercial banks' deposits and similar liabilities at the end of the previous month.

<sup>2/</sup> From 1996, demand deposits include funds placed in the Trust Account established for re-financing NBF Asset Management Bank.

<sup>3/</sup> Currency with non-bank public was revised from 2001-October 2015.

<sup>4/</sup> Held outside of the banking system.

<sup>5/</sup> Differences, if any, in total assets and liabilities are due to rounding off.

Note:

<sup>1/</sup> As defined under the Section 43 of the RBF Act. Since 1996, when the National Bank of Fiji Restructuring Act became effective, Section 31 exempts the NBF Assets Management Bank from holding Statutory Reserve Deposit and Unimpaired Liquid Asset.

<sup>2/</sup> Balances at the end of the review month.

<sup>3/</sup> Refers to the total only and not individual items.

<sup>4/</sup> Balances of deposits and related liabilities as at the end of the previous month.

Note:

n.i. - no issue

n.t. - no trade

<sup>1/</sup> Represents monthly weighted average rate.<sup>2/</sup> Prior to October 2006, Minimum Lending Rate (MLR) = Repurchase Facility Rate (Policy Indicator Rate + 100 basis points). From October 2006, MLR = Policy Indicator Rate + 100 basis points and Repurchase Facility Rate = latest weighted average overnight interbank rate + 100 basis points. From October 2007, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 5 percentage points). From January 2009, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 2 percentage points).
